

HARD LANDSCAPE IN CONCRETE pdf

1: Concrete Products - Landscape Supply in Minnesota - Minneapolis, St. Paul

Our company, Hard Rock Landscape and Concrete LLC, specializes in Landscaping and Concrete. We have over 15 years of experience in landscaping and in concrete in Colorado. We have gained our expertise from starting as basic laborers for a residential and commercial landscaping company in Denver.

Keep the size small and simple. Avoid complex shapes that require extra formwork. Choose one color or stay gray. Add multiple colors, borders or a pattern for a custom effect. Add formwork for a shape other than square. Price is more about installation than it is material costs. Get the sturdiest vinyl option and go larger on the pool deck. Choose nicer deck materials to accent the pool. Or consider upgrading to a fiberglass pool. Less framing equals more saving. Plan for only as much counter space as necessary. Choose the least expensive finishing materials. Get a higher end finish since the kitchen is usually a focal point or hub for activity. Include a side burner or refrigerator accessory. Choose a portable set-in-place model versus built-in units that require additional costs for footings and foundations. Choose a model with additional features such as a hearth, mantel or wood storage areas. Spend on finer exterior finish options. Or choose a high end portable model available at home improvement stores or catalogs. Select wood burning rather than gas or propane. Opt for specialty materials, such as slate, for the veneer of a prefabricated model. Splurge for a small built-in, customized to your size and shape. Stick with a basic design, avoid curves. Choose a stain that will enhance the character of warm woods such as cedar and redwood. For longer life span, consider composite as an alternative material to splurge on. Attach patio cover to house so less support beams are needed. Use no-frills, basic posts. Upgrade to decorative columns. Add gutters, downspouts, or recessed lighting. Go with Alumawood which mimics the look and texture of natural wood. Get decorative end caps, corbels, and base trim. Stick with the typical dog ear fence style installation; pressure-treated wood. Upgrade to redwood or cedar. Though you may not be able to include every feature you desire, this range does allow for many options at various price points. For instance, you might save and select a less expensive hardscape material so that you can include a small outdoor kitchen.
