*Take the self assessment module quizzes below (make notes of your scores and remember which revealed significant gaps in your learning). Taking numerous HSPT practice tests is recommended for test day success.*

Since , the HSPT has provided measures in the major skill areas as well as cognitive skill criteria resulting in the most comprehensive placement test available. The entire battery is standardized at the same time with a population of entering high school students. This produces results that are directly comparable for all test areas and can be related to the level of the students as entering freshman. Select one of the above links to read more. The content of the test is based on select items, which have been piloted and studied to determine their effectiveness. Piloted items are later introduced into test forms to help ensure testing integrity. Specific procedures are followed to make certain that reliable comparisons can be made from year to year and form to form. Schools will find it to be perfect for use as a practice test. STS Electronic Reports - Scoring service reports and student data files are available in place of traditional paper reports. Your data will be retained on the Report Center for the entire academic year. Our dependable processing service means that you will always see consistent, reliable test results every year. Optional tests in science 25 minutes and Catholic religion 20 minutes are available at no additional cost. The scores from the optional test are not included in the computation of the Battery Composite score. Cognitive skills quotients CSQs , standard scores, national and local percentiles, as well as grade equivalents are standard features of Closed HSPT reports. The Rasch Item-Response Theory one-parameter model was used to develop the standard score scale and enables reliable year-to-year comparisons to be made. STS ships a kit with your order to easily facilitate the return of testing materials when testing is complete. The Open HSPT provides national normative measures in the following cognitive and basic skills areas: It is available in large print. Schools can also purchase an optional science test. Cognitive skills quotients CSQs , standard scores, national and local percentiles, as well as grade equivalents are standard features of Open HSPT reports. The Rasch Item-Response Theory one-parameter model is used to develop the standard score scale and enables reliable year-to-year comparisons to be made. A return kit is also provided to easily facilitate the return of testing materials when testing is complete. A long form answer sheet containing student address information may be ordered at an additional cost so schools can receive student address lists, address labels and notification forms. Large print, Braille and audio versions - These specialized materials are available upon request. Contact us for additional details product descriptions and ordering information. Rank-Order List Reports arrange students from high to low based on their composite scores two copies. Group Summary Statistical Reports summarize overall group performance on all subtests and overall group performance on each subtest two copies. Alphabetical List Reports organize students in alphabetical order and provide cognitive skills quotients CSQs , standard scores, national and local percentiles, as well as their grade equivalents for the basic skills subtestsâ€”reading, mathematics, and language two copies. A horizontal line indicates where the performance of a testing group would match the national average one copy. They are generated for each student and report his or her scores, identify corresponding national and local norms, and give information about performance on skills within each subtest two copies. The Performance Profile Group Summary is included at no additional cost. Individual Item Analysis Reports show item responses for each student listed alphabetically. Individual Item Analysis Reports are available only for basic skills subtests two copies. Group Item Analysis Reports provide local and national p-values for each item grouped by objective. Group Item Analysis Reports are available only for basic skills subtestsâ€”reading, mathematics, and language two copies. Two Group Summary This one-page report allows you to look at two different populations of your testing group and compare the median performance of one group to the other. Schools must record student information on a special four-page answer sheet in order to receive one or more of these services-. Alternate Group Summary Statistical Reports provide standard group summary information for alternate groups identified on student answer sheets two copies. Students can test in small groups or on an individual basis. Score reports are generated that same day. Online Registration - This system allows schools to manage applicants in real time and ends the need to compile records by hand.

## HSPT PRACTICE TEST 500 PAGES pdf
