Read more about sharing. Lewis Hamilton extended his championship lead to 59 points Lewis Hamilton took a giant stride towards his fourth world title with victory in the Japanese Grand Prix as rival Sebastian Vettel retired early on. It continues a remarkable swing in the championship towards Hamilton and away from Vettel. If you like it put a ring on it: Hamilton is on the verge of an historic fourth world title, which would make him the most successful British F1 driver ever Hamilton has found another level. A start-line crash in Singapore has been followed by engine problems at consecutive races in Malaysia and Japan. In Malaysia, year-old Vettel started at the back after a manifold failure in qualifying and finished fourth as Hamilton took second. This Sunday, Ferrari said it was a spark plug problem. He started the race but immediately started losing places and complained of lacking power. The Dutchman kept the pressure on Hamilton throughout the one-stop race and the gap was rarely more than three seconds. But the Briton was able to hold him off as they negotiated backmarkers. My team have done a great job. They are so meticulous and that is why we have the reliability we are having. The Spaniard recovered well from the back of the grid following an engine penalty. Jolyon Palmer finished 12th in his final race for the Renault team - he will be replaced by Sainz from the next race and the Briton may well have driven his final grand prix. Driver of the day Verstappen takes it for a brilliant start and first lap and keeping the pressure on Hamilton throughout - a shame that the Massa-Alonso battle prevented what could have been a tasty scrap for the win in the last two laps. Japanese F1 fans are some of the most dedicated, and unquestionably the most creative in the world What they said Race winner Lewis Hamilton: I am grateful for that. The track was fantastic. Max Verstappen had an outstanding race. I really love the track. We had great pace - just really hard to pass. I tried my all.

2: Russian Grand Prix | PeopleNet TV

It's usually only a few people who are in the spotlight all the time, but there are many, many hidden heroes in our team - thank you all! We kept everything together even under immense pressure, minimised our mistakes and did a great job developing the car - huge congratulations to everyone.

In Italo Balbo you had all three. After serving in World War I he got himself involved with the local Fascists. It may well have been his sense of patriotism that misled him but the dashing young man became one of their young leaders. He was involved in many bloody attacks against their opponents. By far the bravest of this motley group he came to the attention of the Fascist leadership including Mussolini. When Mussolini came to power Balbo quickly moved up the ladder becoming General and later Marshall. Balbo would have been just another Fascist thug if not for his other great passion, flying. Despite the loss of a plane and a crewman in Amsterdam, 24 aircraft landed safely on Lake Michigan, having flown 6, miles in just under 49 hours flying time. Exiled to Libya he assumed the role of Roman pro-consul; the greatness of the empire depended on the prestige the Consul could command. He held lavish receptions replete with African Guards in flowing costumes with drawn swords. The receptions were open to the diplomatic corps of North Africa and international high society. He preferred to mix with the creme of Britain and France over that of Germany. A perfect vehicle for him, in fact his world stage was the Grand Prix of Tripoli. He loved cars and would often cajole the teams to let him try their cars out on the circuit. The effect was enormous, the race was converted from a backwater event to the top of the Grand Prix calendar. It became known as the race of millions, it also saw it involved in a scandal that rocked the sport when Varzi won the first race during the lottery under dubious circumstances over Nuvolari. The following year Balbo created new rules to prevent any chance of further cheating. Reality was to intrude on this idyllic setting when Italy entered the war on the side of Germany. Balbo had been against the war from the start. Or is it possible that this was deliberate as Mussolini considered him to be his only serious contender in the fascist "government".

Elly Beinhorn was born in Hanover in An only child, she grew up dreaming of travel and adventure in foreign lands. Struck by the lure of flying to distant places she sought to enroll in a flying school. Since none was available in Hanover she travel to Berlin. Both parents were against their young daughter flying so she rented a small room in Spandau and learned to fly at the Berlin-Staaken airfield. Since there were few jobs available for a female pilot she earned a living flying aerobatics but her heart was still in long-distance flying. Her first opportunity to take a longer flight was when her former instructor asked her to fly to Rome and deliver some clothes to a wealthy relative of a flying club member. Dutifully she took off and headed towards Rome guided only by a compass. Unfortunately her first major trip resulted in her getting lost and having to land the plane, finally arriving at her destination aboard a commercial flight 24 hours too late. From this humble beginning her next trip was to Africa with a group of anthropologists. For the rest of her life she would have a special affection for Africa. Later flights would take her to the Americas and Asia. Elly Beinhorn was already a well known woman aviator when she first met her future husband, Bernd Rosemeyer in Since she had flown all over the world and in order to finance her trips she gave lectures. This occasion was a lecture to the local Flying Club in Brno, Czechoslovakia. Luckily he was able to manage to return to the pits where he was attended to. The eventual winner was a new rookie driver by the name of Bernd Rosemeyer. One year later on July 13th they were married. To the Nazis they were the perfect Aryan couple and in fact unlike the other drives Rosemeyer was asked to join the SS. Theirs seemed the perfect marriage and the couple became the toast of Berlin. Tragically it was to end not quite three years later with the death of Rosemeyer while on a record attempt. He and his wife Alice, whom everyone called Baby were keen racing enthusiasts. To promote his Nerka spark plugs he established a team of Bugattis whose principle driver was Louis Chiron, a young and upcoming driver from Monaco. Things went well for the small team and Chiron began to make a name for himself. Alice Hoffman traveled to the races as a timekeeper for Chiron but soon became more than that. At the end of the marriage was finished and the former Mrs. Hoffman and Louis Chiron became quite a pair. Another young driver with a beautiful companion, in this case his wife, were Rudolf Caracciola and Charly. This occurred

while Caracciola was recovering from a terrible accident at Monaco. Thrown into a deep depression, unwilling to see any one, his friends became very concerned for his mental welfare. Baby had discussed marriage with Chiron on numerous occasions but he was never able to make that commitment. It might not be idle speculation that given the fact that he had stolen her from another man, made him worry that the same fate awaited him. It did, when Caracciola asked Baby to marry him. Torn between the two drivers she gave Chiron one last chance. Chiron was furious that his friend would steel "his" woman and it was only much later that his resentment began to mellow. Caracciola had a house built near Lugano overlooking the lake called Casa Scania and it was there that they would live out the rest of their lives. Initially he managed the Research and Development department and was involved heavily in the initial testing of each new race car. Professor Eberan-Eberhorst helped develop a special on-board recording instrument that plotted various parameters such as car speed, engine speed, shifting and breaking points. These techniques were not used again until the sixties by Chaparral and Ford. Eberan - Eberhorst was now in charge. Photographs showed what appeared to be dents in the aluminum body with the speculation was that damaged body panels became dislodged and caused the crash. Professor Eberan-Eberhorst had another car built to the exact same specification and allowed to be photographed by the press. This proved that the so called dents were actually reflections in the aluminum. The next step was to improve the driver line-up and this was accomplished when Nuvolari was finally brought onto the team and with him driving they were able to score some late season victories. Professor Eberan-Eberhorst was duly proud of the effort made by Auto Union which in comparison to Mercedes had only half the budget of its larger rival. Hitler was born in Braunau am Inn, Austria, the son of a minor customs official. He was a poor moody student who was not popular at school. College was out of the question, but an enjoyment of drawing led him to apply for admission to the Academy of Fine Arts in Vienna but was rejected for lack of talent. Staying in Vienna until , he lived in relative poverty on small earnings from pictures that he drew. Slowly a burning hatred was developing against everything and everyone that he felt conspired against him The top of his list for reasons not quite clear were Jews. He developed a hero complex, seeing himself as the man to lead the German masses. He proved a dedicated, courageous soldier, but was never promoted beyond private first class because his superiors thought him lacking in leadership qualities. In November , a time of political and economic chaos, he led an uprising Putsch in Munich against the postwar Weimar Republic, proclaiming himself chancellor of a new authoritarian regime. Without military support, however, the Putsch collapsed he ended up in jail. After becoming Chancellor he later took the title of President upon the death of Hindenberg. The act effectively made the legislature powerless. Hitler used the act to Nazify the bureaucracy and the judiciary, replace all labor unions with one Nazi-controlled German Labor Front, and ban all political parties except his own. Thousands of anti-Nazis were taken to concentration camps and all signs of dissent suppressed. With this as a background the next task for Hitler was to project German might first peacefully and then when ready, militarily. Sports was one area to be exploited and as a self professed motoring enthusiast racing seemed a natural showcase for avowed German superiority. Two German manufacturers, one the inventor of the modern automobile, the other a brand new consortium had independently decided to go racing based on the formula. The Nazi government, Hitler decided, would sponsor their efforts. Nazi involvement in Grand Prix racing should not diminish the accomplishments of the many talented people as well as drivers that created and drove the Silver Arrows. A humorless man, he was a career soldier who had fought in the first World War. He had new bosses now, the Nazis, and he soon fell into stride. In fact it was said that he made the perfect Nazi lackey. His job appeared to be a dream job for him, that while he had no mechanical qualifications he did have a real love for racing. He appeared at almost all of the events and it was rare not to see him at full Nazi regalia flitting about with political advise as to who should win or the manner in which the German teams presented themselves. Both teams tried their best to ignore him. Alfred Neubauer was born in and fell in love with automobiles when at the age of seven he saw his first car, a Benz drive through his village, Neutitschein in North Moravia. Even as a small boy he would claim that "petrol already ran in his blood. At Mercedes he found his home and would work there for the rest of his life. He was a company man who would stay loyal through thick and thin. It soon became apparent to Neubauer as it had been to his wife earlier that he was not destined to become a great race car driver. In fact his wife

remarked that he drove like a night watchman! Caracciola driving under the most appalling conditions was not aware that he had actually won the race. With his flags and hand signals Neubauer pioneered many of the techniques that are take for granted today and in so doing this legendary Team Manager left a lasting legacy in automobile racing. Ilse Pietsch was already a divorcee when she married a 22 year old driver named Paul Pietsch destined to be a driver for Auto Union. Their marriage soon soured when reports of her affair with Auto Union teammate Achille Varzi became common knowledge.

The guys have been continuing to raise the bar. Today was such a tough race for me, but I really wanted to deliver and win this for the team. We struggled with the tyres in the first stint and they were able to manage the tyres better than us. In the second stint, I was on the Medium tyre and had an issue with the engine, so I was really just trying to bring the car across the line. Max passed me which was painful, but then they had an issue and all of a sudden I was back in the lead. This is a high, but I want to stay on that wave and win the next race as well. This is down to hard work by every single team member, both back at the factories in Brackley and Brixworth as well as here at the race track – they really deserve this title! We kept everything together even under immense pressure, minimised our mistakes and did a great job developing the car – huge congratulations to everyone. The race today was a bit tricky; everything went as planned at the start and we could gain the lead at the beginning, but after that it got more difficult. In the first stint, I was struggling with overheating the tyres, in the second stint, I was struggling with blistering on the Mediums, so we had to stop a second time. It was a slightly tougher race than I expected, I was a bit more optimistic before the race, but overall it is a great day for Mercedes. Toto Wolff We just wrote Championship history – but winning the fifth double World Championship feels so surreal. Who would have thought this would be possible when we embarked on this mission eight years ago? If anyone had mentioned this record back then, we would have told them they are crazy. And yet, here we are today, having just equalled the Ferrari record from the Schumacher years. None of this would have been possible without their contributions and without the hard work and the passion of everyone on the team. I had a conversation with Lewis on Sunday night in Mexico; he had just won his fifth world championship, but both of us were not fully satisfied – because our objective was to win both titles. Valtteri had a trickier season than Lewis, but he has improved his performance this year and played a vital role for this championship success. James Allison This is an amazing, amazing group of people built up over many years. The skill and the dedication in a sport that is famously complicated – to get all those ducks lined up in a row, not just once or twice but season after season – is just incredible. What was difficult about this season is that the opposition were that quick. We came to the races not knowing if we were going to win, not having any idea whether they were going to smash us. It ebbed and flowed all through the year. The fact that this year has been so desperately close shows that the difference between the teams is utterly tiny – and it was Lewis who made the difference for us this year. Valtteri had a lot of bad luck at the start of the year when he might have had some race wins and has not had the same success that Lewis has had. 4: History of Formula 1 - The People

We are excited to bring to you our annual People's Grand Prix! We're inviting everyone to come along and run, walk, push or wheel their way around our 3km track.

The rally could not be considered as it mostly used the roads of other European countries. The leading Maserati and Alfa Romeo drivers decided not to compete, but Bugatti was well represented. Mercedes sent their leading driver, Rudolf Caracciola. Chiron was unable to compete, having a prior commitment to compete in the Indianapolis on the same day. Chiron took victory in the race driving a Bugatti. As of [update], he remains the only native of Monaco to have won the event. The race provided future five-time world champion Juan Manuel Fangio with his first win in a World Championship race, as well as third place for the year-old Louis Chiron, his best result in the World Championship era. However, there was no race in . It was not until , when Fangio won again, that the Grand Prix saw a double winner. He first won in , and then won the next two years. Re-joining in fifth place, Hill set several new lap records on the way to winning. The circuit gained more Armco in specific points for the next two races, and by , the circuit was almost completely Armco-lined. For the first time in its history, the Monaco circuit was altered in as the pits were moved next to the waterfront straight between the chicane and Tabac and the chicane was moved further forward right before Tabac becoming the junction point between the pits and the course. The course was changed again for the race. The Rainier III Nautical Stadium was constructed where the straight that went behind the pits was and the circuit introduced a double chicane that went around the new swimming pool this chicane complex is known today as "Swimming Pool". This created space for a whole new pit facility and in the course was altered yet again; the Sainte Devote corner was made slower and a chicane was placed right before the pit straight. Historically the number of cars permitted in a race was decided by the race organiser, in this case the ACM, which had always set a low number of around . In Ecclestone started to negotiate deals which relied on FOCA guaranteeing at least 18 entrants for every race. Two years later, in , the ACM got the numbers back down to . Alain Prost then led until four laps from the end, when he spun off on the wet track, hit the barriers and lost a wheel, giving Riccardo Patrese the lead. Patrese himself spun with only a lap and a half to go, letting Didier Pironi through to the front, followed by Andrea de Cesaris. On the last lap, Pironi ran out of fuel in the tunnel, but De Cesaris also ran out of fuel before he could overtake. In the meantime, Patrese had bump-started his car and went through to score his first Grand Prix win. This broke an agreement enforced by FISA for a single central negotiation of television rights. The ACM fought their case in the French courts. They won the case and the race was eventually reinstated. Prost, already a winner of the support race for Formula Three cars in , took his first Monaco win at the race. Prost led briefly before Nigel Mansell overtook him on lap . Mansell crashed out five laps later, letting Prost back into the lead. Senna was catching Prost and Bellof was catching both of them in the only naturally aspirated car in the race. However, on lap 31, the race was controversially stopped with conditions deemed to be undriveable. The French Prost dominated after starting from pole position, a race where the Nouvelle Chicane had been changed on the grounds of safety. His win was the first time a car with an active suspension had won a Grand Prix. His win was very popular with the people of Monaco, and when he was arrested on the Monday following the race, for riding a motorcycle without wearing a helmet, he was released by the officers after they realised who he was. Senna was so upset that he went back to his Monaco flat and was not heard from until the evening [38]. Prost went on to win for the fourth time. Senna dominated while Prost was stuck behind backmarker Rene Arnoux and others; the Brazilian also dominated and . At the event Nigel Mansell, who had won all five races held to that point in the season, took pole and dominated the race in his Williams FW14 B- Renault. The pair duelled around Monaco for the final four laps but Mansell could find no way past, finishing just two-tenths of a second behind the Brazilian. Senna had a poor start to the event , crashing in practice and qualifying 3rd behind pole-sitter Prost and the rising German star Michael Schumacher. Runner-up Damon Hill commented, "If my father was around now, he would be the first to congratulate Ayrton. It came two weeks after the race at Imola in which Austrian Roland Ratzenberger and Ayrton Senna both died from massive head injuries from on-track accidents on successive days. During the

Monaco event, Austrian Karl Wendlinger had an accident in his Sauber in the tunnel; he went into a coma and was to miss the rest of the season. The German Michael Schumacher won the Monaco event. Olivier Panis , who started in 14th place, moved into the lead and stayed there until the end of the race, being pushed all the way by David Coulthard. Only three cars crossed the finish line, but seven were classified. In his appearance at the event , he attracted criticism when, while provisionally holding pole position and with the qualifying session drawing to a close, he stopped his car at the Rascasse hairpin, blocking the track and obliging competitors to slow down.

I remember, we have crossed this situation and discussion before. I would never wish it upon anyone else and would never ask for it, ever. Obviously, the team took the decision when they saw that my tyres were blistered and Vettel was charging from behind. So many people are working flat-out to make sure we have a like this, the team have just done an incredible job this weekend. We got a good result for us as a team with maximum points, but for me personally it was a difficult race. Although I already understand the situation. It is not ideal for me as an athlete and a person, but that is a fact. We are playing as a team and I am prepared to play as a team. I took one for the team today, I will take one for the team tomorrow. I know myself I am the winner of this weekend. Toto Wolff We are all racers at heart and what we want to see is out and out racing and may the quickest man win. But then we are a bunch of rational guys – we discuss things in the morning and then everything is different in the race. This is what happened today. We should be over the moon with a and fundamentally we are. We discussed who to pit first and then we did it with Valtteri because that would protect his win. It was one lap too late with Lewis and he lost the position to Sebastian. This triggered this mess because Lewis came out behind Sebastian and then needed to attack. That caused the blister and we needed to protect when Sebastian was all over Lewis on damaged tyres. Lewis was far back, but when we told Valtteri to switch position at Turn 13, he did it immediately. This is who you want to have within the team because you need to rely on these guys in the same way they rely on us. This is what makes it feel even worse. But there is a harsh reality also that on such a day you can extend the lead by several points more in a Championship that has been very tough and very difficult at times. Sometimes you have to take it and this is what we did today. We finished , we have a 50 point advantage and that feels good on a day that has otherwise been very difficult. The pace of the Ferrari put us under pressure all the way through the first stint and we rather fumbled things as a consequence, allowing us to lose the place to Sebastian at the first stop. Lewis spared our blushes with a beautiful overtaking move and put thing back on an even keel for us. But a little later in the race we got into a degree of difficulty once again when Lewis followed Valtteri quite closely from behind, damaging his rear tyres. At that point we were fearful of losing a position to a hard-charging Vettel. With Valtteri in front and on rubber that was working well, we took the very difficult decision to allow Lewis to go in front and have a car with good rubber protecting the that would come our way if we would just look after the tyres to the finish. He took this disappointment like a Trojan, but I could see standing next to him on the podium looking into his eyes that it was hurting him. Lewis Hamilton Liability for this article lies with the author, who also holds the copyright.

6: Grand Prix Pro Multiplication - Free Online Math Game | www.enganchecubano.com

Math Speedway Challenge - Multiplication is a free online racing game where you race against your friends or others from around the world! Choose your favorite car and practice the multiplication facts while racing against others or the computer.

After the game loads, click on the "GO" button. Step 2 This screen allows you to choose the color of car you would like to race. Click on the green forward and back arrows to look through the different cars. When you have the car you like, click on the "DONE" button at the bottom of the screen. This will display the current status of your connection to the game server. You must be able to connect to the game server in order to play the game. If you have trouble connecting, make sure your network administrator can verify that ports or are not restricted. It also allows you to play private games where you race against your friends or classmates. Choose a public or private game by selecting the appropriate tab at the top of the dialog box. Each game allows 4 players and when many people are playing, the games disappear quickly. You also have the option of creating your own game. To join a private game, you will need to know the password. When you create a private game, you will be asked to enter a password. Step 6 If you created your own game, you also get to select the race track. Choose your track by clicking on one of them. Step 8 When you start, you will see the equations at the bottom center of the screen. Click on the correct answer as quickly as you can! If you get the answer correct, your car will speed up and the answer will glow green. If you get the answer wrong, the car will send out a puff of smoke and slow down! The answer will glow red. The position of other racers on the track will be displayed on the track radar on the left of the screen. To toggle the sound on and off, click on the speaker icon in the top right corner. Step 9 Answer the multiplication problems as quickly and accurately as you can to cross the finish line first!

7: Vandoorne: People hadn't noticed my 'really good' recent F1 races - F1 - Autosport

McLaren's Stoffel Vandoorne believes he has driven "really good races" before his eighth-place finish in Formula 1's Mexican Grand Prix, but they went unnoticed because he had not scored points.

8: The Official Grand Prix of Long Beach - Buy Tickets Now!

Formula 1 and the City of Hanoi today announce that a Grand Prix will be held in the Vietnamese capital from April As the first new race to be announced under Liberty Media's ownership, the Vietnamese Grand Prix represents Formula 1's firm commitment to the Asia region where races are.

9: The People's Grand Prix - Jessie May

Formula 1 has officially announced that a Vietnam Grand Prix will join the calendar in Autosport reported last month that a deal for F1 to race at a new street-based circuit near Hanoi had.
