Subjects Description Labour market flexibility is one of the most closely debated public policy issues in India. Therefore, job creation is sought to be boosted by reforming labour laws. However, the book argues that if labour laws are made flexible, then there are adverse consequences for workers: This book will interest scholars and researchers in economics, development studies, and public policy as well as economists, policymakers, and teachers of human resource management. It deserves to be read by all, researchers, politicians and practitioners in the field who are not swayed by oversimplified rhetoric of labour market reform. *All in the Name of Jobs* is a careful analysis of one of the major economic questions in recent times. After critically evaluating the voluminous literature, the author builds formal analytical models to explain the empirical findings. The book is a valuable addition to the academic and policy discourse. It examines the theory behind labour market flexibility and offers us a macroeconomic perspective that contradicts the one which focuses solely on the labour market without considering the repercussions at the aggregate economy wide level. It is important reading for those concerned about the future of livelihoods and how developing nations should respond to that. This book will have further sobering effect on the supporters of the so-called labour market flexibility as it critically looks at the theoretical arguments that provide justification for flexibility. With a balanced combination of theoretical arguments and empirical evidence the book eminently accomplishes what it sets out to do – to show convincingly that the measures advocated to make labour market more flexible are unlikely to produce the results they are supposed to produce. Previously, he taught at St. He completed his doctoral studies at Jawaharlal Nehru University and his areas of interest include development economics, labour economics, Indian economy and macroeconomics. He has published a number of research articles in many renowned international and national journals including *International Labour Review*, *Agrarian South*: His commentaries on contemporary economic issues have appeared in *Global Labour Column*, *Mainstream* and *Macroscan*. About the Series *Critical Political Economy of South Asia* At a time when countries of the South Asian region are in a state of flux, reflected in far-reaching economic, political and social changes, this series aims to showcase critical analyses of some of the central questions relating to the direction and implications of those changes. Volumes in the series focus on economic issues and integrate these with incisive insights into historical, political and social contexts. Drawing on work by established scholars as well as younger researchers, they examine different aspects of political economy that are essential for understanding the present and have an important bearing on the future. The series will provide fresh analytical perspectives and empirical assessments that will be useful for students, researchers, policy makers and concerned citizens. The first books in the series cover themes such as the economic impact of new regimes of intellectual property rights, the trajectory of financial development in India, changing patterns of consumption expenditure and trends in poverty, health and human development in India, and land relations. Future volumes will deal with varying facets of economic processes and their consequences for the countries of South Asia.

Tax law[edit] Indian tax law involves several different taxes levied by different governments. Customs and excise duties are also levied by the Central government. Sales tax is levied under VAT legislation at the state level. The authority to levy a tax is derived from the Constitution of India which allocates the power to levy various taxes between the Centre and the State. An important restriction on this power is Article of the Constitution which states that "No tax shall be levied or collected except by the authority of law. The Central Board of Revenue as the Department apex body charged with the administration of taxes came into existence as a result of the Central Board of Revenue Act, Initially the Board was in charge of both direct and indirect taxes. However, when the administration of taxes became too unwieldy for one Board to handle, the Board was split up into two, namely the Central Board of Direct Taxes and Central Board of Excise and Customs with effect from 1 January Income Tax Act of [edit] The major tax enactment is the Income Tax Act of passed by the Parliament , which establishes and governs the taxation of the incomes of individuals and corporations. Act was referred to Parliamentary standing committee which has submitted its recommendations. Act is expected to be implemented with changes from the Financial Year " This method allows GST-registered businesses to claim tax credit to the value of GST they paid on purchase of goods or services as part of their normal commercial activity. Administrative responsibility would generally rest with a single authority to levy tax on goods and services. Exports would be considered as zero-rated supply and imports would be levied the same taxes as domestic goods and services adhering to the destination principle in addition to the Customs Duty which will not be subsumed in the GST. Amalgamating several Central and State taxes into a single tax would mitigate cascading or double taxation, facilitating a common national market. The simplicity of the tax should lead to easier administration and enforcement. GST is applicable from 1 July Trust law[edit] Trust law in India is mainly codified in the Indian Trusts Act of , which came into force on March 1, Indian law follows principles of English law in most areas of law, but the law of trusts is a notable exception. Indian law does not recognise "double ownership", and a beneficiary of trust property is not the equitable owner of the property in Indian law. Family law " Personal law[edit] Main article: Dowry law in India Family laws in India are different when Warren Hastings in created provisions prescribing Hindu law for Hindus and Islamic law for Muslims, for litigation relating to personal matters. Recent reform has affected custody and guardianship laws, adoption laws, succession law, and laws concerning domestic violence and child marriage. Though the attempt made by the first parliament after independence did not succeed in bringing forth a Hindu Code comprising the entire field of Hindu family law, laws could be enacted touching upon all major areas that affect family life among Hindus in India. The portion of the fiqh applicable to Indian Muslims as personal law is termed Mohammedan law. Despite being largely uncodified, Mohammedan law has the same legal status as other codified statutes. The contribution of Justice V. Krishna Iyer in the matter of interpretation of the statutory as well as personal law is significant.
