

## 1: Public space - Wikipedia

*A public place is generally an indoor or outdoor area, whether privately or publicly owned, to which the public have access by right or by invitation, expressed or implied, whether by payment of.*

This is not to say that the government can control what one says in their own home or to others; it can only control government property in this way. The concept of a public forum is not limited to physical space or public property, for example, a newspaper might be considered a public forum, but see forum in the legal sense as the term has a specific meaning in United States law. Parks, malls, beaches, waiting rooms, etc. As this does not exclude any specific group, it is generally not considered a restriction on public use. Controversy regarding restrictions on use[ edit ] Leyton Marshes , London , an example of land with long established rights of access, and equally long-standing restrictions Public space is commonly shared and created for open usage throughout the community, whereas private space is individually or corporately owned. The area is built for a range of various types of recreation and entertainment. The physical setting is socially constructed , which creates a behavior influence. Limitations are imposed in the space to prevent certain actions from occurring--public behavior that is considered obnoxious or out of character i. Through the landscape and spatial organization of public space, the social construction is considered to be privately ruled by the implicit and explicit rules and expectations of the space that are enforced. Whilst it is generally considered that everyone has a right to access and use public space, as opposed to private space which may have restrictions, there has been some academic interest in how public spaces are managed to exclude certain groups - specifically homeless [4] people and young [5] people. In fact, by not being provided suitable access, disabled people are implicitly excluded from some spaces. As a site for democracy[ edit ] Human geographers have argued that in spite of the exclusions that are part of public space, it can nonetheless be conceived of as a site where democracy becomes possible. Privately owned public space A privately owned public space, also known as a privately owned public open space POPOS , is a public space that is open to the public, but owned by a private entity, typically a commercial property developer. Conversion of publicly owned public spaces to privately owned public spaces is referred to as the privatization of public space, and is a common result of urban redevelopment. Private-public partnerships have taken significant control of public parks and playgrounds through conservancy groups set up to manage what is considered unmanageable by public agencies. Corporate sponsorship of public leisure areas is ubiquitous, giving open space to the public in exchange for higher air rights. This facilitates the construction of taller buildings with private parks. In one of the newer U. A shop is an example of what is intermediate between the two meanings: The halls and streets including skyways in a shopping center may be declared a public place and may be open when the shops are closed. Similarly for halls, railway platforms and waiting rooms of public transport ; sometimes a travelling ticket is required. A public library is a public place. A rest stop or truck stop is a public space. For these "semi-public" spaces stricter rules may apply than outside, e. Public space in design theory[ edit ] Public space, as a term and as a concept in design, is volatile. There is much conversation around what constitutes public space, what role it plays, and how design should approach and deal with it. Historical shift[ edit ] Historically, public space in the west has been limited to town centres, plazas, church squares, i. Of the thirteen colonies that became the United States, three were comprehensively planned with integrated physical, social, and economic elements. These planned colonies of Carolina, Pennsylvania, and Georgia each placed emphasis on public space, in particular the public square. The plan for Georgia, known as the Oglethorpe Plan created a unique design in which a public square was created for every ward of forty residential lots and four civic or commercial lots. The design has been preserved in the Savannah historic district. The result, however, was more than this. They constituted a legacy of what has been called the cultural infrastructure underlying American public space. It has been recently argued, however, that the democratic ideal of public life through the use of public space has deteriorated. As our cities accelerate towards segregation social, economic, cultural, ethnic , the opportunity for public interaction is on the decline. John Chase writes, "The importance of voluntary and obligatory participation in civic life has been usurped by the consciousness of the arbitrary

nature of assigned cultural meanings and by the increasingly important role that consumption of goods and services plays in the formation of individual identity. That is, modern society has withdrawn from public life that used to inform city centres. Political and social needs, and forums for expression, can now be accessed from the home. It has been suggested that the concepts of public, space, democracy, and citizenship are being redefined by people through lived experience. This has caused the "counterpublics", as identified by Nancy Fraser, [17] to establish their own public spaces to respond to their own concerns. These spaces are in constant flux, and in response, its users restructure and reinterpret physical space. Here, a parking lot has evolved into a scene of intense commercial and social activity. Locals gather here to meet and socialise, sell and consume goods.

### 2: How To Get Permission to Film in a Public Place

*A public space is a place that is generally open and accessible to people. Roads (including the pavement), public squares, parks and beaches are typically considered public space. To a limited extent, government buildings which are open to the public, such as public libraries are public spaces, although they tend to have restricted areas and.*

How To Get Permission to Film in a Public Place 22nd July by Sean Malone After years of working in the corporate video production industry in the streets of Britain and America for clients all over the world, here are my top ten tips for getting permission to film a video in a public place: In the UK there are no laws to prevent anyone filming on public streets. In most states in the USA Trespassing is a misdemeanour; and in order for someone to be considered a trespasser a sign must be posted and the person must be asked by the owner or a Police Officer to leave and refuse to do so. Understand a bit about the law: Trespass on railway property, electricity sub stations and places like military installations is a criminal offence. Unreasonable obstruction of the highway pavement is also a criminal offence. In both cases a successful prosecution would normally depend on you being given and failing to respond to a reasonable request to comply with instructions and exit the area. When filming in London be aware of the Counter Terrorism Act The thing to remember when working on the street is that if you cause a disturbance, obstruction, noise, nuisance, damage, fire, or a health and safety hazard then you are probably breaking a law. Public Liability insurance is widely available and cheap; you need it, so get it. Also, most insurers will be happy to re-issue a certificate to stipulate a specific country, state or borough you must have this when working in the USA. Dress like the public around you. Aim to become invisible: Roll up with a ton of flight cases and a gang of luvvies and you are bound to get noticed. A small HD camera held at waist height will go unnoticed. A bigger camera on a tripod will stand out in a crowd. Act like a Diplomat: The person who deals with: The Diplomat should carry a clip board full of documents: Be nice and polite. Treat everyone with politeness, dignity and respect - and everything becomes possible. A tramp stopped a colleague of mine whilst she was filming near Westminster Abbey in London. She was charming to him and described the purpose of the video she was shooting. It turned out that he was an officer from MI5 and part of a surveillance team who had been watching the crew. Her impeccable manners saved the day and gained us permission to keep on filming. Know whose property you are standing on. Places like public parks, shopping arcades and squares are not public places, they belong to someone. Find out who owns the property and then apply for permission to film. Apply for a permit, or permission to film. The film permission business is booming. Most local authorities, UK and US cities have departments which issue permits to film. Be aware that you may need several permits. As an example, say you decided to shoot some generic street scenes in Denver City in the quarter square mile area between the State Capitol Building and 16th Street. You would need three permits issued by: TIP if in doubt, refer to point 1. Recce the area before the shoot. Good reconnaissance is never wasted. Spend time checking out the area and plan your shoot schedule in advance. TIP If you are shooting and moving around a city, then hire a cab and driver for the day. I hope you have found these tips useful. If you would like to ask me for my advice on a shoot you are planning, please do get in touch with me. Our team has filmed more than 40 years of combined experience producing corporate videos.
