During the day they evaporate and fill the surrounding air with odor to warn predators. By the end of the day, at dusk, terpene and cannabinoid levels are at their lowest. Most of the aromas that we associate with plants are the result of terpenes and flavonoids. Humans can smell and taste these compounds, but that is not the only way they affect us. You recognize the presence of terpenes when you pinch that bud and take a whiff. Grapefruit, Silver Haze, Blueberry, Real Skunkâ€”each of these odors brings a recognition of the type of high that the sample will explode into your brain. Plants produce terpenes for one of three reasons: Rick James for updates and more info cannabinoids tors that absorb them are not there just for humans to be able to get high. The cannabinoid system appears to be primordial, since it exists in nearly all species of anifor updates and more info mals so info far investigated, even very for updates andsimple more info or updates and more ones like microscopic hydra. The most likely reason that marijuana evolved to make cannabinoids like THC was to deter animals that would eat the plant perhaps by preventing frominfo for updatethem and more for updates and more info or updates and more info remembering where they found it.
