In this delightful sequel to *Harvey Hare, Postman Extraordinaire*, *Harvey Hare* is delivering invitations to his birthday party along with the daily mail.*

Courtesy of Hulu Spoiler warning: Things have changed for everyone. Starting with Oswald, he manages to get a job at the Dallas book depository. On his way out, he is confronted by an FBI agent who has been keeping his eye on Oswald. The agent makes a comment about what the traveling Oswald has been doing and about how Marina has apparently moved out on him. Oswald visits Marina, who is living with a friend and pregnant with a second child, and tells her to come home. Speaking of spying, George de Mohrenschildt shows up to talk with Oswald. He mentions the Walker assassination attempt and, though Jake is nearly convinced Oswald was the shooter, the man laughs it off in the conversation. Bill asks if maybe the butterfly effect of Jake having traveled to the past was enough to push Oswald off course from being the shooter. Sadie has one last surgery, for the scar on her face left by Johnny, tomorrow. Jake asks if she wants to wait a bit longer before the surgery but she says she wants to be done with hospitals. With the bet placed, Jake heads to Dallas to work with Bill. Jake turns on the equipment to learn Oswald is having a party to celebrate his birthday. Bill thinks he is changing Oswald and Marina for the better. To punctuate that point, their small shoving match in the corner of the birthday party leads to a knocked over lamp. Oswald finds one of the bugs in the lamp and throws a fit. How can this be considered the land of the free if the FBI can surveil him whenever they want. Could this have been the inciting incident? Downstairs, Jake spots Bill kissing Marina. When he walks in the house the two fight. Jake swears, Bill punches, the two go to the floor before Bill pulls a gun on Jake. He tells Jake not to come back, that this is his place only now. They have a touching moment before Sadie is taken to the operating room. A moment that is quickly undercut by the appearance of the Yellow Card Man. His appearances have only led to bad things happening which is foreboding considering the first time he was seen was immediately after Jake came to the past and Jake freaks out. He uses a fire extinguisher to bust through a door and stop the surgery. It was apparently just in time. He has a plan to deal with Bill though. He tells him that Marina went in to labor and she was asking for him. They head to the hospital only to find that Jake is taking him to a mental hospital to have him committed. Yelling that your friend is on a mission from the future is only going to dig you in a deeper hole, Bill. Jake then confronts George. He asks if he had recruited Oswald. Turns out the only reason George spent time with them was because him and Marina were from Minsk and he wanted to help her. It was time to take him out. First he calls Sadie and proposes over the phone and asks her to come to the future with him. She seems up for it but says she will give Jake an answer when he gets home. But of course he is attacked by the people he set his high-stakes bet with. Jake had apparently put money on the same bet all over town in an attempt to make more money. Those places were all owned by the same person though. Bill had also placed bets on the fight. Assuming they have been cheated, the men work Jake over good and leave him in an alley. In his delirium, Jake sees flashes of both Sadie and Christy, his ex-wife from , telling him they love him. Sadie asks how long it will take him to get back on his feet.

### 2: Man who sang 'Happy Birthday' says Hurricane Harvey left him homeless, but not hopeless - ABC News

*Harvey Hare, the faithful postman of the forest, is having a birthday party for himself and wants all his friends to come. As he hands out his invitation along his normal post route all the animals seem so busy and none can commit to coming.*

Boston to the Bay by way of Vermont. Reader, writer, activist, hot sauce connoisseur. May 22, Happy Birthday, Harvey Milk! If not for his untimely death, it may have radically slowed the gentrification of San Francisco. What would he say were he to stumble upon his old camera shop, now a Human Rights Campaign gift shop nestled between a Wells Fargo and, ironically, a property-management company? For many reasons, Milk would probably be more than a little sad. When a city supervisor is evicted, that really says something, both about the stressful financial climate of the time and the unorthodox lifestyle of the supervisor, which placed him, socioeconomically, right alongside all those renters he was representing. Speculators prey on neighborhoods made vulnerable by the sways of development, usually justified under the guise of property rehabilitation and community revitalization. But could his own experience fighting for housing rights have been a reason why he began adamantly piloting a groundbreaking real estate tax in the last year before his death in ? Photo courtesy of Daniel Nicolette CC. Harvey Milk threw some legislative shade when he wrote the following into his ordinance: There exists in San Francisco a situation in which short-term speculation in the residential housing market is artificially inflating the cost of home-ownership and rental units beyond the financial reach of lower- and middle-income households. A transfer tax on short-term speculative profits from the sale of residential real estate is desirable because it will operate as a disincentive to such speculation and will assist in maintaining the cost of residential real estate within the financial reach of lower- and middle-income households. But wait, the parallels continue: A transfer tax is desirable because 1 the tax is imposed on a group which has benefitted greatly from the governmental services which create an environment conducive to capital appreciation of residential real estate, and 2 the tax is imposed on a group which generally is well able to pay such tax on such profits. Despite numerous amendments and reattempts, when Milk died on November 27, , so did the anti-speculation ordinance and with it, the hope of setting a precedent of power for working-class tenants. Yet before the ordinance was lost to time until its rediscovery this year, that is , it did manage to spark a dialogue that was foundational to the way progressives approach housing and urban-land usage, specifically in the ongoing battle against speculation. First, though, we must fully understand the monster that is speculation. Mecca counsels San Francisco tenants in danger of eviction due to a variety of legal speculative means. Others, such as prolonging construction until tenants move on, or even tenant harassment, are less easily assessed but prevalent throughout the city. For him, the root of the problem is as simple as the commodification of housing, when it should be treated as a right. If only the solution were equally simple. Should it be their right? Down with duplexes in the Mission and the Haight, up with the Transamerica Building. The ordinance document, which includes with it a number of op-eds and citizen appeals that throw light on the depth of the controversy Milk sparked, touches upon this several times. In a piece of organizing literature printed by the American Friends Service Committee, the consequence of aggressive speculation is put bluntly: Milk cited horror stories from the SF Tenants Union: A seven-year resident with six kids on dialysis evicted from Noe Street, despite needing to live near a hospital. Renters, seniors and young couples looking to buy their starter homes permanent housing in was beyond reach of anyone who actually wanted to live in the city. He made it easy for us readers in , suffering the same afflictions, circling in pencil particularly acute instances of speculation he perhaps hoped to draw attention to. Some of the examples Milk gives in the ordinance include the following: No rehab permits were taken out, yet the rent tripled in that time. Or 27th Street in Noe Valley. Again, no rehab permits were taken out. And 12th Avenue in the Inner Richmond. No rehab permits could be found. These stories sound pretty much the same as the ones we hear today. Milk may not have been successful in passing his ordinance, but in his attempt, he compiled a document that sure speaks truth to the horrors of housing commodification. He warns of a future San Francisco that is hostile to the community he fought tirelessly to represent, should that dialogue not begin: In spite of increasing interest rates, grassroots interests in curbing speculation and fear of a

## HAPPY BIRTHDAY, HARVEY HARE! pdf

crash, the market remains on a high plateau. If present trends continue, then the future is clear. San Francisco will become a city for the rich and the near rich. All others will have to leave or, in staying, pay more and more for less and less housing.
