Studies have shown that 40 million foreign born residents live in the US. In the s, this number more than doubled to , In the decade after, it increased to , Those operating on the U. The time of admission varies greatly from traveler to traveler depending on the visa class into which they were admitted. Visa overstays tend to be somewhat more educated and better off financially than those who entered the country illegally. It also requires electronic readable passports containing this information. Visa overstayers mostly enter with tourist or business visas. Those who leave the United States after overstaying their visa for a period of one year or longer, leave and then attempt to apply for readmission will face a ten-year ban. Border Crossing Card entry accounts for the vast majority of all registered non-immigrant entry into the United Statesâ€” million out of million totalâ€”but there is little hard data as to how much of the illegal immigrant population entered in this way. The Pew Hispanic Center estimates the number at around ,â€” Being undocumented makes these individuals susceptible to exploitation by American employers as they are more willing to work through bad conditions and low income jobs â€” consequently making themselves vulnerable to abuse. This consequently forms an informal sector within the labor market. As a result, this attachment formulates an ethnic identity for this sector. This prevented federal, state, and local public benefits from flowing to undocumented immigrants. It also required federal and state agencies to disclose if someone was undocumented. Undocumented immigrants are still entitled to medical assistance, immunizations, disaster relief, and k education. Despite this, federal law still requires local and state governments to deny benefits to those undocumented. Central American migrant caravans For several years, Pueblo Sin Fronteras , which means "People Without Borders" has organized an annual part-protest, part-mass migration march, from Honduras, through Mexico, to the United States border, where asylum in the United States is requested. Most illegal immigrants who come to America come for better opportunities for employment, a greater degree of freedom, avoidance of political oppression, freedom from violence, famine, and family reunification. However, there are also some who come involuntarily who work in the sex industry. While Mexican population growth has slowed, the large numbers of people born in the s and 70s are now of working age looking for jobs. Global economic change is one cause for illegal immigration because information and transportation technologies now foster internationalized production, distribution and consumption, and labor. This has encouraged many countries to open their economies to outside investment, then increasing the number of low-skilled workers participating in global labor markets and making low-skilled labor markets all more competitive. This and the fact that developed countries have shifted from manufacturing to knowledge-based economies, have realigned economic activity around the world. Labor has become more international as individuals immigrate seeking work, despite governmental attempts to control this migration. Because the United States education system creates relatively few people who either lack a high school diploma or who hold PhDs, there is a shortage of workers needed to fulfill seasonal low-skilled jobs as well as certain high-skilled jobs. To fill these gaps, the United States immigration system attempts to compensate for these shortages by providing for temporary immigration by farm workers and seasonal low-skilled workers, and for permanent immigration by high-skilled workers. A lack of legal immigration channels. The ineffectiveness of current employer sanctions for illegal hiring. This allows immigrants who are in the country illegally to easily find jobs. There are three reasons for this ineffectivenessâ€”the absence of reliable mechanisms for verifying employment eligibility, inadequate funding of interior immigration enforcement, and the absence of political will due to labor needs to the United States economy. Another reason for the large numbers of illegal immigrants present in the United States is the termination of the bracero program. This bi-national program between the U. The program was designed to provide legal flows of qualified laborers to the U. Many Mexicans deemed unqualified for the program nonetheless immigrated illegally to the United States to work. In doing that they broke both U. The change in

law was not accompanied by a change in economic incentives for Mexican workers and the American growers. For low-skilled workers, temporary or seasonal legal immigration is easier to acquire. Mexican nationals, in particular, have a very low financial cost of immigration and can easily cross the border. Even if it requires more than one attempt, they have a very low probability of being detected and then deported once they have entered the country. They state that the assistance includes advice on how to get across the U. The Mexican federal government also issues identity cards to Mexicans living outside of Mexico. The guide told immigrants where to find health care, how to get their kids into U. The comic book does state on its last page that the Mexican Government does not promote illegal crossing at all and only encourages visits to the US with all required documentation.

2: Immigration Court Practice Manual | EOIR | Department of Justice
