

## 1: How to Get In: Boston College Admission Requirements

*All-boys college preparatory school for grades , ranked among the top tier private schools in the greater Boston area.*

For most of its early history, BC offered a singular 7-year program corresponding to both high school and college. Its first entering class of 22 students ranged in age from 11 to 16 years. The curriculum was based on the Jesuit Ratio Studiorum , emphasizing Latin , Greek , philosophy and theology. John McElroy, SJ , was to "educate pupils in the principles and practice of the Catholic faith," its founding documents reflect the historical realities of the time. On the right, a corner of the Jesuit Urban Center can be seen. Expansion of the South End buildings onto James Street enabled increased division between the high school and the college. The purchase of farmland for a new college campus in Chestnut Hill allowed BC High to fully expand into the South End buildings, though it remained a constituent part of Boston College until when it was separately incorporated. Following the Great Depression , BC High was characterized by increasing enrollment and aging facilities. By the s, the South End buildings proved inadequate once again. Overcrowding and a demand for athletic fields led Jesuit President Fr. But Father Hewitt had a vision, and he dreamed of "a modern high school with a full range of scholastic facilities, including science laboratories and a library ; the necessary ecclesiastical facilities, including a Jesuit faculty residence and a church; a wide range of athletic facilities, including a gymnasium, field house, and outdoor areas for a variety of sports , both interscholastic and intramural, and areas for general recreation, faculty walks, parking, and campus landscaping. By , the entire student body had moved to Columbia Point, though members of the Jesuit Community remained at the South End Residence until In that year, Loyola Hall, the new Jesuit residence, was completed. The project included a new state-of-the-art science building, new administrative offices, a new cafeteria, and a general commons. Afterward, during the fall of , President William J. Grades 7 and 8[ edit ] On January 11, , BC High announced the addition of a seventh and eighth grade to its high school program beginning in September These grades are in addition to the traditional grade system and is known as the Arrupe Division. The Arrupe division differs from the rest of the school in their stricter rules and more involvement from the teachers. Buildings[ edit ] McElroy Hall 3 floors: Cushing Hall 2 floors: The Math Department and classrooms on the second floor; the Corcoran Library on the first floor. Loyola Hall 3 floors: Walsh Hall 3 floors: McQuillan Hall 3 floors: Newest addition to BC High Campus in Basketball courts, locker rooms, indoor track, and weight room. A second gym, for the Arrupe Division, new art classrooms and theaters as well as a student lounge will be in Cadigan Hall. The new hall was announced in the spring of

*Boston College High School (also known as BC High) is an all-male, Jesuit, Roman Catholic, college preparatory secondary school founded in with historical ties to Boston College.*

Over the past several years America seems to have arrived at a consensus: The overarching goal of high school is to prepare students for college. Driven by this notion, states and districts around the country have raised high school graduation requirements by increasing the number and rigor of required academic courses and by adding exit exams. But as we push harder to create more demanding high schools that are more focused on college preparation, something is also going wrong. Advertisement Emerging research in the education world suggests that a tougher approach to high school academics might leave students no better prepared for college and work, while also increasing the number of high school dropouts. The National Research Council concluded that high school exit exams have decreased high school graduation rates in the United States by 2 percentage points without increasing achievement. In Chicago, a study found no positive effects on student achievement from a school reform measure that ended remedial classes and required college preparatory course work for all students. High school graduation rates declined, and there was no improvement in college enrollment and retention rates among students who did graduate. Get Today in Opinion in your inbox: Sign Up Thank you for signing up! Sign up for more newsletters here The United States clearly needs more college graduates: We currently rank ninth in the world in four-year college graduation rates for domestic students, and President Obama has set a goal for the United States to be first in the world by But we also need something else: And to do that, we need to think differently about what high school should be: To college-minded parents and educators, rethinking high school in this way might sound like a scaling back of ambition. Despite the current focus on college preparedness, American students, parents, and public officials have long seen education as having broader goals. In Thomas Jefferson stated that the purpose of public education included giving citizens information for transacting business, the ability to express ideas in writing, and an understanding of duties to neighbors and country. Advertisement Support for a broad range of educational goals continues to this day. Other goals included critical thinking, social skills and work ethic, and citizenship. The need for schools to do more than prepare students for college is supported by studies about jobs in the future economy. A report from Georgetown University forecasts that by , 63 percent of all jobs in the United States will require a postsecondary education “ but that also means that more than a quarter of all jobs will not require any postsecondary education. Indeed, the Department of Labor Statistics has projected that more than one-third of all job openings in the US economy between and will not require a college degree, and in fact will require one month or less of on-the-job experience or instruction to be fully qualified in the occupation. What will matter, however, is graduating from high school with a set of skills that they can use to get a job, to keep learning, to live a better life. A number of economists, including Nobel economist James Heckman, have documented the need for noncognitive or so-called soft skills in the labor market, such as motivation, perseverance, risk aversion, self-esteem, and self-control. A report from the National Association of Manufacturers found the top skill deficiency in both current workers and job applicants was a lack of basic employability skills such as timeliness and work ethic. Only 76 percent of public high school students in the United States earn a diploma within four years of entering the ninth grade, a rate lower than 40 years earlier. This translates into more than 1 million students who fail to earn a high school diploma each year. Advertisement How can we keep those students in school “ and better serve them when they stay? Research has shown that the key factor in student success is being engaged. Students who are not engaged are less likely to perform well in school, more likely to fail classes, and less likely to graduate. In the Civic Enterprises report, *The Silent Epidemic*, high school dropouts reported that the most frequent reason for leaving school was that classes were not interesting. Research demonstrates that career and technical education “ courses that teach applied skills in agriculture, engineering, health science, and the like “ increases attendance, raises completion rates, and improves earnings and employment prospects of high school graduates whether or not they attend college. International comparisons further reveal that countries offering

more access to vocational options have higher high school completion rates as well as higher scores on international tests. Such courses, if approached creatively, can also provide another way of teaching rigorous academic content. The University of California, where I work, is helping teachers design so-called integrated technical courses for high schools that meet entry requirements for the university. One example is an auto mechanics course that also teaches students college prep physics, already offered in one California high school. In such schools, graduation requirements could be redefined so students could succeed not just by passing MCAS-style tests, but by demonstrating mastery of an area that most interests them – whether it is math, physics, cooking, mechanics, or sports – while achieving acceptable proficiency in core academic and other areas. High school, in short, should not just prepare adolescents for college and careers, but for successful lives as adults. And far from backing off modern notions of success, this approach actually embodies new understandings of what really helps people succeed:

## 4: Boston College High School - The Full Wiki

*Boston Prep middle and high school students consistently achieve at high levels. % of Boston Prep graduates have been accepted to four-year colleges, and nearly all have enrolled in college the semester following graduation.*

Joseph with teaching at the new school. Cathedral became an independent Catholic institution in and is now staffed by mostly lay leadership and faculty and led by an independent board of trustees. Curriculum between the two institutions will be aligned and Mission graduates receive guaranteed admission to Cathedral for grade 7. Electives include art, Spanish language, and physical education. Students entering grades 7 through 9 are required to attend the three-week program focused on project-based applied mathematics, problem solving, and summer reading. The summer program is in addition to required summer reading assigned to students in all grades. Athletics[ edit ] Cathedral High School teams are known as the "Panthers". Coed teams include soccer, indoor track, and outdoor track. With approximately six minutes remaining in the game, Cathedral quarterback Matt Owens raced around the right side of the line and split the defense for a potential yard game-winning touchdown run. At around the yard line, Owens raise one of his arms in celebration before crossing the goal line. On the next play, Cathedral turned the ball over to Blue Hills, and they eventually ran the clock out to secure a win over Cathedral. In the aftermath, Boston mayor Thomas Menino was critical of the call and invited the entire Cathedral football team to lunch. Furthermore, Skip Bayless and Stephen A. The school honors alumni-athletes and supporters biennially in a hall of fame induction, among which is notable class of alumna and WNBA player Michelle "Ice" Edwards. Tufts Medical Center partners with Cathedral to provide athletic training services and team physicians to serve at home games. Tufts also conducts free annual sports physicals and weekly clinics to assess and serve student athletes. CHS Voices CHS Voices is a poetry and writing club which entertains and encourages from traditional poetry to spoken word and slam poetry. Voices helps members refine skills as a creative and performer and hosts quarterly open mic nights featuring students, alumni, faculty, and visiting poets. Mock Trial Cathedral participates in the annual statewide competition sponsored by the Massachusetts Bar Association. Students then present each side at different times in a real courtroom setting with another school representing the opposing side. National Honor Society Cathedral has a chapter of the National Honor Society and are selected for membership based on criteria of scholarship, service, leadership, and character. Student Council Representatives of the student body are elected annually to the student council and, in addition to representing the students to the administration, also assist in planning events including homecoming, service projects, and prom. Yearbook The school has published an annual hardcover yearbook, "Cathedra," every year since at least the s. Students assist with photography, photo editing and selection, copywriting, layout design, and editorial. Philanthropy[ edit ] The school is supported largely by private philanthropy. Benefactors include alumni, community members, charitable foundations, and corporate partners. The school also raises substantial support through the Adopt-A-Student Foundation, a separate c 3 charitable foundation.

You can raise your composite score from 20 to 32 in this example. This is important for your testing strategy. Because you can choose which tests to send in, and Boston College forms your Superscore, you can take the ACT as many times as you want, then submit only the tests that give you the highest Superscore. Your application readers will only see that one score. Therefore, if your ACT score is currently below a 33, we strongly recommend that you consider prepping for the ACT and retaking it. You have a very good chance of raising your score, which will significantly boost your chances of getting in. Even better, because of the Superscore, you can focus all your energy on a single section at a time. If your Reading score is lower than your other sections, prep only for the Reading section, then take the ACT. Then focus on Math for the next test, and so on. This will surely give you the highest Superscore possible. Studying for the ACT instead? Want to learn how to improve your ACT score by 4 points? Download our free guide on the top 5 strategies you must be using to improve your score. This guide was written by Harvard graduates and ACT perfect scorers. Typically, selective schools tend to require them, while most schools in the country do not. The SAT II is optional but can help with first year course placement, especially in science and foreign languages. Source Final Admissions Verdict Because this school is very selective, strong academic scores are critical to improving your chances of admission. For a school as selective as Boston College, rounding out the rest of your application will also help. Want to build the best possible college application? We combine world-class admissions counselors with our data-driven, proprietary admissions strategies. We know what kinds of students colleges want to admit. We want to get you admitted to your dream schools. Learn more about PrepScholar Admissions to maximize your chance of getting in. Admissions Calculator What are your chances of admission at Boston College? Chances of admission with these scores: Plug in your numbers to see what your chances of getting in are. This tool provides only a simplistic estimate of your chances of admission. Instead of treating this tool as a crystal ball, we recommend you consider the big picture of what your chance means: Very difficult to get in We recommend you apply to schools across a range of chances. Applying to some safety schools will guarantee you have a college to go to, while applying to some reach schools will give you a shot at getting into the school at the top of your range. How would your chances improve with a better score? Try to take your current SAT score and add points or take your ACT score and add 4 points to the calculator above. See how much your chances improve? PrepScholar customizes your prep to your strengths and weaknesses. Focus all your time learning, not worrying about what to learn. Read about our score results and reviews from our happy customers. Click to learn more about our program , or sign up for our 5-day free trial to check out PrepScholar for yourself: Application Requirements Every school requires an application with the bare essentials - high school transcript and GPA, application form, and other core information. Many schools, as explained above, also require SAT and ACT scores, as well as letters of recommendation, application essays, and interviews.
