View and Download HP C user manual online. DRAFTING PLOTTERS SERVICE MANUAL. C Plotter pdf manual download. Also for: Designjet c ca, Designjet c ca.

If difficulty in loading sheet media is experienced, an alternate method of loading is possible. Ensure that the pinchwheel lever is down and the roll cover is closed. Raise the window on the plotter. Insert the sheet into the plotter until the leading edge hits the stops inside the platen area. Align the right side of the sheet with the perforation line on the entry platen. While holding the sheet against the stops and aligned with the perforation line, lower the window on the plotter. Let go as soon as the plotter begins to pull the media in. Perform steps 4 through 6 of the sheet loading procedure on the previous page to set the plotter for the media type being used. Another way to remove unplotted sheet media is to raise the pinchwheel lever at the right, remove the sheet, and lower the lever. Should the jam remain, turn the plotter OFF and raise the pinchwheel lever and window to the up position. Use caution when inserting hands into the plotter to clear media. If necessary, push the ink-cartridge carriage and the cutter carriage away from the jammed media. Handle only the solid plastic part of the ink-cartridge carriage and the extension on the left end of the cutter carriage. Carefully remove the jammed media from the plotter. When finished, lower the window and pinchwheel lever before turning the plotter back ON. Cartridge replacement is necessary only when any of the following conditions occur: Pen Checking is ON and you elect to replace the cartridges when the plotter prompts you. Poor plot quality indicates an out of ink condition or the cartridges appear clogged. When Pen Checking is ON default, the plotter checks the pens both before and after each plot for proper electrical contact and nozzle function. The defective pen position is indicated by a flashing icon in the front panel display. Use the ink level indicators on the cartridges to check ink levels. Perform the following steps to change the current pen checking selection. Press the Enter button and use the arrow buttons to scroll to the Utilities menu. Use the Previous button to return to the Status display. Press the Enter button and use the arrow buttons to scroll to the Plotter setup menu.
