Experience Our Service India has some of the most spectacular and unforgettable rail journeys in the world. Here you experience a simple way to find out everything you need to know in one easy place.

Indian Railway is one of the largest Rail Network in the world. It is owned by the state-owned-company which is undertaken by the rail transport of India. Indian Railway[[Link](#)] is 4th Largest Railway Networks in the world with a distance of more than 92,km of track over a route of 66,km and stations as per the data of the Year Also, more than 1. Most of us in India loves to travel by train than any other transportation. The main reason being that it is less expensive and yet comfortable to travel by. People love to travel with their friends and families to different destinations. And for that nothing could be a better option than a train. The train gives you the freedom of enjoying the journey with your loved ones while enjoying the scenic beauty passing by the window. Maybe this is the reason why Indian Railways has an extravagant network linking the whole country. In this article, we are going to have a closer look at our grand Indian Railways. The origins of the Indian Railways goes straight back to Since then it has grown into a gigantic network. Today, the Indian Railways is the largest railway network in the whole of Asia and the fourth largest in the entire world. Its network comprises of , kilometers of total track running across the entire country with 7, numbers of stations in total. It is the single largest source of employment for the people of India. Until now, it has given employment to more than 2 lakh people. Not only that, but it also generates about 2. Indian Railway was started way back in In , Indian Railway was then nationalized as a 1 Unit, and then it became one of the largest Rail Network in the world. Later on, the growth of the Indian Railways is increased constantly. As per the data of , Indian Railway has more than , Freight wagons, 70, Passenger Coaches, and Locomotives all over the country. Indian Railway control long distance and suburban rail systems on various Multi Guage Network of broad gauge, meter gauge, and narrow gauge. Indian Railway is being functioned in more than 26 states in India, 3 Union Territories and also has International connections with Bangladesh and Pakistan. As per the year , more than 13, Passenger Trains runs in every day. Indian Railways was developed with the objective of improving the whole transport infrastructure in the country. So far, the Indian Railways is quite successful in doing so. The railways have undertaken several projects, in order to improve its services. They have launched new trains, facilitated online services like ticket booking, checking PNR status, and providing meals on trains and much more. The Indian Railways is not to be left behind when it comes to technological advancement. It is successfully coping with the new changes brought by the evolution of technology. No wonder why people rely so much on the Indian Railways while traveling. Now, when you travel by train, there are certain things that you need to know about. Like how to check your enquiry about your reservation, check the train timings or your PNR status, etc. Having knowledge of these things makes it easier for a person to travel by train and avail all the facilities. In case if you have less knowledge about this train-related stuff, we have got you covered. Indian Railway Indian Railway provides employment to more than 1. All the trains have a 5-Digit Number by which they are identified. Indian Railway Zones It is divided into 17 zones, which is again divided into subdivisions. The Number of zones increased subsequently. Firstly, it raised from 6 to 8 in the year , which was further increased to 9 in and afterward it was increased to 16 in the year Each Zone consists of stations and Railway Divisions. Indian Railway Reservation Do you have any plan to visit a trip in the near future and you want to go by train then you have to decide the dates too early to make the reservation of the tickets. Trouble Faced while doing reservation Indian Railways provide various facilities to all the citizens of India at an affordable price. All the people are facing various problems while doing the reservation. In order to do the reservation, you should keep some of the points in mind as given below: As per the rules, one can do the reservation of the journey before days. All the citizens are facing this trouble because of festivals, occasions, etc. How to solve the Problem of Reservation? You can reserve your Train Tickets by keeping in mind the following points: If you come up with the plan on the last minute, then you have to compulsory book Tatkal Tickets. Tatkal Tickets can be booked before 24 hrs of the Journey. So if you want to book tickets early then you also have to book tickets online. Choose the Class as per your requirement. Various Classes available in

Indian Trains are as follows: It provides the best facilities. This Class Price is equivalent to airfare. This Class is only made for the long journey. It also consists of Attendant which will guide the people in their journey. The Sleeper Berths are too wide and are generous. Here you will get various other facilities too. It consists of Personal Coupes where you will get more privacy. Here the berths are generally arranged in two tiers in bays of six, out of which 4 berths cover the width of the coach while the rest two on the other side of a corridor. This Class is being removed from the various Trains and now it is rarely found on any train. If you want to travel for just a Night and you want AC, then this is best suitable for you. Some of the trains contain curtains and reading lights while it will be upgraded in all the other trains in the upcoming years. This is used for Day Travel between the cities. It consists of 4 seats in a Row and generally used to travel between the cities in daytime. There are 10 or more than 10 Coaches attached to the Rake. It consists of 72 Berths. This class may be reserved or unreserved. It was implemented in fewer trains from Mumbai to Pune and in Flying Rancee. There are basically wooden chairs in this class. While currently, cushion seats are being introduced. There is no guarantee that you will receive a seat in this class. It is fully loaded with Passengers. Tickets can be purchased before 24 hrs of the journey time. Now looking back at the History, there was no development in the Railway sector till Then in , the first train was started between Mumbai and Pune. Later on in , Southern Railway Company was founded and then it was registered in the year In , the establishment of the Madras Presidency Began and then in , the first track between the Trichinopoly and Negapatnam was started. In the year , Robert Maitland Brereton has taken control over the development of railways and he started the track from Allahabad Jabalpur in Within Few years, various Companies started their investment in railway projects across the country and thus the development of Railways started. In the year between , Railways were contributing a lot to the whole country. There were about million passengers traveling in the country every year. Also, more than 90 million cargo were shifted using Train every year. Then from , the economy of the railways was decreased to a great extent due to the starting of Second World War. It lasted for 8 years. Later on, in , the complete Railway Systems were undertaken by the Government. It serves as a travel record of a person or a group of people which is stored or maintained in the Central reservation System CRS database. PNR is generated only after the CRS receives full information about the passenger such as his name, gender, age, a contact link, train number, berth preference, journey class, etc. PNR is of great use for people because, with the help of it, one can get updated on their journey or check if their ticket has been confirmed or not and lot more. With the availability of information online, tracking trains with the PNR number has become very easy and convenient. It serves as a great information tool for the people. You can check your PNR status via these three methods: This is perhaps the easiest way to check your PNR status. Just submit a request on the official website of the Indian Railways. Send an SMS on any of these two numbers, following the same format. You only have to type your digit PNR number and send it to the above-mentioned number.

2: Indian Railways Time Table List, IRCTC Schedule, Route, Timing & Trains Between Cities

The train time table contains train timing - from its departure station to its termination station. Halting time for the train at stoppages along the way are also mentioned in the time table. Of what use is the Indian railway time table?

Surprisingly, only few of them are actually aware about it and people can check it online as well as get a hard copy too. A hard copy of the time table not only covers information about the train schedules and their running information but also about the famous and must to visit restaurants and cuisine places too in a city or a town. To check on the Indian Railways time table online, people can get to the IRCTC website, get to the time table link, enter in there the relevant train name or train number, and within a single click, get all the details related to the train without any inconvenience. Adding to this, people can even get to the NTES platform, enter in there the respective train information, and find out all about the details related to the same within minutes. So, get to know all about the trains running schedule and information by checking out the time table first, and according to that make plans further for your holidays or business trips. If you are a passenger traveling by Indian railways on a regular basis, you are aware of the importance of a railway timetable. The surprising part is that many of us do not have any idea about it. So how do we know the railway table and there are various mechanisms in place. Now everything is available at your fingertips with a single click of a mouse. All one needs to do is to log on to the official website of Indian railways. In this book, there are around schedules of the train. You can also find out more about the tourist attractions and the special cuisine of a particular region. You can go through them or in recent times apps services are the next big thing in the domain of technology. Just download one and all the information are in front of you. So, from the above discussion you can pretty well gauge the importance of the IRTC railway time table. The functioning of the Indian Railways a few decades back was far from satisfactory. Ordinary people used to find it difficult to get any information about the trains running from their town. In those days, there were few telephones in towns and calling the railway station for making enquiries about trains, train timings and such things was just ruled out by the common folks. Most of the people would not know how to speak in English or even in Hindi, as most of the railway personnel would generally use these two languages. People had to go all the way to the railway station and enquire at the window. Then too, they could never be sure of the information given as the railway staff too would not be able to say much about the trains and their timings in a distant region of the country. A Dramatic Improvement

â€” This dismal picture changed dramatically with the introduction of the eTime table by the railways and its availability on the official railway sites as also many private services connected with the railway, like TravelKhana. With mobiles getting easy internet connectivity, net surfing became common and popular among a vast population. Now common people can visit numerous web portals of the railways and get all the information they need from the comfort of their home or office and without any problem. You may check online train time table at

â€” [http:](http://) The passengers can get all the train services between any two stations simply by putting the names of the two stations of the railway portal. They can then look for the timings of departure from their station and the timings of arrival at their destination and choose the train best for them. They can also know the route the train takes, the stations on the way, the seat availability, the fare of different classes and the type of train services like express, superfast, duronto, shatabdi, garib rath or sampark kranti. Online Ticket Booking

â€” The booking of the reservation tickets has also become extremely simple. It is no more necessary for passengers to stand in long queues for booking a reservation ticket after trudging all the way to the railway station. They can visit the railway or TravelKhana website, find out the seat availability in the train on the date of the planned travel, book the seat and buy the e-ticket after producing a copy of their identity proof. They can pay for the ticket online on the IRCTC portal and get the confirmed ticket with the greatest of ease. TravelKhana Website

â€” TravelKhana portal can help passengers to check the trains, the train time and availability of seats. For the actual booking of the ticket, the TravelKhana portal directs the passenger to the main www. The passengers, who have booked their reservation tickets for a long journey, can book orders for the quality food offered by TravelKhana at any of the over stations served by the award-winning food-in-train service. The passengers have a varied choice. They have to place the order an

hour before the train reaches the station, where they want the food served.

3: Indian Railway time table pdf

Indian Railways Time Table With Train Schedule And Train Timings With the introduction of online Train Timetable, the whole process of railways booking has become extremely simple and easy. Passengers can book their Indian Railways tickets or learn about different train schedules easily.

Want to know, why it is so important to have a look at the online time table and how it is helpful in turning your holidays in a hassle free and smooth way? Certainly, the department of Railways is been efficaciously managing such a large network with so much efficacy that it is not even reckoned at only national scale but also at international level. Simply by checking out the time table though IRCTC website or any of the other portals assist in planning wisely your travel on one end and on the other make sure to plan it in a way that would not cause any problem at the last minute of time. In India, people love to take a tour of the country via train and in real they give huge preference to train journey over other means of transportation. In fact, if people were asked about their train journey experiences then most of them feel nostalgic to the same, and many of them have different reasons altogether giving preference to the train journey like some like the sound of the running track, some want to mingle up with other travellers, some love to watch other people, different places etc. To check on the list of trains running in between specified destinations, or to know about the train route or schedule and related information, it is proficient to keep a look at the online time table. Just for the information, there are different types of trains that run under the department at present like Shatabdis, Durontos, premium trains, local ones, intercity ones, superfast trains and time table gives an idea of schedule, route, arrival timing, departure timing, halts, and much more of each one of them. It is mandatory to check out whether the train runs on daily basis or weekly basis or on specific days as according to the same, people need to book reservations. If you are confirmed about the train in which you want to travel in, then only you have to do is to enter in the train name or number, and within a click, all information will appear on the same page. It also gives a glimpse of the seats available in the train, as well as in which class of travel so that accordingly and as per the suitability, the reservations could be done. Travel Khana is been engaged into serving fresh and quality food delivery in train services to all passengers who want quality and hygienic food meal while on the travel. Also, other features could be accessed like checking up PNR status or real time running status of the train, knowing about availability of seats in the train, making bookings etc. The time table of trains helps people in comparing ticket prices as well and each bit of information available in them is up to date and reliable. Technology has played a vital role in providing the utter convenience and comfort to not only travellers but also to the department as the number of concerns that were raised earlier has actually come down and people are glad to make bookings, and checking up other information online within seconds. Also, they can now grab a bite of their favorite meal while being on the running train and could make it utterly satisfying in overall. Do you know about the benefits that users can seek by glancing at the time table online of Railways? If not, read on to the following and be aware of the positives. Know about arrival time, departure time of trains. Know about the overall route that the train follows, and where it stops. Make your plans related to travel in advance as per the seat availability and trains running status and its fares. Know about the changes in train routes, schedules and else. Know about premium trains, superfast trains, locals, intercity express and others. Although, few things are not reflected and could not be updated in the online time table like cancellation or delay in the running status of trains due to natural or bad climatic situations or any other mishap, striking staff or likewise. On the other side, to plan your rail journey, time table is the best option to look and consider for and get to know about all the details in one go. Aside from checking out the online time table, people can see the hard copy of time table too available at book stalls at platforms and the department keeps on updating its time table after every 6 months so the information is reliable and handy. In a shell, it is highly recommended to all to do check out the time table before any planning of your train travel, and then as per the suitability make plans. Even, people can fully take the advantage of technology and make their journey even more memorable and happy by ordering the slice of their favorite meal from Travel Khana at any of the station in between the en-route. The company offers plenty of options in both vegetarian and non vegetarian

and even people can relish their taste buds with specialties and regional spices of different places of the country. Nothing is comparable to enjoying and getting up the chance to try out something new of the country in food and also making the most of your train journey. Rail excursions are all about love, fun, excitement, enjoyment, memories and so. Make the most of it, use the technology, access the time table, make your planning a proficient one and enjoy the journey. 4: Indian Railways : Train Time Table

In case, people didn't get tickets in one desired train, they can seek for other trains through time table that runs on the similar route. It is mandatory to check out whether the train runs on daily basis or weekly basis or on specific days as according to the same, people need to book reservations.

FAQ What is Indian railways train time table? Local as well as long distance train time table is the running schedule of a particular train. The train time table contains train timing - from its departure station to its termination station. Halting time for the train at stoppages along the way are also mentioned in the time table. Of what use is the Indian railway time table? It was around when the railway time table was introduced in India. The motive of railway time table is to synchronize the running of trains across India based on their route and halt stations. It made sure that no two trains from the same or opposite direction reached a platform at the same time. The train time table today gives a complete idea about the running schedule of any train in India. What are important terminologies information associated with time table? Some of the terminologies associated with Indian train time table are train name and number, Intermediate stations and Train status. Let us explain these railway time table facts for you. Train name and Number: Each train has a certain number, and they have a specific name tagged against them which may or may not be unique. This information is essential in singling out a train from thousands of others running on that same day. All the stations, which the train crosses along its route are included in a list of intermediate stations. A train might or might not have a stoppage halt at the Intermediate stations mentioned in the list. A check about train status , gives the users an idea about the present location of the train, list of the upcoming stations, expected time of arrival at the upcoming stations and the delay record of the train. Why expected Platform for Arrival is a key information in the train time table? The expected platform information allows the passengers to avoid the last minute hassles. It helps them plan their boarding and de-boarding much better. Junction stations across India have more than five platforms, on an average, and passengers may face last minute problems while running around along with their luggage, children and other stuff. The expected platform information helps the passengers plan out much better. What are the factors that may affect the train time table between two stations? There are various climate and man-made situations which can cause a disruption in the Indian train time table. Trains are heavily delayed during the winter months due to fog and monsoons due to heavy downpour. They are also hampered by road blocks, strikes, accidents en-route, and many other such factors.
