There are dozens of candidates, even though the Webster essay in that volume is not ostensibly about how to do theology. But many of the things Webster lauded in Barth were transparently things that Webster himself had learned partly from Barth to value and to put into practice, at least aspirationally. It was right around that Webster publications began to catch wider attention as more than just Barth studies. We felt implicated in what he wrote, or at least that we could be so implicated if we took our task seriously. He did not give a rosy view of the theological culture he was educated in. He reports that doctrine was chiefly taught through analysis of problems, particularly the problems faced by those who felt acutely responsible to do their theology under the bleak searchlights of what were taken to be normative modern intellectual developments. I remember this doctrinal-criticism style of academic theology very well. Statement of traditional doctrine, 2. Modern criticisms that show why the doctrine can no longer be maintained in its traditional form, 3. Clever reconstruction move using the latest whatever. That theological style had such a grip on academic theology in the late twentieth century that I very nearly went into New Testament scholarship instead of systematics. I was well aware that academic biblical studies labored under constraints of its own, being forced to masquerade as a merely descriptive, historical science and avoid making truth claims. But at least neutestamentlichers got to keep up close contact with the Bible. Thank God John Webster had worked his way out of the constraints and was beginning to create the space for better theological undertakings. Once I resolved to work in this way, I quite quickly found that the substance and order of Christian doctrine displayed itself as much more grand, and much more comprehensible, than when I had approached it as a series of critical problems. One is that of becoming acquainted with the history of Christian theology, and coming to understand it as the history of the church: The freedom to work this way came from his growing ability to be critical of the critical move. Theological reason is as much a sphere of reconciliation, sanctification, and prayer as any other human undertaking. It seems clear to me that his positive joy in doing theology was the dominant note in his work. It was a major event for the work of systematic theology when John Webster found his theological voice. It feels like a major event that his voice is now silenced.

Posted on March 10th, , by essay The play The Duchess of Malfi which was written by John Webster, a well-known English dramatist of the 17th century, is considered to be a tragic play. Some critics call this literary work a masterpiece while others express their negative attitude to this play. My goal in this paper is to give critical analysis of the play and to prove the fact that violence, revenge and misuse of power can destroy the lives of many people. The main character of the play is the Duchess, a young woman who became a widow being rather young. She lives in Amalfi, a small Italian city. The story takes place in the 17th century. The young woman falls in love with Antonio, a handsome young man who is her steward and wants to marry him. They are very powerful and cruel men who do not want their sister to be happy. However, the Duchess secretly marries Antonio. The author of the play tries to show human relations in the society where money and prejudice govern the life of people. The Duchess marries a man who is of lower status. She does not want to think about wealth. She wants to be happy and to love a good man. He hires another person, Bosola as a spy in order to learn more about the life and intentions of his sister. The second brother the Cardinal favours this idea. The author of the play shows mean and cruel people whose blood relations are ruined. They are the hunters. This theme is developed by John Webster in order to capture the attention of those people around him who have the same vices, who are lost in iniquity and who have dirty intentions. It really is true. In his play The Duchess of Malfi, he not only criticized his society, he proved the fact that cruelty, violence and misuse of power could ruin everything around. John Webster puts the ethical themes on the first place in his play. The readers can judge the main characters according to their behavior and their actions. The Cardinal, the Duchess brother is represented as a corrupt man, who has a powerful position at the Roman Catholic Church. Although he is a representative of the religious organization, he lives immoral life. He does not trust his sister because he hires a spy to learn her intentions. Moreover, he has a mistress. It means that he does not follow the rules of the Church. His character is considered to be the most complex one. His personality is changing in the course of the play. He is a greedy man, a servant who will do everything for his master. Bosola describes his character in the following way: Webster 34 Bosola is a man who can experience guilt. He knew that the brothers of the Duchess were against her marriage and he knew that they could kill her but he did not change the situation. Bosola realized that the fact that he was a true servant of the Duke Ferdinand caused damage to other people. Bosola wanted to be promoted that is why he served the tyranny of his master. However, he understood that everything he did was his mistake. He even said that nothing could change his feeling of conscience, not even all the wealth of the world. Green Bosola is a person who can criticize the society he lives in. This fact proves that not all the people in the society are cruel, greedy, powerful and revengeful. John Webster gives a chance to all the people of his society to change their personalities, to become kinder and more sensitive to the feeling of others. Green It is known that the play is divided into five acts which are closely connected with each other. The readers can see the development of conflict between the Duchess and her brothers in such a way that the story ends tragically. One by one the characters of the play meet their death. Green The Duchess of Malfi is a literary work which highlights the major issues of the society of the sixteenth century. The author showed gender hierarchical system where women take the lower position. Male dominance can lead to serious problems, and even to death. The Duchess is a brave woman who disobeyed the wishes of her brothers, who did not follow the established rules of her society. She ignored social norms and chose her servant Antonio to be her husband. She has a lot of male traits of character because she is not weak, she asserts herself. The Duchess is decisive while Antonio is passive. Antonio cannot make his own independent decisions. The Duchess is always brave and active. John Webster wanted to show a woman who is ready to fight for her happiness, who is not afraid of her brothers and other people of the society. It represents a woman as a powerless creature who takes the lower position in the gender hierarchical system.
