Interview with Elona Washington All too often, we make decisions from a place of pain and fear Click To Tweet When did you realize you had a book or some books inside you? It was my childhood experiences that motivated me to write. As I got older, the choices I made took me down paths which different drastically from my upbringing. It was those choices which finally prompted me to write a book. Why is the theme of this project important? The theme is important because, hopefully, it will help other women ascertain the root of their decision-making. All too often, we make decisions from a place of pain and fear that force us to live with those choices years later. What did you learn about yourself while writing this book? And much of my healing was self-motivated. I never had a traditional support system and learned about myself and life through trial and error. How do you find time to write? This is a funny question. If you could work on a writing project with anyone dead or alive , who would it be? Much of her healing was self-taught as well and our childhood stories are similar. *The Evolution of Beauty*. Lortz One of the biggest lessons I have learned in and since I have been laid off of two jobs is that people have to do what people have to do to survive. Some people can sit on their laurels, confident that they will have a job and money coming in. In *Ivy League Stripper*, Heidi Mattson faces the unfortunate consequence of being accepted to a premier college and not being able to pay the bills for it. Like others in the ranks of the unemployed, broke, or despondent, she is forced to hustle. At first Mattson faces her own preconceptions of working at a strip club. Here she makes much more money and learns the ins-and-outs of the adult dancing profession while still, however, taking the approach of a distant observer. She writes about other strippers and their lifestyles and their quest for more money, to include capitalizing on the male obsession with huge breasts. She writes about some of the shade characters who populate her club on the regular, from mafia wise-guys to depressed cops to socially awkward romantics. While doing what she has to do to pay for her education, she realizes that she is living a life her family, particularly her mother, might not understand. While she is rationalizing her occupation as a money-making decision, she fails to see the sociological impact her dancing has on her small-town, ultra-conservative family. By the end of the book, she is forced to face her family and their preconceptions of her. She has to prove to them that the stereotypes of her profession do not define her and that besides being more street-wise and aware of the shady characters of the strip club industry, she is still the same person and still has the same values her parents strove to instill in her. By the end of the book, Mattson delves into the conflict she has with seizing her sexuality in a culture that worships her in private but is afraid of her in public. While men enjoy her powerful image on the stage, she feels seizing that same confidence and control without the handcuffs and feather boas, of course is looked down upon outside of the club. While women are increasingly more well-received for their brains and intellect, they are discouraged for using their God-given gifts of beauty to their advantage. Meanwhile, being a professional wrestler and selling a violent fantasy is not only acceptable, but glorified. Mattson is a strong, intelligent woman who also happens to be beautiful. In order to accomplish her dreams, make money, and succeed at the capitalistic game we call the American Dream, she uses all of her strengths to her advantage with no shame. For that, she should be acknowledged as a role model. I really enjoyed *Ivy League Stripper*. It was very eye-opening, especially considering Tampa is one of the premier strip club cities in the US. I wonder how many of the local girls who use their bodies to make money have a similar story?
