

1: JSTARS Archives - GRSS | IEEE | Geoscience & Remote Sensing Society

IEEE publishes the leading journals, transactions, letters, and magazines in electrical engineering, computing, biotechnology, telecommunications, power and energy, and dozens of other technologies. Almost all of these publications are available electronically through the IEEE Xplore® digital library.

IEEE Citation style, is a popular style of referencing that is designed specifically for the students and professionals in the technical field. The Institute for Electrical and Electronics Engineers has developed the IEEE citation format, which help the professionals belonging to the fields of computer science, engineering and IT. This organization delivers many articulations published in various newspapers and magazines. Much similar to the Chicago style, IEEE bibliography serves as a standard format for the submission and publication of technical papers. IEEE format citation Execution: For IEEE citation format, the writers are required to use square brackets for in-text citations that comprise of proper numbering of the resources. The numbering should be carried in a sequence. No additional information should be provided in the in-text citation. Every other information concerning the source should be given at the end of the paper in the reference list, which should be coordinated with the in-text citation given in the content. It should be noted that the reference list IEEE bibliography is given in the arrangement of numbers and not alphabets, unlike other citation styles. Use single spaces for the brackets. In case the writer has to use the same source several times in the content, same numbering should be mentioned in the citation. Separate the sources by using a dash, coma or even a colon; if the source is used from a particular para or page. If direct source is used, i. Hanging indentation and left alignment is to be used in the IEEE citation style. To make the reference task convenient, Researchomatic offers numerous reference generating tools including IEEE citation generator, which is capable to provide the IEEE format citation. Like other automated citation tools, it can help you in creating the perfect citation and bibliographies. Avail the citation generator for free and save your time from consuming up to several hours in researching and creating a standard format. Many students and professionals, especially belonging to the technical fields gets under a lot of pressure to submit the standard documents, which are highly impressive. The teachers generally require IEEE format citation for the submission of assignments, thesis and other research work because of the convenience to the reader. To format correctly, you need to have complete information about the procedure, which can be highly difficult.
