

## 1: Handbook of political conflict: theory and research - Ted Robert Gurr - Google Books

*Ted Robert Gurr, professor of political science at the University of Colorado, Boulder, is the author of numerous books, including "Why Men Rebel" (), which received the Woodrow Wilson Award, and coauthor of "The Politics of Crime and Conflict: A Comparative History of Four Cities" ().*

The Handbook is divided into five parts which together serve to illustrate: It is essential reading for all students and academics of political theory and political philosophy around the world. As such, the Handbook should be useful to scholars as well as students especially postgraduate students who are seeking to acquaint themselves with current scholarship in contemporary political theory. The Handbook is divided into four parts. Part I focuses on different ways of doing political theory – the nature of scholarship in political theory. This first part examines, among other problems, the relation of political theory to philosophy, political science and ideology, the place of historical scholarship in the study of texts, as well as Straussian and postmodern approaches to texts. The second part offers analyses of some of the main political theories that provide a focus for contemporary scholarship, such as Marxism, liberalism, conservatism, republicanism, communitarianism and democratic, discourse and green theories. Part III is organized around investigations of the modern state: Because the contemporary practice of political theory is so closely linked to the history of political thought, the last part of Handbook is devoted to studies of periods in the history of political thought, presenting discussions of the main thinkers of each period as well as current scholarship. Our aim to present thorough analyses required editorial judgements about coverage: The reader will discover that Part IV provides comprehensive and rigorous treatments of the main epochs of Western political theory, as well as fascinating chapters on crucial themes in Chinese political thought and the currently important topic of modern Islamic political thought. Because the Handbook contains thematic and historical chapters, detailed examinations of a theory or theorist are apt to be found in more than one chapter. We have provided cross-references and an extensive index to assist readers in locating relevant discussions. All of us were, further, assisted by an Editorial Board, who provided important guidance about the structure and content of the Handbook, as well as lending their expert advice; again, our sincere thanks. Finally, and most importantly, we are indebted to our contributors, who took such care in researching and writing their chapters. He now teaches political theory at Arizona State University. He is also an avid sea-kayaker and master carpenter. Mackenzie Prize for best book published in Political Science in He is a co-editor of Citizenship, Sustainability and Environmental Research: He is the author of Modern Italian Social Theory: An Historical Argument, Liberalism and Pluralism: His edited and co-edited books include Victorian Liberalism: American and European Perspectives, Constitutionalism in Transformation: She is the author of The Enchantment of Modern Life: He is author of Public Deliberation: Problems of Indeterminacy MIT, He is currently writing a book on cosmopolitan democracy. His other interests include philosophy of social science, critical social theory and pragmatism. Rengger International Relations in Political Thought: His publications include Civic Virtues: His articles on rights, republicanism, political obligation, punishment, and other topics in political and legal philosophy have appeared in the American Political Science Review, Ethics, the American Journal of Political Science, the Review of Politics, Political Studies, Criminal Justice Ethics, Law and Philosophy, and other scholarly journals and books. He presently directs the Contemporary Studies program at the University of Queensland. He is now working on a collectivist epistemology drawing on ideas of Hayek, Foucault, Kuhn, and Bakhtin. His recent books include Deliberative Democracy and Beyond: A specialist on the history of politics and political economy in eighteenth-century China, she is the author of Conflicting Counsels to Confuse the Age: She is a member of the Australian Labor Party. His works include Ethnic Conflict: Social Science and Critical Theory Chicago, He is the editor of Canadian Political Thought Oxford, He is currently writing books about multiculturalism in Canada and researching the political thought of George Grant. Among his books are The New Liberalism: The Durability of Dissent ed. His books have been translated into Italian, Japanese and Romanian. She is author of Feminism and Philosophy: Perspectives on Equality and Difference, Imaginary Bodies: Power, Ethics and Corporeality, and with G. Spinoza, Past and Present. Public Reason as a

Post-Enlightenment Project He was formerly an editor of the Australasian Journal of Philosophy, and is a founding editor of Politics, Philosophy and Economics. He is currently working on a book on principled reasoning in morals and politics. She is currently writing a book about the political philosophy of Spinoza, and one on a more wide-ranging project about the emotions in political philosophy. He is the author of Georges Sorel: A Study of Ideas Macmillan, He taught politics at Macquarie University for many years and is now retired. He has written on utilitarianism, on religious toleration, on the [Page xiii]political philosophy and ethics of Antoine Arnauld and Pierre Bayle, and on the political thought of William of Ockham. A Theory of Diversity and Freedom Oxford, and various books and papers on Australian politics, liberal political theory, and multiculturalism. He is a founder and co-editor of the Journal of Political Philosophy. His research interests include moral and political philosophy, applied ethics, economics and philosophy, political economy, business and professional ethics, and bioethics. He is an associate editor of Politics, Philosophy and Economics. His current research interests include moral pluralism and political theory, modern German political thought from Kant to Habermas and beyond , Max Weber, John Rawls and political liberalism, and Hannah Arendt, Leo Strauss, Carl Schmitt and the Weimar intellectuals. He is the editor of Weber: He is a founding editor of the European Journal of Political Theory. Presently his concern is to employ the techniques of contemporary analytic political theory to discuss questions of political principle raised by the process of European political integration. His recent publications include A Future for Marxism? Pluto , Engaging Political Philosophy: He is the author of numerous articles in scholarly journals and anthologies on topics within ethics, political philosophy, and the philosophy of law. He is the editor of Responsibility, Rights, and Welfare: White edited What is Political Theory? He is consulting editor for Political Theory. She has co-edited Politics of Sexuality: Identity, Gender, Citizenship Routledge, and Genre et politique: Her main research and teaching interests are the politics of gender and sexuality, eugenics, and discourse theory. Among his books are Community and Ideology: An Introduction , Philosophy, Politics and Citizenship: He is author, editor, or co-editor of nine books, including Ideas of Contract in English Political Thought in the Age of John Locke, and over 50 articles in journals such as.

Turning on the news, going to work, wandering through the neighborhood, or interacting with loved ones, we witness and participate in many examples of conflict such as wars, community violence, disputes at work, and marital discord. In addition to being frequent, conflict has certain consequences. On the other hand, conflict also provides such opportunities as personal growth, relational development, improved decision making, and identifying and addressing problems. Many communication scholars emphasize that the consequences of conflict are due to the way the conflict is managed. If we manage conflicts constructively, then we have positive outcomes; if we manage conflicts poorly, we have negative outcomes. What it means to manage conflict constructively or destructively is a complex issue. A simplistic answer is that constructive conflict is done cooperatively, while destructive conflict is done competitively. However, this superficial assessment belies the many factors involved in a conflict. There is a proliferation of research about conflict theory and practice. Much of this research examines the multitude of factors involved in conflict situations. The amount of research makes it difficult to synthesize key principles and practices of constructive conflict management. The chapters in this handbook aim to provide this synthesis in a variety of specific contexts. This particular handbook emphasizes constructive conflict management from a communication perspective. This perspective places primacy in the message as the focus of conflict research and practice. The means to express conflict is through communication verbal and nonverbal messages; likewise, the means to manage and address conflict is through communication. In this introduction, we discuss the purpose, intended audience, and organizational framework of this volume. In describing the organizational framework, we also introduce the first two chapters since these serve as general overviews for the four main sections. This multi-pronged purpose grew from our focus on communication and the intended audience. We had three primary constituencies in mind as we designed this handbook: The multiple constituencies presented a challenge to both the structure and the authors of the Handbook. The authors handled this challenge brilliantly. The content needs to advance thinking on conflict and to stimulate new ideas and guide future scholarship and research. For practitioners, the Handbook must be practical and applicable to the ongoing conflicts that they view and participate in on a daily basis. The application of research must promote critical reflection on existing practices as well as provide creative and innovative ideas to improve conflict practices. These goals are interdependent in that academics want innovative and heuristic ideas to benefit a variety of constituencies and practitioners want practical suggestions that are framed by current research. Essentially, we aimed to develop a book that integrated theory, research, and practice. To help integrate both research and practice and provide some consistency in content, we provided a list of six guiding questions for each author and asked them to consider these questions in the best manner possible. The questions were as follows: What organizational framework? What lines of conflict-related research have been conducted that can be grouped under this organizational framework? Does this line of research address global cross-cultural or domestic diversity conflict-related issues? Do you have any specific suggestions? What do you think are the most meaningful theoretical directions or research issues that are worth pursuing in the next 10 years? What are the major applied or practical issues that can be derived from the review of the literature for this framework? What can you say to conflict practitioners or mediators? You will see that certain authors emphasize research, while others emphasize practice and some balance both. The result is a volume that does a solid job of integrating theory, research, and practice. Finally, we also sought to expand the discourse and research beyond mainstream conflict research and practice in the United States as evidenced by Question 4 above. We want the audience to include academics and practitioners from not only around the world, but also from diverse communities in the United States. We also asked authors to include research and practice beyond mainstream U. S. research and practice.

**Organizational Framework and Overview of Introductory Chapters**

The Handbook is divided into four parts plus a general introduction and a conclusion. Two chapters are included in the introduction and provide an overview of

definitional, theoretical, and methodological issues in conflict communication. In the first chapter, Putnam tracks the development of definitions and approaches to the study of conflict and communication. She reviews the early work on communication and conflict dating back to the 1950s and tracks the role that communication has played in defining conflict, developing approaches to studying it, exploring models of negotiation and mediation, and moving from quantitative to qualitative methods of research. She concludes by suggesting ways to integrate knowledge across the discipline and to investigate the ways that conflict contributes to individual, organizational, and societal growth. In the second chapter, Fink, Cai, and Wang offer an overview of quantitative approaches for researching conflict communication. They focus on critical issues for comparing conflict communication across groups. They consider four critical questions for making such comparisons: To help address these questions, they consider critical issues in types of data qualities and quantities, levels of analysis, and time dependence, sampling, and data analysis. They also display specific approaches and instruments for observing, measuring, and interpreting conflict communication in each of the four contexts. Both of these introductory chapters have a decidedly research flavor as they set the stage for the nature of conflict research in the four specific parts. These four parts are focused on contexts in which conflict occurs: We describe each of these contexts, and the respective chapters, in the introductions for each part. In the conclusion, Oetzel, Ting-Toomey, and Rinderle attempt to synthesize the chapters in this volume. The focus on specific contexts that may encourage some readers to believe that there is limited overlap in contexts. To the contrary, we believe that the contexts are layered and interdependent. Social ecological theory examines the relationship of an organism to its environment. We discuss the layered nature of these contexts and identify different ways in which the contexts shape, frame, and influence conflict communication in different contexts. We also present future directions for research and practice based on the social ecological framework. Avoiding three fundamental biases. Translating social ecological theory into guidelines for community health promotion. *American Journal of Health Promotion* 10 (2006): 10-15. [http: A survey of managerial interest with respect to conflict](http://ajhp.sagepub.com) *Academy of Management Journal* 19 (1976): 10-15. [http: Interpersonal conflict](http://www.jstor.org/stable/258581) 6th ed. We are indebted to many individuals who encouraged and motivated us to bring this book to completion. First and foremost, we want to thank all the invaluable authors in the Handbook. Without their commitment, hard work, and focused energy, this volume would not be in your hands. They were a pure joy to work with and, as you can see from the finished product, they are an outstanding group of individuals who have dedicated their lives to researching and fine-tuning conflict communication theories and practices with passion. Thank you again to the chapter authors for journeying with us to make this handbook a reality. Second, we express our sincere appreciation to our editorial assistant, Susana Rinderle. Third, we want to thank Todd Armstrong, the Communication Editor at Sage, who encouraged us develop this book from the very beginning. Todd has been consistently supportive and encouraging throughout the various developmental phases of the book. Fourth, we extend our special applause to Deya Saoud, Senior Editorial Assistant to Todd, for helping us navigate the multitude of editorial steps in rounding off this book and for always being so efficient and responsive in answering our questions. Fifth, we want to thank Kristin Bergstad, Copy Editor at Sage, for her careful editing and keen eye in polishing up the collective chapters. Our colleagues have provided us with an affirming and comfortable environment to conduct our scholarly work. We could not have asked for a more collegial and intellectually supportive group to work with. Lastly, we thank all our undergraduate and graduate students for their engaging energy, questionings, and curiosities in the classrooms and for pushing us forward in our quest to understand the connection between theory and practice issues in conflict communication. Individually, there are several people in our personal and professional lives to whom we would like to express our special acknowledgments. I want to thank my wife and life partner, Keri, for providing me with love, personal support, intellectual stimulation, and enriching insights during this arduous editing process. I also want to thank Stella for coediting this volume with me. I value our tranquil friendship and collaborative work and look forward to continuous learning and growing as I team with you in future projects. I want to thank my husband, Charles, and son, Adrian, for coming along with me on this academic journey and for always providing me with light-hearted humor, affection, and a secure home space for respite and rest. I also want to thank John for inviting me to coedit the Handbook with him. To the readers, we thank you for taking the time to review each

chapter in this handbook, and we encourage you to pursue your interest and goal of a deeper understanding of the rich tapestry of conflict communication in diverse arenas.

Deutsch started on a path into psychiatry, but switched to psychology after dissecting a guinea pig in a biology class. Letchworth Village for the mentally incompetent, Warwick for delinquent boys, and Rockland State Hospital for mentally disturbed children and adults. During active combat Deutsch was honored with a Distinguished Flying Cross and cluster and an Air Medal with three clusters. He wrote his dissertation comparing the psychological effects and productivity of cooperative groups and competitive groups. He was also tasked with instructing introductory psychology classes to undergraduate students, in which he undertook an experiment comparing cooperative and competitive grading processes. The study uses three concepts to develop their implications for the social processes and personal relations that occur in groups: They married on June 1, a year and a half after they met, and have remained together ever since. Up until their study it was the norm for housing projects to follow a policy of segregation. The results of their study led to a reversal of policy in publicly held residential developments and to the belief that segregated housing was undemocratic. In a newspaper interview with Louis Danzing, the Director for the segregated housing projects stated that, "The study has served as a catalyst to the re-examination of our basic interracial policies in housing and as a stimulus to their change. Many of us have long felt that artificial separation of colored and white families was an unwholesome procedure. However until the study of Dr. Collins, we had no scientific evidence to substantiate our feelings. Cook, a book that would go on to three editions over the following twenty-five years. In addition to his work as a social psychologist, he conducted a small practice as a psychotherapist until his retirement in the late s. The two major works that resulted of his studies during this period are considered to be *The Resolution of Conflict* published in and *Distributive Justice* published in However he also published the book *Theories in Social Psychology and Applying Social Psychology* during this same period. The goal of the Center was to integrate the theory of conflict resolution with its actual practice. This research culminated in his book *Distributive Justice*. Another major theme of his work was the concept of "Crude Law", which studied the relationships between attitudes, behavior, and relationships. Through his research Deutsch determined that the typical effects of a given relationship tend to induce that relationship. Thus, the typical effects of cooperation induce friendly, helpful behavior and friendly, helpful behavior will induce a cooperative relationship. His *Crude Law* as well as his research into distributive justice expanded the breadth of his body of work in the field of conflict resolution. The ceremony for the awards is held each year in the month of April. Theory and Practice, given to a practitioner that contributes to the theory of the field of conflict resolution or vice versa. Over his career he mentored nearly 70 PhD students, most of them at Teachers College. The Intellectual Legacy of Morton Deutsch. *Journal of Peace Psychology*. Thorndike Professor Emeritus of Psychology and Education. His citation for the award stated that Deutsch had also won "the G. Deutsch has received several lifetime achievement awards for his work on conflict management, cooperative learning, peace psychology, and the applications of psychology to social issues". *Constructive and Destructive Processes. A Social Psychological Perspective. Psychological Components of Sustainable Peace. The Handbook of Conflict Resolution: Theory and Practice 2nd ed. A Psychological Evaluation of a Social Experiment.
