

### 1: Canvas Tips and Tricks | Tips and Tricks from CIDI

*Text Instructions. Click the Table icon in the toolbar.; Move your cursor over Insert table to open the table creator. Drag your cursor over the grid and click to specify the dimensions of the table you'd like to add.*

Getting Started What is Panopto? Panopto allows for easy recording and sharing of courses, lectures, and presentations. Panopto is designed to simplify the lecture-capture process. Recordings in Panopto are viewable on most web browsers and mobile devices. Is there any Panopto training? The workshop schedule can be found here: Where can I find Panopto? In your Canvas course, select Panopto Recordings from the menu on the left. You may also access Panopto at uw. Shared NetIDs are not supported by Panopto. The same function can be done by sharing folders with another NetID. How do I make my Panopto recordings available to people in my course? Panopto recordings are automatically available to all members of a course via the Panopto Recordings tab in Canvas. You do not need to have your course content in Canvas to use Panopto. I am supporting an instructor using Panopto. Can I get administrator or support-level access to Panopto? Panopto user permissions and course folders are inherited from Canvas. If you need creator-level access to a Panopto folder, the instructor of the course can add you to Canvas in one of the following roles: See instructions for sharing. Within your Canvas course, you can embed a recording into a Canvas page this is in addition to the Canvas navigation menu. Note, however, that if you plan to use course content in future quarters, you must copy and move Panopto recordings to the new instance of your Canvas course. If the pages are simply copied, the embedded videos will not be viewable by students in the new Canvas course. Follow these instructions from Panopto. If a course is jointly listed in the time schedule, how will it appear in Panopto? Panopto folders are synced up to your Canvas courses. If your course is cross-listed in in the time schedule, you will only see one Canvas course and one Panopto folder. This course and folder will have the name of the parent course whichever course comes first alphanumerically. If you intend to manually cross-list your Canvas course, please email help uw. For more details, see the note for Panopto users on the Canvas Cross-listed courses. Why is my Canvas course not showing in Panopto? Panopto receives course folder information from UW Canvas. You will need to publish your Canvas course and click on the Panopto Recordings tab in Canvas to ensure the connection to Panopto. Publish your Canvas course. If you are not listed as the instructor of record for a course in the UW Time Schedule, you will not have access to the course. In order to be listed as the instructor of record you will need to contact your departmental time schedule coordinator. Courses are automatically provisioned well in advance of the beginning of each quarter. Canvas courses are generally available as soon as the official Time Schedule for the upcoming quarter is released. See more information about course availability. Will Panopto show courses I taught in previous quarters? If your course from a previous quarter is still published in Canvas, the course folder will show in Panopto. Recording Can I upload an external video file such as a. You may not upload external files to Panopto. If your video library is large, see http: Is there a place on campus where I can make recordings? Odegaard room was recently remodeled to allow self-guided, high quality lecture capture recordings. The room is free of charge and is reservable. In addition, you can schedule recordings in several classrooms. Learn more about scheduled recordings. Can I create a recording if I am not currently connected to the Internet? Yes, if you have logged in to the Panopto Recorder while connected to the Internet and not logged out. After your recording is finished and you have connected to the Internet, click on the recording and selection a destination folder. Click upload to complete the process. See instructions for recording offline. If you are using the Windows recorder, yes. The Windows recorder has a background uploading service that will transfer data to the server as long as the recording computer is on. The Mac recorder does not have this service at this time. Can I schedule a Panopto recording? If you teach in a classroom that supports the automated Scheduled Lecture Capture the rooms with an Automated Panopto Recorder in the classroom list , you may use the Recordings Scheduler in Canvas to schedule some or all of your classes for recording. You can change the schedule at any point during the quarter as needed for upcoming classes. You may also select to record specific times during your class session, for example, recording only the first hour of class when you are lecturing. What connector should I use with

my laptop in a room with automated schedule lecture capture? You will need to connect your laptop to the classroom VGA input if you want to record your presentation. When a laptop is connected to a classroom presentation system via one of the ports listed above, the Mac and some Windows laptops output a copy-protected signal that cannot be recorded. An adapter will allow you to connect your laptop port to the classroom presentation system via the VGA input cable at the podium. VGA does not pass audio, only the display. A stereo mini cable at the podium will pass audio when connected to your Mac laptop. Where is the Panopto remote recording software available? UW-IT does not support remote recording for individual users. Can I capture my Keynote presentations and what version can I use? Panopto can capture most Keynote presentation. For more details, see Panopto Keynote Compatibility. Sharing How do I share recordings in Canvas? UW Panopto is now built into your Canvas course. The course navigation menu in your Canvas course includes a link called Panopto Recordings. Members of the course can click this link to see recordings saved to the course. Can I add UW groups to a Panopto recording or folder? Adding UW groups to Panopto recordings is done using Canvas. Learn how to add people to your Canvas course. How do I share my recordings? Add additional users to your course What are other sharing options? In new recordings, RSS feeds and podcasts are disabled by default. To turn them on in Panopto, go to the folder-level settings on the top right of the page, select Settings, select Settings again, and then check the Enable Podcast Feed checkbox. To allow downloads, change the drop-down selection from the default of No one to Authenticated users with access. How do I copy recordings from one academic quarter to another? They do not move with your canvas course import. You can copy your recordings in a batch and move them. General Questions How do I find out about changes and new releases to Panopto? To receive email updates, please sign up for our lecture capture news mailing list. We also post updates on the UW Panopto Updates page , and Panopto publishes release notes and notifications on the Panopto Forums page. Does UW Panopto offer full Panopto functionality? The following Panopto features are not offered to UW users:

### 2: About Canvas at IU

*How do I add an additional email address as a contact method in Canvas as an instructor? How do I view course content offline as an ePub file as an instructor? How do I change my default email address in my user account as an instructor?*

Add dimension and texture! Login or register to post comments Comments November 1st, at 1: Yes, Opus prints digital images on canvas. More information about our digital printing service can be found here: A layer between the print and the clear tar gel is not necessary. Once the print has cured for a minimum of 48 hours, you can paint directly on the print with acrylic mediums, such as the tar gel, and with acrylic paints, as well. While a top coat is not essential, it would be beneficial in the long run for giving the print the maximum protection against UV rays and discolouration. For this, you can use Golden Archival Spray varnish , or Golden Polymer varnish which is a brush on version. If you intend for the final piece to be stretched, I would suggest that the stretching is done prior to applying the tar gel or other mediums to get the tightest stretch. I would also be concerned that the bond between the media and the canvas could be compromised by stretching afterwards. We are not able to print directly onto boards as our printers are designed for paper and canvas. I use cradled wood panels but this would work just as well on an art board or any hard surface that does not warp easily. I mount my own prints this way but with a few modifications. I print my images just a fraction larger than the surface I intend to mount them on to get a full bleed to the edge once mounted and trimmed. And then I glue my print to the board and weight it overnight to ensure a good bond. Once all is dry, I trim the edges and the mounted print is ready to go! Login or register to post comments Pankaj Mehta October 20th, at I tried Golden Tar Gel on one of my digital canvas I am using a HP Z pigment ink printer, what other golden product will be safe and give me the similar effect like your video. Here are a few possibilities: It could also be that the canvas is not accepting the ink as well as it could. If you try letting it dry thoroughly, and the ink still lifts, you can try spraying on some thinned acrylic medium with a fine mist sprayer, or use a spray varnish and letting it dry thoroughly before applying the tar gel. It is always a good idea to do some small tests before applying to full pieces. Golden welcomes product questions and you can contact them directly for further support with their products: Our Gloss and Satin finished canvases are best for digital prints alone. You will need to wait at least 24 hours after printing for the ink to fully dry before applying anything to it. It is quite stable after that. That should be all you need, but for extra security you can also prepare your print by spraying on thinned acrylic medium or using spray varnish and allowing that to dry thoroughly as well. It is always a good idea to do some tests on a small print to see if the techniques you want to use will work. After you have finished your piece you should add a final layer of varnish for protection. We recommend stretching before you work on the print, however with acrylic paint you may be able to stretch after as well, but have to be careful not to damage your work as you do so. For convenience, Opus offers a stretching service when you order your print. Applying paint will be similar to applying medium as in the video. If you would like to learn more about acrylic painting, we have some good books check in store for a complete list on the subject, regular free in-store demos , along with a listing of workshops and classes that happen around BC. You may be able to do this on your own with the proper camera, tripod, and lighting, or you can find a company in your area who documents artwork digitally. Once you have a digital file, our pricing and file set up details for our Fine Art Digital Printing at Opus Page can be found at [www.opusart.com](http://www.opusart.com). Then apply your gel medium. You can also apply a coat of diluted acrylic medium before applying your gel medium. It is always a good idea to do some small tests before working on the full piece. I hope this helps. The printer prints like an ink-jet printer with a smooth flat finish. Any texture on the prints would be imparted from the choice of surface. For example, if you print on canvas, there will be a texture from the canvas but not from the ink used to print. I hope that helps to answer your query. And she dipped her paintbrush into water. Moistening the brush with water prior to dipping into the gel will slow the drying of the gel on the brush. This is a big help when cleaning your brush after you have finished painting. I hope that helps. At Opus, we use pigment-based inks that take 24 hours to fully settle and dry. After that, they are stable to paint on with acrylic paints and mediums, without disturbing

or altering your print. Applying acrylic paints can help highlight glazes of colour, bring out brush strokes, and enhance your image. If you want extra security for your original print, you can also prepare your print by spraying on a thinned acrylic medium, or use spray varnish and allow that to dry thoroughly as well prior to applying acrylic paints or mediums. It is always a good idea to do some small tests before applying to your full finished work. I hope this helps! Golden is a great brand and considered by many of our customers to be the best on the market. They have a wide variety of gel mediums to choose from. Have a look here: The page also has a video so you can see the different mediums in use. The Stevenson has a little more body than this one but the next step up, Golden Heavy Body Gel would be quite a bit thicker. The gloss gels do have a lot of sheen but are also clearer than a matte gel and so would provide more clarity for the your print below. I hope that helps! All the best to you, Crissy. The Golden Clear Tar Gel has a high gloss finish that dries to be very shiny, and has a stringy and tar-like consistency, which generates really fine, detailed marble-like lines. However, it is not designed to be a final finish. For finishing your piece in matte, we have a few recommendations. In general, it is good to start off with a base layer, known as an isolation coat. The isolation coat is a permanent, glossy coating that separates your surface from removable varnishes, protecting your print. This way, if you make a mistake, you can generally remove it without damaging your print. After applying the isolation coat, you would add several layers of gloss varnish. The reason you would want to first start off with glossy layers is so that you preserve and bring out the colours of your print. Matte varnish, on the other hand, dims the colours, and so it requires a minimum of a base layer to prevent a "frosted" appearance. Applying matte varnish directly onto a print, particularly if you have areas with dark colours, leaves you with this "frosted" look, as it dries opaque. To achieve a matte finish while preserving the colours, you can use one of the following methods: Start off with your base layer isolation coat. We recommend using a Golden Soft Gel Gloss for this: Once the isolation coat is completely dry, you can add several layers of a gloss varnish. Make sure you dry each layer, and avoid very humid, hot, or cold environments. Adding several layers will help make your colours pop. Once the top layer has dried, you can lightly sand the surface, and this will remove some of the shininess of the finished piece, without damaging either the print or its colours. Top layer matte varnish: Start off with your base layer very important with this method. Once completely dry, coat your piece in several layers of gloss varnish, making sure to dry each layer while avoiding very humid, hot or cold environments. Finally, carefully add a single layer of matte varnish overtop. Additionally, you could mix a gloss and matte varnish together to create your own recipe for a "satin" varnish. Liquitex and Golden offer great online resources if you want to see how different finishes dry and affect colours. Please note that it is always recommended that you experiment prior to varnishing on your finished piece, creating samples on a surface similar to your finished piece to see which gel and varnish will give you the desired effects for lustre and transparency, particularly in similar environments - varnishes are highly influenced by temperature and humidity. You could try asking your local art supply store if they have any opened samples that you could try in-store prior to purchasing. We have a staff person who has had success painting on digital prints Hahnemuhle German Etching Paper mounted on a Cradled Panel with oils. She coated the print with several layers of Golden GAC an acrylic medium that provides a clear barrier between the print and your eventual application of oil paint, followed by a single layer of clear gesso on top to create a toothier surface on which to paint, an important step for painting with oils. To complete your painting with a matte finish, you can use a matte varnish or Cold Wax Medium after applying your Gamvar Pre-Mixed Picture Varnish, which is used to protect oil paintings. In regards to bleeding, the more acrylic you prime your canvas with, the less dips there will be in the surface for paint to puddle into. Using a thicker oil paint can also help; the greatest risk you run for bleeding is if the oil paints are too fluid, or if your acrylic primer is not thick enough. It is important to note that acrylics are the medium generally recommended when painting on giclee and, as oil painting on giclee is fairly experimental, the best that we can offer are ideas. It seems that you have already been doing test prints; as always, we recommend that you test any new techniques prior to applying them onto your finished piece. Adding the gel texture to a print is not a service that we offer. However, if you are interested in applying gel texture yourself, you may ask for advice on materials and techniques from Opus staff at any of our stores or by phone via our Mail Order Department. If you are close to our Opus Langley location, they

## HOW DO I ADD A ABLE TO CANVAS pdf

have an upcoming workshop, " Altering Digital Prints to Create a Polished Masterpiece ," that may interest you if you decide to pursue applying the gel texture yourself. It takes place on Saturday, September 20, , from I hope this helps, Login or register to post comments

### 3: SWOSU Student FAQs for Canvas

*In Canvas accounts, admins can allow Open Registration, which allows you to add users to a course even if the users do not yet have a Canvas account. The user will create an account as part of accepting the course invitation.*

In the text field [2], enter the login ID for the user. You can copy and paste multiple login IDs at one time by placing a comma or line break between login IDs. When searching by login ID, you should use the login ID format found in the Canvas login page for your institution e. The example format in the login ID field may differ from the format used in your institution. If you are not sure how to format users for your institution in the text field, please contact your Canvas admin. Select User Details In the Role drop-down menu [1], assign the user s a role for the course based on available course roles. In the Section drop-down menu [2], assign the user s a section in the course. If you want to limit the user s to only interact with other users in their section, click the Can interact Click the Next button [4]. If you are adding multiple users at the same time, all users inherit the same role and section. Add Existing Users If Canvas finds an existing user, you can confirm the user before adding the user to the course [1]. When you are ready, click the Add Users button [2]. If Canvas did not find your intended user, you can click the Start Over button [3]. View Search Results If Open Registration is disabled for your institution and Canvas is not able to find a match for the user s , Canvas will notify you that a match was not found. To try a new search, click the Back button. Add New User If Open Registration is enabled for your institution and Canvas is not able to find a match for the user s , you can choose to add the user s to your course. To add all users in the search results, click the Select All checkbox [1]. You can make adjustments to the user name, if necessary. Click the Next button [3]. You are also required to include an email address for the user [2]. Once you have entered an email address, you can click the Next button [3]. Add Users Confirm the users you are adding to the course via your selected search method. Click the Add Users button. Note that observer invitations will only show as pending if the invited observer does not already have a Canvas account. If you added a user without a Canvas account, the user can create an account as part of the course invitation process. Once the user has accepted the course invitation, you can interact with the user in the course. You can also send messages to the user via Conversations. It could take up to 24 hours for users to receive their invitations. If necessary, you can resend course invitations.

### 4: javascript - Creating tables within an HTML5 Canvas - Stack Overflow

*I was able to do it like this: First, create the drawing canvas, arrange in front of text, size it, then use Insert > Text Box. Use the 'Draw Text Box' option. Size the text box, then place your cursor in the upper left of the text box and choose Insert > Table.*

Accessing Canvas What do I need to access Canvas and my classes? Your LMS password will be reset to your default password, which you can change once you log into Canvas. Please see this tutorial for more details on how to change your default password to a password of your choice. Here is the list of browsers that will work with Canvas. Internet Explorer 8 is no longer being actively supported for use with Canvas, so please upgrade your Internet Explorer browser. Though it will work with Canvas, Internet Explorer is not recommended as a first choice. Will Canvas work on my mobile device? Canvas functions fully on several smart phones. Others are functional but these three are currently recommended. Additional mobile applications are planned or are under development. You can also consult the Canvas Student Guide online here for information about using mobile apps for Canvas. How do I log into Canvas for the first time – what will my username and password be? The username is not case sensitive but the password is. Instructions for resetting your password will be emailed to the principal e-mail address in your Canvas account. Please see this tutorial for more details on how to change your password to a password of your choice. How do I edit my Canvas profile e. Here are the basic steps: Be sure to save any changes you make. How can I add or change a profile picture? Please click here for a tutorial on adding or changing your profile picture in Canvas. Where does this profile picture display? Next to your discussion posts and in course rosters, for example. Which time zone does Canvas operate in? You can set your personal profile to reflect the time zone you are in if it differs from Mountain Time. Please check with your instructor regarding deadlines if your time zone is significantly ahead or behind Mountain Time. Students can click on the Help link at the top right corner of the screen while logged into Canvas to request help. The Canvas student manual is posted online in the Canvas Guides. Is a student orientation for Canvas available? Yes, we have an Explore Canvas for Students module available that teachers can copy into their Canvas courses. How do I customize the Notifications I receive from Canvas? By clicking on the Settings link in the upper-right corner of the Canvas screen after logging in, users can: Will my teacher e-mail me from Canvas? Instead, Canvas assumes that with the ability to set up custom Notifications, students are getting the message in the channels they prefer, but that important conversations should be in one central location: Instead of e-mailing out to users, Canvas uses its Conversations tool, an internal messaging system entirely based within Canvas. Click here for a tutorial on Conversations. When can I access my courses? You typically will not have access to your courses in Canvas until the first day of class. You do not need to request access as you are automatically enrolled after registration in your Canvas courses. If you register on the first day of class or after that date, it may take one business day before access is available as we update the information periodically, not instantaneously. In order to view your course in Canvas, two things must happen: You must be officially enrolled in the course; and your instructor must have "published" the course to make it available to students. If an instructor asks you to access a Canvas course but it is not listed in your My Courses list, ask your instructor if the course has been published yet. If the instructor has published the course, ask your instructor to check if you are on the roster. If you have recently registered for the course, please allow one day for your enrollment to be added to Canvas. What happens in Canvas when I drop a course? If you drop a course, then that course is deleted from your course list. You can no longer access that course once the system has had time to process your change in registration typically this takes one day. How do I access them? Canvas displays up to 12 courses in the Courses drop-down menu. Once users have more than 12 courses, they may customize the drop-down menu to choose which courses will display. Click here for a tutorial on how to do so. After a semester ends, your courses from that semester will be retired from your course list. In any case, you can always access all of your courses, past and present. How can I customize my course list? You can customize the list of courses you see from the dropdown menu of Courses. Please click here for a tutorial on customizing that course list. How do I upload files for my Assignments? Can I cancel a submission for an

## HOW DO I ADD A FILE TO CANVAS pdf

Assignment? No, it is not possible to cancel your submission to an Assignment in your Canvas course. You can however return to that Assignment and re-submit your work, as long as the Assignment is still open for submissions. You can also write a comment as you submit work to explain the situation to your instructor. Canvas will keep track of the time and date each file is submitted for your instructor. However, be aware that you will only see your most recent submission for an assignment if you return to the page where you submitted or check the Grades section. Can I submit files multiple times for an assignment? Yes, you can return to an assignment and submit your work again, as long as the instructor has not restricted the assignment. You can also write a comment as you submit work. How do I know if I can retake a quiz? Return to the quiz. If you see the button marked "Take the Quiz Again," then you are allowed to take the quiz again. If you are having an issue with a quiz, please contact your instructor for help. Can the instructor give me extra time on a quiz or extra quiz attempts? While this is technically possible for Canvas, you will need to check with your instructor to determine if he or she will give you extra time or extra attempts on a quiz. If you return to a quiz and see a button marked "Take the Quiz Again," then that quiz is set up to permit to you to take the quiz again. How does the Turnitin anti-plagiarism tool work? Turnitin is integrated into Canvas. Turnitin often adds new content to keep its service up-to-date. What about the Turnitin anti-plagiarism tool and my assignments? Your instructor has the option of enabling the Turnitin anti-plagiarism tool to check assignments that are submitted online in your Canvas course. The Turnitin student manual can be found online here. Student tutorials and FAQ about Turnitin can be found online here. The instructors decide whether to share the matching paper depending on the circumstances. Turnitin agrees that students should own the copyright to their original work. A common misconception is that students relinquish their ownership rights when they submit papers to Turnitin. Students who submit papers to Turnitin retain the copyright to the work they created. For more information on privacy and Turnitin, please click here. I need tech support for Turnitin, the anti-plagiarism tool. SWOSU students and instructors can submit a ticket by visiting turnitin. Please see this tutorial on how to reply to a Discussion post. Look for the word "Reply" and the arrow at lower left, below the post you wish to respond to. Click there to create a new post. What does subscribing to a discussion mean? You can "subscribe" to discussion threads within your courses and be notified when there are new comments. This means that Canvas will notify you when new comments are posted to the Discussions in your courses. Please note that users cannot subscribe to individual threads within a threaded discussion. If you create a Discussion yourself, you will automatically be subscribed to that Discussion. You will also automatically be subscribed to any thread you respond to, but you can manually unsubscribe at any time. For a tutorial on subscribing and unsubscribing to Discussions, please click here. How do I attach files to my discussion posts? Your teacher must turn on a particular course setting to enable you to attach files to your posts in discussions.

### 5: How to Print on Canvas: 10 Steps (with Pictures) - wikiHow

*It would appear that the best way to do this is to convert the data from the table into a canvas and then call toDataURL to get an image. After searching through a lot of the tables mentioned here it looks like all of them just put a wrapper around a regular html table to make it look fancier.*

If your project is already finished, you can still add margins to it by manipulating the canvas and image size options available in Photoshop CC. Adjust the canvas size, then the image size to add Photoshop margins. Image courtesy of Adobe. Launch Photoshop and press "Ctrl-N" to create a new file. Specify the width and height for your finished project, including margins. For example, if you want a pixel margin around a pixel-square image, make the height and width "" pixels each. If you are printing the project on standard paper, click the "Preset" menu and select "U". Press "Ctrl-R," or click the "View" menu and select "Rulers. The ruler is already aligned to the upper-left corner of the canvas. A text box positioned to the rulers. Insert any objects such as images, shapes or text boxes into the document. If any objects in the canvas overlap the edges of the current canvas, select "Merge Visible" from the Layer menu. Margins added using the Canvas Size window. Select "Canvas Size" from the Image menu. Put a check mark in the "Relative" check box. Select whatever margin you want to add to the document, such as ". Click "OK" and the additional space you specified is added to the image as empty margins. The Image Size window with a locked aspect ratio. Resize the image size back to its former dimensions if needed by clicking the "Image" menu and selecting "Image Size. Change the "Width" to what it was originally. The height is automatically changed in proportion to the reduced width.

### 6: Canvas Instructor Guide - Table of Contents | Canvas LMS Community

*What are Assignments? Canvas considers any graded item as an assignment. Instructors can also set up non-graded assignments. These include: Assignments: An Assignment is a Canvas assignment that can be submitted online through text entry, file uploads, media recordings, Google Docs, URLs, or Canvas pages.*

The tool that allows you to access Wimba live classrooms is the Conferences tool. This post will give an overview of how to create and manage your online classroom Conference. We will also discuss some common issues that you may encounter and how to avoid them. Click the Make a New Conference button on the upper-right-hand side of the window. The Start a new Conference settings will appear and you can make changes to the following options. Allows you to give your conference a unique name. We suggest changing this to something other than the default Course Conference so it can be easier to find for administrative purposes. The long-running conference prevents the conference from closing after the duration of the conference has ended. Once a conference has ended it is preserved in the state that it was at the time it was ended. This means that any new course members will be unable to view the archives and you will no longer be able to use the conference for any new sessions. It is best to enable this for frequently used conferences, such as weekly lecture conferences, as the conference will not automatically close and become unusable and the archives will be available to all course members. If the conference is only going to be used once and you know the approximate time limit you can specify it in the minutes textbox. Let participants know what the conference is used for. You can include information such as the phone number and classroom PIN number they can call if they are having audio difficulties. By default Invite all Course Members is enabled. If you wish to do a special conference with only certain students, uncheck this option and you will be able to select individual students. When you have finished changing the settings for your conference click the Create Conference button to finish. When you click the Start it now button an invitation will be sent to selected course members with a link to the conference. After clicking the Start it now button your conference will start and you will be taken to your conference. The next time you view the conferences page you will see two new buttons, Join it now and End it now where the Start it now button used to be. It is preserved in its current state, new or uninvited course members will be unable to view the archives if any exist. Once you end a conference it cannot be re-enabled. Editing a Conference From the Conferences tool click on the title of the conference you would like to make changes to. The Conference Details will be displayed. The conference details page contains information about the conference, links to archives, and the currently invited course members. To edit the conference click the Edit Conference Button on the right-hand side. Here you can change the settings of your conference. If you would like to change advanced settings pertaining to the Wimba live-classroom click on the Manage Advanced Settings link. Once you have made any modifications click the Update Conference button to save your changes. Viewing Archives From the Conferences page click on the conference you would like to view archives for. In the External Links section, click the View archives link. A window will appear listing the available archives. Best Practices If you are going to host frequent conferences such as weekly lectures and hold office hours, you can create just one conference and use the conference description to let students know the times of each. Make sure that the long-running conference option is checked, and do not end it when you are finished with your session. This will ensure that students are not confused as to which conference room to go to. This can cause problems in the future if new students enroll in your class and need access to archives. If you would like to repurpose an existing conference you can use the announcement tool to inform students of the change and re-post the link to that conference. If students are having difficulty entering the conference from links sent through notifications to their email, have them enter from the link in the conferences tool. If you have given a conference a time duration you may want to add minutes and start early so you and your students can deal with technical issues that may arise.

### 7: SWOSU Grading and Testing FAQs

*You have to add your canvas element to the DOM by using a function like `appendChild()`. For instance, to add it in a `div#myDiv`, you can do write the following code: `www.enganchecubano.commentById('myDiv').appendChild(canv)`.*

Add a drawing to a document Click in your document where you want to create the drawing. On the Insert tab, in the Illustrations group, click Shapes. When you find the shape you want to insert, double-click to insert it automatically, or click and drag to draw it in your document. You can do any of the following on the Format tab, which appears after you insert a drawing shape: On the Format tab, in the Insert Shapes group, click a shape, and then click somewhere in the document. Click the shape you want to change. Add text to a shape. Right-click the shape, click Add Text, and then type. Select several shapes at a time by pressing CTRL on your keyboard and clicking each shape you want to include in the group. On the Format tab in the Arrange group, click Group so that all of the shapes will be treated like a single object. Draw in the document. On the Format tab, in the Insert Shapes group, expand the shapes options by clicking the arrow. Under Lines click Freeform or Scribble. Adjust the size of the shapes. Select the shape or shapes you want to resize. On the Format tab, in the Size group, click the arrows or type new dimensions in the Shape Height and Shape Width boxes. Apply a style to a shape. In the Shape Styles group, rest your pointer over a style to see what your shape will look like when you apply that style. Click the style to apply it. Or, click Shape Fill or Shape Outline and select the options that you want. Add flow charts with connectors. Before you create a flow chart, add a drawing canvas by clicking the Insert tab, clicking Shapes in the Illustrations group, and then clicking New Drawing Canvas. On the Format tab, in the Insert Shapes group, click a Flow chart shape. Under Lines, choose a connector line such as the Curved Arrow Connector. Use shadow and three-dimensional 3-D effects to add interest to the shapes in your drawing. Align the objects on the canvas. To align the objects, press and hold CTRL while you select the objects that you want to align. On the Format tab, in the Arrange group, click Align to choose from an assortment of alignment commands. Delete all or part of a drawing Select the drawing object that you want to delete.

### 8: Add a drawing to a document - Word

*Adding a half-inch margin to a letter-sized document, for example, results in an image that's inches wide and inches high. If you don't mind your canvas being stretched that extra inch, you can unlock the aspect ratio when changing the width and height.*

Canvas Gradebook How does the Canvas Gradebook work? The Gradebook provides the instructor a means of easily inputting and distributing grades for students as the semester progresses. The Canvas Gradebook can serve as a communication tool between students and instructors and allows the instructor to monitor the activity of high-risk students. The Gradebook can calculate weighted grades, and assignments can be organized into groups for weighting as well. In Canvas, any graded task or item is considered an "assignment" so you may see that term used pretty widely! The Canvas gradebook is a fully featured management tool that allows instructors to:

- Be notified when assignments submitted.
- Notify students when an assignment has been graded.
- View Grade history and revert updated assignment scores to previous scores.
- Download or upload grades from the Gradebook as a CSV file.
- Utilize offline grading capability by downloading assignment submissions into a zip file and upload when connectivity is available.
- Elect not to let students view their grades until they are published.
- Create custom weighting and grade ranges.
- Report of all historical grade changes is available to the instructor.
- Message students whom have not submitted yet, or scored more than X or less than Y on an assignment.

What are Assignment Groups? As you create Assignments, Quizzes, graded Discussions and so on, you can organize them using Assignment Groups. You will name your Assignment Groups as you create them. Assignment Groups can contain various kinds such as graded Discussions, Quizzes, and Assignments. Besides organizing items, Assignment Groups are a must if you intend to use a weighted total to calculate final class grades as explained in our Canvas Grading and Testing FAQ. Plus, with Assignment Groups, you can set up grading rules that will govern how grades for items in that Assignment Group are handled by Canvas. For example, in an Assignment Group, you can drop the lowest grade or drop the highest grade out of that group. You can also specify which Assignments should never be dropped from the Assignment Group calculation, and more. By default, all Canvas courses start off with one Assignment Group named Assignments. You can find it listed in the Assignments section of your course. View a tutorial on creating Assignment Groups.

When do students find out that I have entered or changed a grade? By default, as soon as an instructor posts a grade students who visit the Canvas course will be able to see it, unless the instructor "mutes" the assignment see question on muting on this page. Students will need to set their notification preferences to be sure to receive prompt notifications about grades. Please see the page on Notifications.

How can I add columns to the Gradebook? In Canvas, you can only generate more columns in the Gradebook by creating new graded items, such as tests, assignments, and graded discussions. You can however create assignments that are set to not require any submission by students and manually input grades into the column that is generated.

How do I sort my Gradebook? Click on the Grades link to open the Gradebook. Click on the drop down menu next to the Gear icon to access the Gradebook sorting options. See the complete, illustrated instructions for Gradebook sorting options.

How do I enter and edit scores in the Gradebook? You can still overwrite these scores and adjust them in your Gradebook. View a tutorial on inputting and editing scores in columns in the Gradebook.

How do I enter letter grades into the Gradebook? In Canvas, you do not actually type letters into your Gradebook or the SpeedGrader. Instead, you must use a grading scheme. The grading scheme will correlate percentage ranges or scores to specific letter grades. You can enable the default grading Canvas scheme or create your own grading scheme in your Canvas course, then enable your custom grading scheme.

Does the Gradebook count ungraded items as zeroes? Click on the gear wheel icon at the far left end of your Gradebook, above the list of students. View a tutorial on how to leave a comment providing feedback for students via the Gradebook. You can also provide students with comments when using SpeedGrader. Your comments to individual students are private.

How do I send a message to my students from the Gradebook? View a tutorial on how to message certain categories of students from within the Canvas Gradebook.

How do I curve grades in the Gradebook? How do I drop the lowest score? In order to

drop the lowest score from a selection of assignments, you must set up Assignment Groups. View a tutorial on creating new Assignment Groups. View a tutorial on how to drop the lowest score within a group of assignments, please click here. How do I weight grades in the Gradebook? By default, when you create graded items like assignments, tests, and discussions, Canvas categorizes them as belonging to its default Assignment Group named "Assignments. For a tutorial on weighting the final grade based on Assignment Groups. How can students view what the average class grade is for a particular graded item in their course? To see what the average class score is for a particular graded item, students must click on the Grades button in the left navigation panel of their Canvas course, and then once they arrive at the Grades screen, they must click on the "Show All Details" button at the right. This will reveal a graphic underneath each assignment title. How do I grade attendance, participation, etc. In general, you will need to create an Assignment that is set to not require any submission. In the options for submission, choose "No Submission. Students would not have a "submit" button so they would not be confused by the presence of this Assignment. Additionally, if you need a weighted total for a final class grade which involves something like attendance, you could create an Assignment Group for that category. You would then be able to calculate the Attendance Assignment Group as a designated percentage of the final grade. View a tutorial on Assignment Groups. How do I bulk download and upload submitted assignments in Canvas? From the Canvas Gradebook, you can download all the submitted work for an assignment at once; make comments on those submissions, then bulk upload them for students to view. Students will see the uploaded files in the comments section for their submission. See instructions on how to bulk download and upload submissions. How can I view the Gradebook as a student? Canvas has a "student view" feature that you can use to view your course in general as a student would, including even taking tests! View a tutorial on how to launch the student view. Launching the student view feature adds a dummy "test student" to your Gradebook. By default, Canvas allows students to see grades as soon as the instructor has graded the assignment, discussion, etc. In some cases, instructors may wish to prevent students from viewing their grades in order to release grades to all students at the same time. To hide student grades temporarily, an instructor can choose to mark an assignment as "muted. View a tutorial on muting an assignment. Canvas Assignments permit students to upload multiple times for the same Assignment, which enables them to turn various drafts of their work. Each submission is marked with the date and time it was submitted so you can easily distinguish among them. Canvas will also mark if a submission was turned in past the deadline. How can I issue the same grade for all students for one assignment? Issuing the same grade for all students for one assignment or other graded item is called issuing a "default grade" in Canvas. You can also override any grades that have been issued and set the grade, this way the entire column can be populated with the same grade. There is no way to populate the entire gradebook with default grades. You cannot go through and put zeroes in for missing grades. Only individual assignments can be issued a default grade How can I see the total points earned by a student not the percentage? The Total column is at the far right end of the Gradebook and is generated automatically. This feature offers grading flexibility for instructors depending on their preferred grading styles and can be accessed by hovering over the Total column and selecting the grading view of choice. Students will receive this viewing functionality in an upcoming upgrade to Canvas; and students can still see cumulative points by hovering over their totals. Please note that this feature is only available in the Gradebook for courses that did not set up a weighted total using Assignment Groups. How can I set up a grading scheme so that I can use letter grades in my course? A grading scheme correlates percentage ranges or scores to specific letter grades. For a tutorial on how to create a grading scheme. How can I set up extra credit in my Gradebook? How does the Canvas SpeedGrader work?

## HOW DO I ADD A ABLE TO CANVAS pdf

### 9: How do I add users to my course? | Instructor Guides | Canvas @ Yale

*Add your own syllabus to Canvas. Canvas generates a syllabus for you when you add assignments and due dates to your course. But if you prefer to use your own syllabus, it's easy to copy and paste your syllabus or upload [www.enganchecubano.com](http://www.enganchecubano.com),.docx, [www.enganchecubano.com](http://www.enganchecubano.com) file.*

Please view the video below regarding how to add people to your course: Open People In the course navigation, click the People link. Add People Click the Add People button. Select User Search Type In the pop-up window, select how you want to add people. You can add them by their email address [1] or by their NetID [2]. If you need to use the Yale Directory to look up an individual, you can do so by clicking "Yale Directory" [3]. You can add multiple users at one time by putting a comma between each user. Remember, do not use the protected roles. Roles that you can use include: Click the Next button [4]. Add Users Canvas will verify that the account is valid [1]. If you are not ready to add the user, click the Start Over button [2]. Otherwise click the Add Users button [3]. Canvas will automatically send the user an invitation to participate in the course. Once the user has accepted the course invitation, you can interact with the user in the course. You can also send messages to the user via Conversations Inbox. Just click the gear icon [1] to the right of the user you need to update and then click the "Edit Role" button. Select new role Select the new role remember not to select a protected role from the Role drop-down menu [1] and the click the Update button [2]. If the user is being enrolled into the course by registrar data, you will not be able to remove them. Remove User From the People Tool, click the three dots associated with the user you would like to remove [1] and click Remove from Course [2]. Form more information about how to add users:
