

## 1: Go Math! Florida 4th Grade - Textbook Resources TOC | Lumos Learning

*of results for "go math teacher edition grade 5" Go Math! Grade 5 Teacher Edition Chapter 1: Place Value, Multiplication and Expressions (Common Core Edition) ()*.

In the lower grades TE you will occasionally find a section with a Math Story that will connect your lesson to other subjects. In this case, the story is designed to connect to Social Studies. Next in your TE you will come to the section Teaching for Depth. This is an area that shows how Go Math! Because our NAD Math Standards focus on greater depth and less breadth, these pages will serve to help us strengthen our supporting knowledge of the skills being taught. A very helpful part of this section is the Professional Development Videos for Podcasting. They are short videos, designed as a review of standards and skills for use by the teachers. You will find them to be a short, practical explanation of the concepts and recommended manipulatives. This is a very valuable tool for teachers: If the lesson does not show the podcast icon, check on Think Central. This page reminds us of the ways we can differentiate instruction using Go Math! We are reminded of the Response to Intervention, RtI, components that provide support for the students who need extra help are on level would thrive with enrichment opportunities. Now we turn to the section where we can Review Prerequisite Skills. At the bottom of the page you will find the standard that is being taught in this chapter. At a glance, you can see what skills and standards were taught in the previous grade that support the present concept being addressed and what skills will be taught at the next grade level to build on what is being taught now. As this series is being adopted there are bound to be areas where students are not yet as prepared as we would like them to be. This page will give suggestions on how to support them. Over time, as Go Math! The Assessment Guide has a Prerequisite Skill Inventory that can be given to the students to help further identify the missing skills. The following page is a very important component in teaching with Go Math!. Developing Math Language is every bit as essential to student success as problem solving and computation. Here you will find the vocabulary for this chapter listed. These words and concepts can be used in word walls, math bulletin boards and even in math journals created by the students for future reference. And now we come to Introduce the Chapter. In this section you will find pages that are in the student text. This section will have a picture of a send home letter that can be found in the Standards Practice book. Show What You Know is a quick assessment tool to help the teacher determine if students need intensive or strategic intervention. Vocabulary Builder helps set the tone for the conversations that will follow. Earlier we looked at the Chapter at a Glance. Now we come to the Lesson at a Glance page. We should pay special attention to the Lesson Objective and the Essential Question as we plan our lessons. The red section at the bottom of the page, Mathematical Practices, will give quick explanations for the teacher that are pertinent to this lesson. This is where a Pod Cast icon will be placed if there is one available. The pod casts can be downloaded to your computer for easy viewing later without the need for an internet connection. There will be Daily Routine activities that support the skills taught and used in this lesson. On the facing page are resources for Differentiated Instruction Activities. These will help you meet the needs of the learners in your classroom at a variety of levels. And now we have come to the lesson pages. Here you will be prompted to review by using the Essential Question. Suggestions for supporting the student Math Journals are found here. At the bottom of the assessment pages you will find direction as to how to address the specific needs of each student. There will also be a description of common errors. This is a quick tool that can be used for helping our students master the standards being taught. The Summative Assessments have a form A and B. The answer key for Form A is found in the TE. TE is a very valuable tool. It does much more than simply show an example of the student text with answers. As you use it for planning and daily math classes remember that this is simply a tool used in the hands of a professional teacher. We were not called to teach math. We are commissioned to teach His children. With the touch of the Master Teacher our efforts can reach farther than we can begin to imagine.
