

### 1: Future Perfect by Jen Larsen

*The Future Perfect, founded by David Alhadeff in , is one of the world's foremost platforms for collectable contemporary design. With its strong curatorial focus, the gallery brings together studio-created works, one-of-a-kind and limited edition pieces in a singular, narrative-driven environment.*

National News Future Perfect Tense Future Perfect Tense is used to express an action which, the speaker assumes, will have completed or occurred in the future. It gives a sense of completion of a task that will happen in the future. The patient will have recovered from illness by the next month. This tense is also sometimes used to express completion of an action in future before another activity happens. She will have learnt the Chinese before she moves to China. Past participle 3rd form of a verb Auxiliary verbs: He will have completed his project by Saturday. They will have enjoyed party. She will have bought a new laptop. I will have taken my breakfast. The kids will have played football in the school. He would have finished his task. He would have taken admission in the college. You will have completed you report. She will have started a new job. He will have taken the test. He will have not reached his home. She will have not come here. They will have not written application for leave. You will have not enjoyed the gathering. She will have not brought her papers. The boys will have not eaten their food. They will have not seen us. He will have not received the letter. She will have applied for the post. We will have gone to our home. Will they have helped his friend? Will he have made a plan for his studies? Will she have gone to America? Will they have completed their work easily? Will you have written me a letter? Will he have taken admission in a school? Will she have started her journey? Will they have constructed a new home? Will they have announced the result of the test? Will she have participated in the song competition? Will they have bought a new car? Will he have written a poem? Will she have reached her home? Will she have brought some vegetables?

*The future perfect tense refers to a completed action in the future. When we use this tense we are projecting ourselves forward into the future and looking back at an action that will be completed some time later than now.*

What is the Future Perfect Tense? Definition, Examples of English Tenses Future perfect tense definition: The future perfect tense expresses action that will be finished at some point in the future. The future perfect tense indicates actions that are complete, or finished. These actions have not yet occurred but will occur and be finished in the future. To form the future perfect: The future perfect is used to express: What is it Used For? For actions that will be completed before something in the future: By the time you finish dinner, I will have finished dessert. Tomorrow, he will have run the race. When my father arrives, I will have been ready to leave for twenty minutes. These examples indicate actions that have not yet occurred. These actions will happen in the future. These actions will also be finished, or complete at some point in the future. For actions of duration before something in future: I will have been working for two hours by the time you wake up. Next month, we will have been dating for two years. When you visit Santa Barbara, I will have lived there for three years. In September, my best friend will have served as a librarian for twenty years. The baby will have been walking for one month on her first birthday. These examples indicate actions that are currently occurring AND will continue to some point in the future. Other Perfect Tenses There are two other primary perfect tenses: Present Perfect Tense What is the present perfect tense? The present perfect tense expresses actions that happened at time that is not specific and actions that started in the past but continue to the present. To form the present perfect: Past Perfect Tense What is the past perfect tense? The past perfect tense most often expresses actions in the past that finished before another action also in the past started. To form the past perfect: Summary Define perfect future tense: To sum up, the future perfect tense:

### 3: In the Future Perfect by Walter Abish

*Future Perfect. Finding the best ways to do good. Made possible by The Rockefeller Foundation.*

I will have studied before I take the test. Remember, some past participles are irregular. Also remember that the past participle never changes form in the perfect tenses. I will have written the book before the new year. Will you have bought a house in a year? He will have paid all the debt by October 2. We will have returned from Spain by June. By the time Juan arrives, you-all will already have left. By the time Maria returns, they will have already eaten. For a review of the formation of the past participle [\[click here\]](#). The auxiliary verb and the past participle are never separated. I will not have eaten. You will not have read the book. He will not have written the letter. We will not have learned anything. You-all will not have slept. They will not have arrived. Again, the auxiliary verb and the past participle are never separated. Object pronouns are placed immediately before the auxiliary verb. Pablo will have given a gift to his wife. Pablo will not have given a gift to his wife. With reflexive verbs, the reflexive pronoun is placed immediately before the auxiliary verb. Compare how the present perfect differs from the simple present, when a reflexive verb is used. Me lavo las manos. I will not have washed my hands. For a review of reflexive verbs click [\[here\]](#) and [\[here\]](#). Questions are formed as follows. Will the girls have arrived? Will you have already eaten? Here are the same questions in negative form. Notice how the auxiliary verb and the past participle are not separated. Will the girls not have already arrived? Will you not have already eaten?

### 4: Future Perfect - [www.enganchecubano.com](http://www.enganchecubano.com)

*The future perfect tense is used to describe what will have happened in the future before a different action takes place, or by a specific time. I will have studied before I take the test. He will have completed the task by six o'clock.*

And nothing will be better. And now I realize how much I should try and read more about the subject because I have been struggling with a similar problem. I thought this book touched on the subject pretty well. She is fine with the fact that she is on the heavier side. She believes in herself. Her grandmother always gives her these cards wherein she gives her something in exchange for losing weight. At least, until her grandmother gave her something that she really really wants. She is confident, smart, and knows what she wants in life. She is something I am not. I have been described as ambitious, smart, outgoing, driven, stubborn, and sometimes bossy by people who love me, though that last one is not true. I have a lot of issues with how I look like. Especially how much I weigh. I always find something wrong with myself, even with the smallest things that no one else really cares about. How I should be more confident with what I have and who I am. She is more than capable of doing so herself. And I envy her of that. But she realized what is really more important. I wish I could be more like her. It played a very tiny role. I thought there was going to be cheating but I was so wrong. I thought it was the best way to go about with the story. The plot was pretty easy to follow and straight to the point. This was a book about self acceptance and that is what we got. She was as real as you can get. There was nothing fake about her. All her reactions to the things she went through were realistic. The writing is very easy to get through. There are some great lines on this book. Romance is not a key player in this story. It focused more on the friendship than the romance. The cover is so cute. How realistic the topic this book touched on. She was forcing her to do the thing she wants her to do by blackmailing her into giving her something she wants. I get that it happens. Give the girl some slack. She owes her a lot, but damn, she has to live her own life the way she wants to. It was unfair of her grandmother to blackmail her. But I know it happens not the exact way as it has in the book, but the part where kids or teens are not allowed to choose what they want to be. I could relate to that in a way. I loved this book. I would recommend it to everyone who would like a good contemporary read that would leave you with something to really think about. Jolene is a transgender girl whose parents are really struggling with accept In Future Perfect, Ashley is beautiful, confident, and fat. The person I wish I could have been. This book is about how hard it is to stay true to yourself, to believe in yourself and be brave and proud and strongâ€”but how important it is, and that it is worth it.

### 5: Future Perfect 10 - MIT Technology Review

*The future perfect is a verb tense used for actions that will be completed before some other point in the future. The parade will have ended by the time Chester gets out of bed. At eight o'clock I will have left. Key words: Verb, past participle, tense, preposition The future perfect tense is for.*

Discover how governments are using them to boost efficiency and quality today—and to drive more sustainable and productive societies for the future. March 9, In partnership with World governments have an insatiable need to make incremental improvements in the services they deliver while at the same time tackling the longer-term public sector challenges that limit their socioeconomic potential. As leading nations have discovered, the right use of digital technology is the pathway to achieving both objectives. Successful nations have technology strategies that are both aggressively practical and profoundly aspirational. The WGS reviewed the short list of 10 best-in-practice technology projects in order to select three recipients of its annual GovTech Prize—a recognition of their achievement in creating smart solutions which can inspire all digitally-minded governments. The Government of Things The growth in consumer use of digital devices creates a great opportunity for governments and societies. Using data generated from the Internet of Things IoT , utility companies and transportation departments are improving the way they deliver services, for example: Using Digital Trust to Bolster Civic Institutions Blockchain applications—bitcoin is one— create systems of trust using digital ledgers, limiting regulatory oversight and licensing. In , many governments got serious about using blockchain to enhance the authority and efficacy of their own public institutions, particularly those in emerging markets with traditionally weak governance, for instance: However, some forward-looking governments are using experimental new applications. Reaching for the Moon While Staying Grounded National governments often avoid digital transformation initiatives deemed too cutting edge, as compliance issues, budget constraints, and the pressing demands of constituencies make far-ranging, blue-sky technology experiments impractical, if not politically risky. However, some forward-looking governments are using experimental new applications to address current service delivery challenges, or issues impacting economic sustainability. Ieso offers cognitive behavioral therapy via text-based messaging that takes place in a secure virtual room. The company collects data from sessions and uses machine learning to continue training its therapists in best practices. The farmers and scientists are using these portable, real-time devices to identify the strain of virus destroying their crops, allowing them to proactively fight the diseases. The Development Bank of Japan, a government-owned bank, is the lead investor in ispace Inc. The Hangzhou Municipal Government has collaborated with tech giant Alibaba to create City Brain, a cloud-based AI platform to analyze traffic patterns, reducing congestion levels 10 percent this year by rerouting traffic around backups. These leading govtech initiatives have helped deliver higher quality service to citizens and residents, but more importantly, they fundamentally change societal outcomes, allowing people to live safer, more productive, and more fulfilling lives. This collaboration culminates each year in a global summit that serves as an incubator and an impetus shaping future global trends, with more than distinguished thinkers, officials, and business leaders participating. ### 6: The Future Perfect Tense

*We make the Future Perfect with the auxiliary verb HAVE. The structure is subject + HAVE + main verb past participle (V3). We use the Future Perfect to express an action in the future before another action in the future (eg I will have arrived before you call me).*

Jobanputra, CoinDesk, July "FPV is looking to diversify the sector- a diverse group of people is needed to spur new ideas and new use cases to unleash the full potential of blockchain technology. Jobanputra, BroadMic, April "The early days are what decide the culture of an industry and who gets involved in making the decisions. Jobanputra, Forbes, March "There will be hiccups along the way as this technology rolls out, but I always think of the pent-up demand in the world for self-empowerment. Jobanputra, The Observer, August "One of the reasons I launched Future Perfect Ventures is because we need to see different funds with different cultures out there. Jobanputra, CoinDesk, July "People are incentivized to create value through participation- that is something that is so different from limiting access through legacy technologies. Jobanputra, CoinDesk, January "New technologies including fraud protection, data analytics to assess risk, direct to consumer lending marketplaces and other recent innovations have supplanted the role of the banks and deemed them less and less relevant in the eyes of the millennials. The advent of the blockchain will speed up this process. Jobanputra, The Barefoot VC, July "I believe that cryptocurrencies which are built on blockchain tech emerging as an asset class are just one application of blockchain technology. Jobanputra, The Barefoot VC, November "We need to remember that many questions remain and we have to collectively resolve non-technical components of this emerging technology, including governance. Where all 7 billion people in the world have equal access to information and services, so that all human potential can be unleashed to create a better world. WE KNOWâ€¦ that the best innovations will come from the most diverse teams, and we are funding exceptional entrepreneurs with global ambitions that share our vision and values. We invest early, working closely with founding teams and our network to help build the next generation of impactful technology companies. Here are the stories of some of our entrepreneurs. He saw firsthand the inefficiencies created by multiple intermediaries including Western Union and banking institutions, which extract significant fees for small transactions. With emerging markets rapidly adopting smartphones, Bill saw opportunity in these markets with a blockchain powered app that would provide real-time currency exchange with no transaction fees. An experienced entrepreneur and specialist in consumer behavior with an exit under her belt, she gathered a team of cryptographers and security experts from Rochester Institute of Technology to build Token. We are investing in companies building technology that will be game-changing, ubiquitous and indispensable. Our team has a strong track record of identifying and building next generation companies globally. Below are themes that we are most interested in as we look at the next 10 years. BLOCKCHAIN The PC increased productivity, the Internet democratized access to information, and now emerging decentralized infrastructure is enabling frictionless and trusted transactions across borders â€” between people, machines and enterprises. Within the next 10 years, we will see new business models created that will take advantage of these new networks and from the data created by this connectivity. The blockchain will enable much of this disruption. The intelligent and automated analysis and filtering of this data across industry verticals will enable better and more personalized decision making for businesses, groups and individuals. Machine learning, methods by which machines learn from data patterns to predict behavior, is emerging as an important technology for as more data is being created. As technology usage proliferates and the number of mobile devices exceeds the human population, Human-Computer Interaction HCI will be crucial to the adoption of new applications. From voice to gesture recognition wearables to video, new interfaces will emerge to facilitate HCI. Today, technology platforms are allowing direct connectivity and better information exchange between buyers and sellers, enabling small businesses access to a global market. These peer to peer transactions will power the global economy, and together with new transaction mechanisms, will ultimately transform supply chains and create more efficiency for individuals as well as businesses.
