Purchasing a WWII German Hat The hat cord is attached to the side of the hat via the use of a button which is lined with a black, cloth material. The design of the cord is of twisted type. A band of the same material is applied at each end to cap it off and keep it together. A close up view of the front device is shown below. In the shape of a button with a couple of ribbed silver circles ending in a red section. The edges of the button are black and star patterned. The back side of the visor has black checkered pattern. Many of the German hats were outfitted with the checkered design. The side of the hat has an RZM paper tag glued to it. This was placed there at the factory. In many samples the tag is missing due to normal wear. The tag is of white background. This is followed by the DAF cog wheel logo. The RZM logo is also displayed in a corner. A serial number is stamped on the tag with black ink. Notice that the color of the font between the stamp and the tag are different. A star pattern with rounded arms has also been stamped next to the serial number. Whether it is for military use or a civilian application. The process gets started by you sending us an Email. We will respond to your inquiry normally within 24 hours and in many cases much faster. We can tell you what you have, what it is worth and how much we can pay you.
