

1: Baby Girl in Garden from Warm and Cold (with David Mamet) – Current sales – www.enganchecub.com

"Golden Girl and the Guardians of the Gemstones" is a great book about the heroine Golden Girl and her quest to fulfill her destiny. The book is slender, but still manages to pack a good story into its pages.

Buy Yellow Agate Gemstone Agate is the name for banded chalcedony quartz that occurs in various different colors, including yellow. Many agate gemstones are sold using trade names, such as Dryhead agate, Plume agate and Laguna agate. Agate gemstones are often cut en cabochon to showcase their colors and waxy luster. Agate can also be found as beads, faceted gems, agate geodes, carvings, slices or tumbled stones. Agate geodes are fashioned into gemstones and slices, which have an interesting "raw" look. Some agate cabochons with uniform colors may be dyed. This is a stable and permanent enhancement that is always disclosed by good gem traders. It is also traded as "andesine", "Congo sunstone", "red feldspar" and "red labradorite". It is not strictly andesine, but is a color-enhanced variety of labradorite that is a mix of labradorite and andesine albite and anorthite. Andesine-labradorite gems range in color from light-yellow to deep red and are usually included. Yellow andesine-labradorite gemstones may be champagne colored, pink-yellow or golden yellow, and can have an attractive metallic schiller. Due to its various colors and forms, apatite is easily mistaken for several other gem types and thus earned its name from the Greek word meaning "to cheat". Apatite is the most important source for industrial grade phosphates and although it is the defining mineral for 5 on the Mohs scale of hardness, it remains a lesser-known gemstone that is rarely found in jewelry designs. This optical phenomenon is known as "chatoyancy" and occurs in few gemstone types. Chrysoberyl has excellent hardness; 8. Gemstone-quality chrysoberyl is found in Brazil, Myanmar, Sri Lanka and a few other locations around the world. It is a chatoyant variety of chrysoberyl which occurs in golden yellow, green-yellow, green and brownish hues. It is defined as yellow to golden orange macrocrystalline quartz. The name, "citrine" is from "citron", the French word for lemon, but the color of citrine tends toward honey yellow rather than lemon yellow. Citrine gemstones have a Mohs hardness of 7 and a vitreous luster, making them perfect for jewelry. Most commercially mined citrine comes from Brazil, though gemstone-quality citrine is also found in other areas of the world. Golden orange citrine is sometimes referred to as "Madeira citrine" because of its rich color that is comparable to Madeira wine. Reddish citrine gemstones may be heat treated, which is a stable and permanent enhancement that is openly disclosed by all good gemstone traders. Yellow Citrine Geode Buy Yellow Citrine Geode Gemstone Citrine geodes are vugs or rock cavities that contain yellow to golden orange citrine quartz crystals. The citrine crystals grow inside the cavities, creating interesting golden formations. Citrine geode gemstones are produced from pieces of citrine geodes. These gemstones may be slices of geodes or crystal clusters, and are admired for their natural, unfinished look. Whole citrine geodes can reach incredible sizes, especially those from Brazil. These are traded as "citrine geode cathedrals" and are often cut in half and displayed as ornaments by collectors. Yellow Demantoid Garnet Buy Yellow Demantoid Garnet Gemstone Demantoid garnet is a rare andradite garnet variety that is best-known for its green color, but demantoid can also occur in yellow and green-yellow. The properties of demantoid garnet that make it extremely valuable include its superlative dispersion the ability to split visible light into its spectral colors and an extremely high refractive index. These give demantoid garnet incredible fire and brilliance. Demantoid garnet gemstones are typically faceted and stones weighing over 2 carats are extremely rare. Demantoid garnet from Russia is the most sought-after, especially material with distinctive horsetail inclusions. Yellow diamonds are a fancy diamond color that are graded and valued according to their intensity of color. Intense yellow diamond gemstones reach high prices and are often traded as "canary diamond". The outstanding brilliance of diamond is best showcased by facet cuts, particularly brilliant cuts. The hardness, brilliance and adamantine luster of diamonds make them one of the most popular gemstone types, especially for engagement rings. Yellow Fire Opal Buy Yellow Fire Opal Gemstone Fire opal is a golden yellow to red variety of opal that is treasured for its intense and fiery body color rather than play of color. The most popular colors of fire opal are vivid orange to orange-red, but some prefer golden yellow colors. Fire opal gemstones are translucent to transparent, and may be faceted or cut en cabochon. The hardness of fire opal is the same as

that of precious opal; 5. Mexico is the main source for fire opal gemstones; therefore, fire opal gems are also referred to as "Mexican opal".

Yellow Fluorite Buy Yellow Fluorite Gemstone Fluorite is a colorful form of calcium fluoride that occurs in many different colors, including yellow. The optical phenomenon of fluorescence was named after fluorite, which is one of the best-known fluorescent minerals and one of the first studied. The first name for fluorite was "fluorspar", which now describes the industrial and chemical form of the mineral. The relatively low hardness of fluorite 4 on the Mohs scale makes fluorite gemstones more popular with collectors than jewelers.

Yellow Golden Beryl Buy Yellow Golden Beryl Gemstone Golden beryl is probably the least well-known of the beryl group of gemstones, which includes emerald, morganite and aquamarine. The light-yellow to golden honey-colored gemstone, golden beryl is also known as "precious beryl" and shares some of the properties of other beryl gemstones, including a Mohs hardness of 7. Golden beryl is the most affordable beryl gemstone and is more easily available than its more famous cousins. Light-colored golden beryl gemstones are sometimes called "heliodor", which comes from the Greek meaning "gift of the sun". This stunning gemstone goes by the name, "imperial topaz" because it used to be reserved exclusively for Russian tsars. Another name for imperial topaz gemstones is "precious topaz". While imperial topaz gemstones are found in Russia, most stones are commercially mined from Ouro Preto in Brazil.

Yellow Jasper Buy Yellow Jasper Gemstone Jasper is opaque chalcedony that gets its name from the Greek for "spotted stone" and is often given its own gem group because of its grainy structure. Jasper gemstones may be spotted, striped or various other patterns and many different colors, including yellow. The reason for such variation in jasper gemstones is that it contains up to twenty percent foreign materials, making each jasper stone unique. There are many trade names for jasper, including strongly yellow and red Egyptian jasper and "bumble bee jasper", which is yellow to orange material from Indonesia that is actually composed of volcanic lava and sediment.

Yellow Mali Garnet Buy Yellow Mali Garnet Gemstone Mali garnet is a fiery and brilliant "hybrid" garnet variety that was discovered in Mali, West Africa; the sole source for this new addition to the garnet gemstone group. Green is the most highly-valued color for Mali garnet gems, which also occur in greenish-yellow, golden yellow, orange and brown. Its high dispersion and refractive index give Mali garnet incredible brilliance and fire, which is brought out by facet cuts. Mali garnet gems are transparent to opaque with a good Mohs hardness level of 7. Non-gemmy orthoclase is used as a scouring agent in the making of some glasses and ceramics. Most orthoclase gems are champagne yellow, golden yellow or greenish, and opaque to transparent with a vitreous luster. The best orthoclase gemstones are eye-clean and transparent with a Mohs hardness of 6 to 6. Mining sources for orthoclase gems include Madagascar, Myanmar and Kenya.

Golden Pearl Buy Golden Pearl Gemstone Pearls belong to the small group of organic gemstones and are formed by shelled mollusks. Pearls are composed of nacre and are a very rare occurrence in nature; thus, pearls are often cultured. This is done by introducing an irritant to the mollusk shell to bring about the production of a pearl. Pearls occur in various colors, including white, cream, silver, green, pink and gold. Golden pearls may be cream-colored or yellowish and the most valued golden pearls exhibit iridescence, which is known as "orient" in the trade.

Yellow Lemon Quartz Buy Yellow Lemon Quartz Gemstone Lemon quartz gemstones are yellow quartz gemstones that are not quite golden enough to fit the description of citrine. Yellow lemon quartz gemstones are transparent and may be irradiated to obtain their intense color. This is a stable and permanent color enhancement that is disclosed by all good gemstone dealers.

Golden Rutile Quartz Buy Golden Rutile Quartz Gemstone Rutile quartz, also known as "rutilated quartz" is transparent quartz that contains inclusions made from rutile titanium dioxide, which may be sparse or dense and black, green, red or golden yellow. When the rutile inclusions are very dense, the body color of the gemstone can look like the color of the rutile, so rutile quartz stones with an abundance of golden rutile will look golden. Like most other quartz gems, rutile quartz is extremely versatile.

Yellow Sapphire Buy Yellow Sapphire Gemstone Yellow is not the best-known sapphire color, but has become popular since the trend for "canary diamond". Sapphire can be found in a wide range of fancy colors, such as green, pink, purple, peach and yellow. The definition of sapphire is gem-quality corundum that is all colors except for red red corundum is ruby and has excellent hardness and durability, which is surpassed only by that of diamond. Yellow sapphire gemstones are light-yellow to intense yellow and some stones may be heat-treated or beryllium-treated to enhance their color.

While these enhancements are permanent and stable, they should always be openly disclosed, since enhancements can cause prices to vary considerably, with untreated sapphires fetching high prices. The most important current sources for yellow sapphire include Tanzania and Madagascar. It is not a very well known gemstone; nevertheless, scapolite gemstones are attractive and occur in vivid yellow, orange, pink, brown, colorless and violet. Yellow Sillimanite Buy Yellow Sillimanite Gemstone Sillimanite is an aluminum silicate gemstone that shares the same composition as both andalusite and kyanite, but a different crystal structure, making the three gemstones polymorphs. Transparent sillimanite is rarely found, but is typically yellow or greenish. Rarer colors for sillimanite stones are light-blue and violet-brown. Sillimanite was first found in Connecticut, but is the official state mineral of Delaware Yellow Sphalerite Buy Yellow Sphalerite Gemstone Sphalerite is composed of zinc sulphide and occurs as yellow, orange, red, green and colorless gemstones. The incredible "fire" of sphalerite caused by its very high dispersion and its resinous to adamantine luster makes it a very attractive and brilliant gemstone. Due to its composition, sphalerite is sometimes traded as "zinc blende". Yellow Sphene Buy Yellow Sphene Gemstone Sphene is a calcium titanium silicate gemstone which is also known as "titanite" due to its titanium content. The incredibly high dispersion of sphene surpasses that of diamond, giving it remarkable fire and scintillation. The colors of sphene include yellow, brown, green and reddish and the strong pleochroism of sphene allows several of these colors to be seen in a single gemstone depending on the angle from which it is viewed. The hardness level of sphene gemstones 5 to 5. Yellow Spodumene Buy Yellow Spodumene Gemstone Spodumene is a pyroxene mineral that can occur in several colors and gets its name from a Greek word meaning "ash-colored" due to the ash-like colors of industrial-grade spodumene. Gemstone-quality spodumene is another matter and can occur in various colors, including attractive light- to golden yellow, pink to violet and green, with a Mohs hardness of 6. Pink to violet spodumene is known as "kunzite" and green spodumene is traded as "hiddenite". Yellow spodumene gemstones have not been lucky enough to acquire a more attractive name and are traded as "spodumene". Yellow lemon quartz gemstones may occur with asterism the star effect, when parallel-aligned chatoyant inclusions intersect to produce a six-rayed star that can be seen under focused light.

2: View from Federal Twist: The Garden at Paxson Hill Farm

After proving her prowess, Golden Girl becomes one of the guardians of Argonia and saves the kingdom from barbarians when she realizes the importance of the "ordinary" crystal she found in a desert cave before coming to Argonia. "synopsis" may belong to another edition of this title.

Click here to see our 1 pick Many seven year old girls are veritable balls of energy, and encouraging physical play is a wise idea. For the artistic child, consider a gift that goes beyond the simple art supply kit and engages her in a meaningful activity that also involves art and creativity. A girl entering or enjoying her seventh year of life presents an interesting challenge for the thoughtful gift giver: Only by carefully considering the individual youngster and by gauging her interests and preferences can you be assured of selecting the right gift. Fortunately, great gifts abound for all sorts of seven year old girls, whether she is already fascinated by the arts, still more interested in toys and trinkets, or if she is an active and energetic youngster who is always in motion. Many seven year old girls are veritable balls of energy, and encouraging physical play is a wise idea. From a game that encourages interaction with peers to a device like a bike, scooter, or pogo stick that encourages individual athletic activity, anything that a girl enjoys and that gets her outside and in motion is a great idea as a gift. This can include a DIY indoor garden kit complete with seeds to sow and planters to paint and decorate or a jewelry kit that allows youngsters to design and create their own fashion accessories. Children respond well when their efforts are "paid off" with a tangible end product, thus the appeal of these and other similar activities. If the seven year old girl on your gift buying list loves the color pink and all things fantasy, then go ahead and lavish royal gifts on her; a child should always be encouraged and supported in his or her interests. Beyond the simple lack of potential contributions this dearth of female participation represents, it also means endemic exclusion from high paying, rewarding, and potentially impactful careers. Any gift that encourages critical thinking and problem solving is a great choice for the inquisitive youngster. The sooner you can counter these unfair stereotypes, the better. By fostering an interest in math, science, and technology at a young age, you can empower a girl to reject any notion that STEM studies and careers are a male-oriented arena and help a girl gain interest in a field that can lead to great personal satisfaction as well as a successful career. If you can find a gift that encourages a girl to design and build a structure, you may well ignite the passion of a burgeoning young engineer. If you can select a gift that encourages the study of nature, you may inspire a lifelong interest that leads to a career in biology. If such a gift helps to unlock an interest in matters of science, tech, engineering, or math, so much the better. The Many Milestones Of The 7 Year Old Girl No two kids are the same, but when viewed as large enough population, you can identify various markers and milestones that most -- if not all -- seven year old girls will have in common. Knowing what to expect from a child at seven years of age can not only help guide your gift giving, but it can help you anticipate and react to her behavior. Look for gifts that foster communal play, whether the activity is artistic, a game, or a physical activity. One of the most notable attributes of a child at this age is her interest in spending more time with friends, thus any activity that can be shared among a pair or group of friends is likely to be enjoyed. A seven year old child is also likely to be developing basic mathematical skills and will likely want to use their new and growing abilities, which likely include competent addition and subtraction as well as basic geometry including the spatial comprehension of three dimensional objects. Thus toys or activities that involve building structures or basic machines are a great idea. And of course any interest in the arts or literature should be supported fully. A seven year old girl can likely read age appropriate books on her own. This activity should be encouraged, as should the chance for her to write her own stories.

3: Golden Slipper Gems - Enrichment for Older Adults

Online shopping from a great selection at Books Store.

Gemstones make the Guardians strong and skillful so they can defend their beloved Kingdom of Argonia from all enemies. Dragon Queen will stop at nothing until Argonia is hers. One of the ways they keep in shape is through a day of competition encompassing four athletic events. It is an important competition, but a friendly one, too. In the end, one Guardian will emerge as the most skillful of them all. Who will it be? The Characters[edit] The Guardians of the Gemstones[edit] Each member of the Guardians of the Gemstones was produced in 6" action figure form. Each action figure had 5 points of articulation, including neck, shoulders, and hips as well as bendable legs. All figures had rooted hair, female and male, and included a comb. Accessories for each figure included a fabric cape, diecast metal shield, belt, weapon and headpiece. Each diecast shield has a shiny gemstone embedded in it representing the Hero or Villain it belonged to and could also be worn by the toy owner as a brooch. Golden Girl - Princess of the Gemstone Guardians. A gentle leader, Golden Girl, along with her able Guardians, faces constant conflict with the defeated and evil Dragon Queen. Even with the amazing power from her Gemstone shield and the magical help from her magnificent steed, Olympia, she is always on guard against attack. Will she always be able to protect the good people of Argonia and the precious powerful Gemstone? Her cape is gold and white and her boots and wrist gauntlets are gold. Golden Girl did not wear as much makeup as the other characters, her earrings were gold and her lipstick was pink. Golden Girl had golden blonde hair and a gold crown. Golden Girl had a production variation in her cape: Sapphire - Poweress of the Sea and Sky. The lovely warrior whose home is with the Sea Folk of the Cluster Isles. Sapphire has the amazing ability to communicate with the creatures of the sea and the sky. And from them she receives a special strength to help win against the Evil Forces of the Dragon Queen". Sapphire wore a blue one-shouldered bodice with golden accents. Her cape is blue and gold, and her boots and wrist gauntlets are dark blue with gold accents. She had light blonde hair and a gold headband. Sapphire had a few production variations in both hair and make up: Rubee - Fiery Champion on the Lightning Bow. A red-headed expert archeress from the Fire Isle. Her weapons are a silver bow and flare-tipped arrows. Onyx - Challenger of the Saberred Sword. From the Isle of Dunes. Her weapons are throwing stones that possess amazing accuracy and return to her hand after being throw and a saber with a serrated edge. Jade - Mystic of the Secret Jewels. From the Ermaline Island. She uses a broadsword and possesses mystical insights. Occasionally joining the Guardians is Prince Kroma, whose nemesis is Ogra. She uses dark magic and carries a samurai sword. She rides a black horse called Shadow. Vultura - Practices witchcraft and is armed with long, sharp claws. Moth Lady - Born from a cocoon, she now has wings and carries a trident. Wild One - Armed with knowledge of the wild, she carries a battle-axe Ogra - Leader of another group known as the Barbarian Forces, Ogra occasionally joins Dragon Queen in fighting the Guardians. Concept drawings of additional action figures, playsets and accessories exist. The Guardians of the Gemstones[edit] A very small quantity of the Dymondia figure was released in Europe. The figure appears to be a repaint of the Rubee figure rather than including any unique molding, which seems to indicate the Dymondia figures may have been prototypes that Galoob was using to sell Series 2 to retailers. The Dymondia figure was in a new blue Series 2 box as opposed to the pink Series 1 box design. None of the other Series 2 Guardians of the Gemstones characters are known to have been produced. She wore a golden headband with a diamond at the center near her forehead. Her weapon was a white and gold staff, topped by a diamond. Her crown and wrist gauntlets were golden, and her crown had a golden netting that cascaded over her hair. She carried a white shield with red embellishments and a white and gold trident. She wore a blue cape and her white boots have a tasseled fringe. Turquoise had black hair and wears a white crown with a flower design on it, as well as white hair ties on her pigtails. She carries a white shield with a blue gemstone and a white staff. She wore a dark pink skirt and sash over her bodice, along with a short cape that was dark pink and white. Pearl had blonde hair and wore a white butterfly shaped crown. Pearl carried a white shield and a white staff, both with gold embellishments. Spidra - Spidra had a webbed design on her green bodice, gauntlets and boots. Her eye makeup was green and white and she

looked to have makeup or a tattoo on the right side of her face that spanned from her forehead down to her jawline. Spidra had fiery red hair and wore a green jeweled crown in the shape of a spiderweb. Her shield was green, with a red gemstone and she carried a sword. Centaura - Centaura was a red centaur with black hair and a beard. His lower body was that of a horse, with a spiked tail and spiked hooves. He was to wear a black chestplate with silver markings. Centaura wore gauntlets, carried a shield and a black double-edged spear.

4: View from Federal Twist: Garden Diary: Testing Fence Colors for the Brooklyn Garden

Sisters, Amanda Helman and Susan Logsdon, are the co-founders of Golden Gems, a cheeky home goods and gifts brand located in St. Louis, MO. The sisters grew up on Golden Gem Road in Apopka, Florida among the orange groves.

Stan and Dorothy eventually moved to Miami, but divorced after 38 years when Stan left her for a young flight attendant. The marriage produced two children, Kate, in her early 20s, and Michael, who was inconsistently aged between his mids and late 30s Michael was purportedly the cause of the shotgun wedding. Often slightly naive and known for her humorously peculiar stories of life growing up in her hometown, Rose was happily married to Charlie Nylund, with whom she had five children; three daughters: Kiersten, Bridgette, and Janella; and two sons: Adam and Charlie, Jr. She eventually finds work at a grief counselling center, but later switches careers and becomes assistant to consumer reporter Enrique Mas at a local TV station. In later seasons, Rose became romantically involved with college professor Miles Webber. During season six, Webber was placed into the Witness Protection Program , but returned later in the season. Their relationship continued throughout the series and shortly into the sequel series, The Golden Palace. In season one, Rose is stated to be Their marriage produced six children; two daughters: Janet and Rebecca; and four sons: Doug, Biff, Skippy, and Matthew. A widow, Blanche was portrayed as man-hungry and clearly had the most male admirers and stories detailing various sexual encounters over the course of the series. She married Salvadore "Sal" Petrillo, with whom she had three children: Initially a resident of the Shady Pines retirement home after having a stroke prior to the start of the series, she moved in with Blanche, Rose, and Dorothy following a fire at the institution. Throughout the series, she held a few part-time jobs, mostly involving food, including as a fast-food worker and an entrepreneur of spaghetti sauce and homemade sandwiches. Stanley worked as an unsuccessful novelty salesman until he became a successful entrepreneur by inventing a baked potato opener that made him wealthy. Miles is later placed in the witness protection programme. He also appears as Don the Fool, a waiter at a medieval restaurant in season six. Initially an overweight former model in an emotionally abusive relationship, she later slimmed down and had a baby girl named Aurora by artificial insemination. Walker starred in two episodes in season 2. Lynn Greene credited as Lynn Greene, 4 episodes as a younger Dorothy in flashbacks. Creation[edit] "I was running all over the house grabbing anybody who would listen. There are no tricks. Studios in Burbank, California , in August Though Littlefield nixed their idea, he asked if they would be interested in delivering a pilot script for Miami Nice instead. Their regular writer declined, so Witt asked his wife, Susan Harris , [12] who had been planning to retire after the conclusion of their ABC series Soap. After the pilot, the character of Coco was eliminated from the series. Estelle Getty auditioned and won the role of the feisty mother of character Dorothy Zbornak. This was due, in part, to the rave reviews she garnered in her Off-Broadway role reprisal for the Los Angeles run of Torch Song Trilogy. Afterwards, Getty had returned to New York but gained permission from her manager to return to California in early Getty figured it would be her last chance to find television or film work. She would return home to New York if she was unsuccessful. And that was, to me, what made it seem like it could be a contemporary, young show. During an interview in , Getty commented on her phobia and expressed how working with major stars, such as Arthur and White, made her even more nervous. At times, she even froze on camera while filming. Eager not to be typecast , they took the suggestion of Sandrich and switched roles last-minute. She thought an accentuated Southern accent She wanted to be a southern heroine, like Vivien Leigh. Bea Arthur and Betty White worked well together in shared mutual respect but they did not pursue a personal friendship with one another outside of The Golden Girls set. However, both were close to Rue McClanahan off camera. Arthur and White were consummate professionals and thoroughly enjoyed their experiences on the show despite having only a work relationship with one another. Betty White has always expressed nothing but love and admiration for Bea Arthur. As head writers, Speer and Grossman, along with Mort Nathan and Barry Fanaro, who won an Emmy Award for Outstanding Writing the first season, gave general ideas to lower staff writers, and personally wrote a handful of scripts each season. Richard Vaczy and Tracy Gamble, previously writers on and My Two Dads , also assumed the roles of producers and head writers. Beginning in , Marc Cherry

served as writer and producer, years before creating *Desperate Housewives*, which ran on ABC from 2004 to 2009. Hurwitz later created *Arrested Development* for Fox and later for Netflix. Cherry commented on read-throughs of the scripts that "generally, if the joke was a good one, the women found a way to make it work the very first time they read it. But the women were so uniformly brilliant at nailing it the first time. Beginning in Season 5, she would have to read her lines off cue cards held off-camera or from props. She would start getting under a dark cloud the day before tape day. You could see a big difference in her that day. By tape day, she was unreachable. She was just as uptight as a human being could get. Part 2" to test her chemistry with the other actresses as a possible replacement for Arthur, but it was decided that nobody could replicate the chemistry of the four original actresses. In any event, Arthur chose to commit to a seventh and final season. A hurricane that damaged the sets earlier also contributed to this decision. Saltair Avenue in Brentwood, California. This residence was used for outside shots during the first two seasons. However, the exterior backdrop seen through the kitchen window changed from the view of Chicago high-rises to palm trees and bushes for the Miami setting. Format[edit] *The Golden Girls* was shot on videotape in front of a live studio audience. For example, one or more of the women would become involved in some sort of problem, often involving other family members, men, or an ethical dilemma. At some point, they would gather around the kitchen table and discuss the problem, sometimes late at night and often while eating cheesecake or some other dessert. Some episodes featured flashbacks to previous episodes, flashbacks to events not shown in previous episodes, or to events that occurred before the series began. One of the actresses on the show, Bea Arthur, actually hated cheesecake. The show immediately received a full order of 12 episodes. All the lead actresses won Emmy Awards for their performances on the show. *The Golden Girls* is one of three shows, along with *All in the Family* and *Will and Grace* where all the principal actors have won at least one Emmy Award. It ran for a little over a year until September 1992. In March 1993, the Lifetime cable network acquired the exclusive rights to repeat the episodes of *The Golden Girls* in the US for over a decade, until March 1, 2003. Many episodes were edited to allow more commercials and for content. On November 9, 1993, the studio released a complete series box set titled *The Golden Girls: Nurses* was later spun off from *Empty Nest*, and the shows occasionally had special episodes in which characters from one show made appearances in the others. Reportedly, a second season was approved before being canceled the day before the network announced its schedule. Lifetime, which held the rights to *The Golden Girls* at the time, aired reruns of *The Golden Palace* in the summer of 1993, and again in December of that year. This was the first time since that *The Golden Palace* was seen on American television. Until April 1994, Lifetime played the series as a virtual season eight, airing the series in between the conclusion of the final season and the syndicated roll-over to season one.
