Located in the Southwest corner of England is the legendary village of Glastonbury. To say that this village is legendary is actually somehow an understatement, it has been recognized as a spiritual center since the megalithic era. It is the site of the first Christian church in the British Isles and claimed to be the Avalon of the King Arthur tale. The village of Glastonbury itself is pretty small but very quaint, cradled among a series of velvety green hills. Tor is an English word referring to a high rock or hill, deriving from the Old English Torr. Thousands of years ago it was an island. Before modern drainage, the Tor in winter would have towered above the flooded Somerset Levels. The tallest of the hills is the famous Tor. At the top of Tor are impressive remains of a church on top, dedicated to the Archangel Michael. The top of the Tor was levelled at some point in the 10th or 11th century to build a large stone church. In an earthquake levelled this church. Years later a smaller church was rebuilt on the site in and lasted until the demise of Glastonbury Abbey in The church was quarried for stone and now only the tower survives. Wearyall Hill, location of the legendary thorn tree is on the west entrance to the village. Glastonbury was a major religious center long before the time of King Arthur or Joseph of Arimathea. The Druids utilized the Tor from BC as an initiation center for priests. Megalithic Age remains dating from 5, BC reveals Glastonbury as the site of a massive astrological calendar combining a stone circle, with solar and lunar alignments, and a land carved zodiac map, ten miles in diameter. Druid priests and society considered Glastonbury their "holy mecca". There were temples, stone circles, and fertility sites. Chalice Well The energy is soft and healing. The famous well is located at the back of the ample garden, and there are benches located throughout for relaxing and taking in the beauty. The gardens have a comforting feel and a vibrational purity. There are three distinct, yet harmonic energy sources within the gardens. These are the leyline energies forming the vortex in the King Court, the anionic energy formed by the Chalice wellspring and flowing waters, and the soft energy field of the vibrant trees and plants. All of these have tangibly different effects that vary from meditative, gently relaxing to vibrant electric intensity. The Chalice Well holds another dense energy around the wellhead area. The Goddess speaks from within that field, she is most tangible there. The wellhead is at the rear of the gardens with a perfect view of the Michael Tower atop the Tor, just a few hundred meters away. The wellhead is adorned with the sacred geometry symbol of the Vesica Pisces. The Chalice Well itself is very therapeutic. The waters have been thoroughly tested and analyzed. The spring water is slightly radioactive, rich in iron and carries a detectable magnetic charge There are countless documented accounts of healing taking place. The highly publicized cure created a renewed notoriety for the Chalice Well. Visitors stream in from all areas of Europe to drink the water. Glastonbury Abbey Glastonbury Abbey held a prominent and sacred position in the Christian world. Glastonbury may have been a site of religious importance in pre-Christian times. The abbey itself was founded by Britons, and it dates at least to the early 7th century. Later medieval Christian legend claimed that the abbey was founded by Joseph of Arimathea in the 1st century. Glastonbury fell into Saxon hands after the Battle of Peonnum in The Saxons under Cenwalh of Wessex conquered Somerset as far west as the River Parrett, perhaps with the intention of gaining control of the valuable abbey. However, Cenwalh allowed the British abbot, Bregored, to stay in power, a move perhaps intended as a show of good faith to the defeated Britons. It is found just outside the museum exit, in the main body of ruins. It is in the subterranean section of the cathedral assemblage. It is intact on three sides, and is topped by a low stone ceiling. As such it radiates a very bright, telluric energy. It resonates to the 4th chakra.

She is a healer in a world of a lot of suffering. Amma was born in India, and grew up being quite eccentric and different than others. It was soon realized she had special healing powers and she came to be viewed as a person with saintly potential. It is claimed that she performed miraculous healing feats, such as sucking out the toxins in the wounds of lepers and causing them to heal. She has become known as the hugging saint, in which, people, mostly her devotees will wait in line for hours to get a hug from Amma, and in that exchange Amma absorbs their suffering. I have known people who have been to these dashans, as they are called, with Amma, and they speak very highly of the experience. That is why I have been so curious about her story and who she is. Perhaps one day I will see for myself in person. We believe her, as she believes us. She knows what is right and wrong; she knows what will happen; she knows what we are thinking; and she knows the language of nature. Amma must be experienced!
