

### 1: Top 10 Best Baby Books

*Jack's Baby (Top Author) (Harlequin Presents) [Emma Darcy] on [www.enganchecubano.com](http://www.enganchecubano.com) \*FREE\* shipping on qualifying offers. Surprise father! Nina in a maternity hospital? Jack Gulliver was in shock! This was the woman who had walked out on him eight months ago.*

Top 10 Best Baby Books Written by: Alas, your search is over. Baby Memory Book Okay, not a book in the reading sense, but these have to be on the best baby books list. If you have older children and have ever taken the time to sit down with a glass of wine, TV off and spend a quiet hour or so paging through an old memory book, you know. Same applies to giving the little one a head start with her letters. C is for Coco may be the impetus needed to join the professional spelling bee tour, or some other worthwhile scholastic ambition. Bath books, what a great concept. This book written by Phillipe Dubarle-Bossy is made of durable, waterproof cloth and is full of vivid pictures and colorful pages. It also comes with a Velcro strap so you can slap it on the side of the crib, or even use it as a mobile. The psychologists will tell you it helps to build motor skills, sensory perception and all that other psycho-babble. It just feels good. Seuss inclusion in the list is a moral, if not legal, obligation. The greatest body of kids literature in the history of mankind, hands down. By prepared for this one though, it requires parents to participate mimicking various barnyard-like sounds. Not for the shy or skittish. Goodnight Moon Any list of the best baby books must include Margaret Wise Brown; particularly this classic. Of course, the little bundle of joy will be up again in an hour and half, giving you another shot at honing your craft. Love you Forever Robert Muncsh penned this instant classic about 25 years ago. Now, Top 10 lists are subjective as we all know. But I can state, unequivocally, this it the best baby book ever written.

### 2: Top 10 Jack Reacher Books - Book Series In Order

*Best books like Jack's Baby: #1 Marriage by Necessity (Bravo Family, #2) (Conveniently Yours, #2) #2 Duarte's Child #3 Bought for Marriage #4 The Millio.*

I anxiously await each new installment and book time off work just to read them. As he is one of my favourite book characters, I felt for a top list this week I should write my Top 10 Jack Reacher Novels. The Enemy This one visits the past, going back to and Reachers days as a military cop. While the ending sort of fizzles out, the story is still great and Lee Child does a great job at making you picture everything. The mystery is solid, and it was nice to go back and visit Reacher in the early days, prior to leaving the military. An excellent mystery, and some great scenes such as the Reacher bar scene make for a thrilling ride. Reacher kills a guy by punching him in the heart so hard his heart stops. Need I say more? A much more violent and action-packed novel, but which still leads to a very nice and emotional ending. The Affair One thing that impresses me about Lee Child is how well he is able to write different types of books. He can write great thrillers, great mysteries and great action packed books. This one however is a bit more light-hearted, and actually has a fair amount of humour in it. I remember laughing quite a bit reading this. Plus holy crap does Reacher have a lot of sex in this book â€” making up for the last couple of books where he never got any action. I thought I read Jack Reacher books fast â€” but this one I finished in about 61 minutes! The plot setup is excellent, and this is among the upper echelon of Jack Reacher novels. Reacher is not the lone wolf here â€” teaming up with some of his old Military buddies. Plus it has one of the most memorable scenes on the sidewalk where the guy pulls out his gun to shoot Reacher. And then a whirlwind of storyline erupts from that which takes us all the way across the ocean. I always liked the end scene in this as well â€” just some excellent character writing in The Hard Way. Running Blind A controversial choice, as I know many people who hate this book! I thought this was Child at his best in terms of mystery writing, with a fantastic red herring that hooked me. This is one of those whodunnits that even though I know how it ends â€” I still go back and read it time and time again. To think this was Lee Childs debut novel back in , yet all this time later it still stands up. Except when it comes to the best Jack Reacher novel of all time â€” because that one is Persuader without a shadow of a doubt. I kicked him in the kidney. It was the kind of kick that would have sent a football out of the stadium and into the parking lot. It would have cracked a utility pole. It would have put most guys in the hospital all by itself. It would have killed some of them. It had about as much effect on Paulie as a polite tap on the shoulder. He just put both hands on the door frame and slowly pushed himself upright. Turned around to face me. See the full list of Jack Reacher Books and let me know what your favourite Jack Reacher books were below in the comments. Jack Reacher is back! Family secrets come back to haunt Reacher when he decides to visit the town his father was born in. Because when he visits there he finds out no-one with the last name of Reacher has ever lived there. It leaves him wondering - did his father ever live there? Recommendations Every 2 weeks we send out an e-mail with Book Recommendations. Insert your e-mail below to start getting these recommendations. If you see one missing just send me an e-mail below. Featured Author Our author of the month is Canadian author Opal Carew who writes erotic romance novels. Opal has written over novels with multiple book series such as the Dirty Talk series and the Abducted series.

### 3: Popular Secret Baby Books

*Surprise father! Nina in a maternity hospital? Jack Gulliver was in shock! This was the woman who had walked out on him eight months ago.*

I love romance, too. It takes two inherently wonderful concepts and combines them, thereby compounding everything that makes them awesome. I talk a lot about comics and romance. What follows are my top five picks for the best romance comics. Please note that this is a personal list. These are just my hand-picked comics that I feel offer the perfect blend of love and comic book level awesome. For once, Peter Parker being Spider-Man is secondary. That story is unfolding behind the scene, but the real drama comes directly from Mary Jane. As she navigates that world, she makes tough choices and even a few mistakes. More than anything else, though, this series shows how and why Mary Jane came to love Peter Parker so much. The story focuses entirely on chemistry and growth. Anyone from age 8 to 80 can appreciate the romance here. Rogue and Gambit This is a very recent entry on my list, but one that did more than enough to justify its position. It took a well-known romance that had been deconstructed, denigrated, and mishandled for years and effectively rebuilt it into something truly uncanny. She even lets them argue and agonize over them. It gets ugly, but beautiful at the same time. I would go so far as to cite this series a template for how a modern superhero romance can work, even without an iconic legacy. These are flawed characters who have both found themselves playing villainous roles at some point in their history. Them coming together despite all that just feels so right. This series from the late s is a testament to just how strong their romance can be when retcons, cosmic forces, and terrible love triangles are set aside. They want to create a better world for their friends, their family, and their future children. They get to do all of that and then some here. Much of the story takes place in one of the many dystopian futures that plague the X-men, namely one ruled by Apocalypse. They have to navigate this wasteland of a world with only each other to fall back on. As the title implies, though, the story emphasizes the adventure more than the romance. While there are plenty of sweet moments between Cyclops and Jean, their relationship is not the primary focus. If you enjoy adventure with your romance, then this is definitely the series for you. No, I do not care. This particular series takes place during the controversial, but endearing New 52 era of DC Comics. That opens the door for Superman to explore a relationship with Wonder Woman. However, this series makes clear that this romance is no gimmick. This story brands them as a power couple and they do plenty to earn it. Together, they face threats from alien tyrants and renegade Greek gods. Their worlds collide, but they guide each other through. They make each other stronger. They make each other better. They fight as individuals and as equals. This series does nothing to undercut that. However, it does plenty to prove that Superman and Wonder Woman can share a powerful romance, literally and figuratively. Even after DC has undergone extensive retcons and reboots , this series still captures the power of that romance in the best possible way. However, at the heart of this amazing series by Brian K. Vaughan and Fiona Staples is an amazing love story between two characters from warring worlds. That love is very much the driving force between all the conflict and the characters that get caught up in it. Their romance involves more than a few explicit sex scenes, as well as a scene where Alana gives birth to their daughter. Nothing is filtered or polished. The sexy and unsexy parts of their relationship is laid bare within a world that is full of fanciful characters and locales. No matter what kind of romantic you are, these two find a way to check the right boxes. There are many moments of passion, sorrow, and loss. There are also plenty of moments that are funny, cute, and endearing. It has everything a great romance needs and then some. I should offer a fair warning, though. You will get attached to these characters. You will feel it during certain moments. There you have it! These are my top five selections for romance comics. The list may even change as other great romance comics emerge in the coming years. Romance is in every medium and comics are no exception. I would even argue that the romance in comics is under-appreciated and under-valued.
