Everything about this particular performance is good. From the catchy intro riffs to that pounding bassline, to the screaming courtesy of Axl. Way to kick things off! Brownstone- A tad longer than the recording, mostly for the extended intro with the drums. As soon as the drums kick in, you can feel the buildup into that awesome rock riff. The choruses are good, and the overall groove is present throughout the entire song. Slash nails his solo with aplomb, taking names with his Les Paul. Overall one of the better tracks here. The piano is excellent, and so is the orchestra, with the cellos and violins giving an exceptional contrast to the guitar melodies. The song is absolutely beautiful. The guitar solos are wonderful, as Slash pours his heart into his playing, especially on the softer songs here. The bass line stands out on this song a bit, especially during the piano parts. After the riff comes in, Axl comes in with an atrocious vocal performance. Musically, nothing has changed from the recording, with the same riffs, and solo. Nothing spectacular, or different for that matter. From the second he says the name of the song, the audience starts singing along word for word. After the actual song comes to a halt, the band feels the need to give an incredibly repetitive instrumental that drags on for a good two minutes. The drums play some cool fills, which is the most redeeming part of the song. With a few exceptional performances and some annoying vocals on some songs, and others where the audience preaches suicide. With the combination of the good, bad, and the ugly patience Disc 1 gets a [3. It starts off with Duff talking and before you know it, the drums kick in to start the groove. Duff plays that awesome funky line that sounds as if he almost slapped it. Slash joins and Axl comes in with some good vocal performance. The choruses are quite strong. One of the best songs on the CD. From that intro salvo to the pretty, subtle verses. This Bob Dylan cover is amazing live, with the guitar solos being exceptionally beautiful, particularly the latter of the two. The plus is that there is no annoying phone call in the interlude. The crowd responds quite well. Another cool part is where the band just breaks into a reggae groove jam, with tropical guitar lines and some bottom-heavy bass. The opening is kinda creepy as the audience cheers when Axl mentions suicide. But the song kicks in and the awesomeness starts. Unlike the recording, where the opening whispers are really depressing, in this he actually has some slightly melodic attributes, with his voice ringing with emotion. The guitar melodies kick arse with a bluesy feel to them. The piano solo is pretty, using dynamics tastefully, as it skips from mellow to dramatic several times, before a powerful verse comes in and before you know it, a series of guitar solos kick into gear and drive the song to new heights. The solos are breathtaking. Both have a unique, distinct sound that border between soulful, blues, and hard rock. Disc 2 Low Points: Unfortunately, a number of flaws takes the happiness back. The music is perfect, note for note, but the feel is kinda taken away by the upbeat tempo change. It goes from Moderato to Allegro. The upbeat change is unnecessary. The solo is top-notch, but afterwards, they hold the final note a disastrous length that just ruins the song. Great music, with a horrible vocal performance. Axl seems to be rushing, out of breath, and barely keeping up with the music. It gets quite annoying. Much better than Disc 1. The little additions to the songs are for the most part, cool, with a few exceptions here and there.

While Slash and Izzy Stradlin ferociously spit out dueling guitar riffs worthy of Aerosmith or the Stones, Axl Rose screeched out his tales of sex, drugs, and apathy in the big city. Meanwhile, bassist Duff McKagan and drummer Steven Adler were a limber rhythm section who kept the music loose and powerful. There was something refreshing about a band that could provoke everything from devotion to hatred, especially since both sides were equally right. Their debut single, "Welcome to the Jungle," was re-released and shot into the Top Ten, and "Paradise City" followed in its footsteps. In October of that year, the band fired Adler, claiming that his drug dependency caused him to play poorly; he was replaced by Matt Sorum from the Cult. During recording, the band added Dizzy Reed on keyboards. By the time the sessions were finished, the new album had become two new albums. Messy but fascinating, the albums showcased a more ambitious band; while there were still a fair number of full-throttle guitar rockers, there were stabs at Elton John-style balladry, acoustic blues, horn sections, female backup singers, ten-minute art rock epics with several different sections, and a good number of introspective, soul-searching lyrics. In short, they were now making art; amazingly, they were successful at it. The albums sold very well initially, but while they had seemed destined to set the pace for the decade to come, that turned out not to be the case at all. Rose handled the change by becoming a dictator, or at least a petty tyrant; his in-concert temper tantrums became legendary, even going so far as to incite a riot in Montreal. Stradlin left by the end of , and with his departure the band lost its best songwriter; he was replaced by ex-Kills for Thrills guitarist Gilby Clarke. By the middle of , there were rumors flying that GNR were about to break up, since Rose wanted to pursue a new, more industrial direction and Slash wanted to stick with their blues-inflected hard rock. Rose remained out of the spotlight, becoming a virtual recluse and doing nothing but tinkering in the studio; he also recruited various musicians -- including Dave Navarro, Tommy Stinson, and ex-Nine Inch Nails guitarist Robin Finck -- for informal jam sessions. Soon after, Geffen issued the two-disc Live Era: That summer, GNR started on their first tour in almost eight years, and they managed to fulfill all of their commitments in Europe and Asia. Sadly, they caused a violent and destructive riot in Vancouver when Rose failed to show up for the first date of their North American tour. And so years passed and still no new GNR album, to the point where it became one joke too many. The album was long billed as Chinese Democracy, and occasionally session recordings would leak and make their way onto Internet file-sharing networks. A fascinating article written by Jeff Leeds for The New York Times, published in March , revealed how tangled and costly the making of the album had become. Curiously, Moby claimed to have been offered the job as well. Marco Beltrami and Paul Buckmaster were allegedly brought in for orchestral arrangements, and there was a revolving door of guitarists; Buckethead left the band in , and Ron "Bumblefoot" Thal eventually took his place. In , the album seemed closer to release, as Rose began surfacing in public and even took his band on the road for some shows. While Chinese Democracy received many rave reviews, and the critical response was positive overall, the record underperformed its almost impossible expectations, debuting at number three on the Billboard when it came out in November. A worldwide tour followed. Guitarist DJ Ashba of Sixx: Bumblefoot left the group in , and in July of , Ashba announced that he had departed from the band as well.
