The text qualifies as a compelling educational tool, as it satisfactorily delivers upon its proposition of introducing students to the law by boasting an admirable breadth of coverage in an effectively incremental manner, along with strategic and relevant selections of legal cases which aptly supplement the discussion of concepts. As expressly mentioned in the preface of the text, the book was intended for use by students enrolled in the Maastricht European Law School; readers can expect a predominantly-European centered context. Especially interesting and particularly noteworthy are the jurisdictional comparisons between for example, England, Germany, the Netherlands, and occasionally France. Legal cases included in the text are very interesting and excellently illustrative. *Stevenson* in torts, and *Director General of Fair Trading v. First National Bank* in the realm of contract law were similarly explanatory. As expected of a course book, the text inevitably contains numbered lists, and visual aids that hopefully aid in greater retention of information. In a highlighted section, the main forms of referendum are categorized as mandatory, optional, binding, and consultative. The clear presentation of concepts in the text is remarkably outstanding. All material is consistently clearly delineated throughout the book. In another instance, the civil law approach is compared against the common law approach with regards to contractual performance, and damages for nonperformance. Legal jargons in the text are very distinctly highlighted and explained as they were very first introduced. Their continued usage throughout the text also allows law students to gradually acclimatize to the language. The text explores the antithetical focus of *recours objectif* in contrast to *recours subjectif* in terms of judicial review of administrative action. The text is a feast of immensely interesting ideas. Expressly stimulating also include the tracing of the origin of human rights to the natural law tradition, the post-WWII natural rights movement, and the subsequent internationalization of the rights. The variety of legal remedies introduced are also mind-blowing. The breadth of coverage very notably came at the sacrifice of depth. In another instance, more content, or at least slightly more examples ought to be provided, especially when the coverage of the sole existing examples seemed considerably brief. The supposed further discussions in chapter 13 emerged to be mostly a rephrasing of what had been mentioned in the earlier chapter, and even gave the impression of being repetitive. I received a complimentary copy of this book from Springer in return for this review.

Student lesson worksheet Procedure: Teachers - outlined below are various points to discuss. Adding "real life" examples and ideas are important, as well as a class discussion around each idea. Chaos, confusion, and how our society as we know it would cease to exist are some of the points to discuss. Historically, many philosophers, historians, sociologists, and political scientists have tried to accurately define law. Aristotle - B. He tried to combine moral principles with legal principles into the "ideal", or natural law. Thomas Aquinas shared the "ideal law" view with Aristotle, but defined law as a transcendent law. Law is defined as a rule of conduct or action prescribed or formally recognized as binding and enforced by a controlling authority. Jurisprudence - the formal science of positive law. Legal systems have always been an important part of every society. Legal systems help us take care of conflicts, punish individuals who violate break the law, and solve problems. A Legal System is defined as a set of laws adopted by a society. A norm is a standard or custom shared by members of a group about how they should behave. Norms can be informal or formal law. A sanction describes the techniques for maintaining social control over society. Social engineering is evident today in our society. An example is minority rights. Our legal system is flexible. Disputes arise when there are conflicts between two or more parties, and a solution through the legal system court becomes the only way to settle the dispute. Litigate lawsuit - to carry on a legal contest by judicial process. A defendant is a person required to make answer in a legal action or suit.
