I don't know about the rest of you, but whenever I'm reading a good book, I spend every waking moment wanting to talk about that book. The trouble is, most of the people around me are not reading.

The similarly august California Club was founded in Los Angeles in when "at least 12 of the founding members were Jews. The law applies to all businesses, including housing and public accommodations. Supreme Court ruled that cities may force large private clubs to admit minorities and women. It said that "clubs which serve meals and rent facilities to outsiders are more like business establishments than intimate social groups and therefore have no right to escape anti-discrimination laws. Yorty told a news conference he knew nothing about such a circumstance. Six of the city and country clubs that discriminated in were listed in Los Angeles, five in Pasadena, two in Glendale and one each in La Habra, Long Beach and Upland. Attorney Candis Ipswich said she applied for membership the same year and was rejected because "I was the wrong sex. Peter Dunston, a Washington, D. He was told that "Jews and blacks were not welcome in the club. The two clubs were known for their discrimination against Jews. Wells Fargo Bank banned meetings at discriminatory clubs in October , and Bank of America was also one of the first, announcing moreover that it would not itself maintain such memberships, nor would it sponsor events anywhere "unless all business guests who should attend can attend. But a survey made by the Wall Street Journal in May "indicated that most companies felt any rules could be dodged," primarily by giving employees a salary increase instead of paying their club fees. Dumke and Romberg paid their membership fees with privately donated money, but McCrone used state money for his fees. Some, like Ernest J. Gaines , the first black to be awarded a creative writing fellowship at Stanford University, declined to join because he was "just sort of tired of being the first to go into things," and he doubted he "would have found people with whom he could discuss [Ernest] Hemingway. In the California Club admitted a Jew, Harold Brown , the United States secretary of defense and former president of the California Institute of Technology , "several years after he was first nominated for membership" by Franklin Murphy , chairman of the board of the Times-Mirror Company, and after "a protracted struggle among club members. He said the action was "something of a breakthrough. I personally feel I am a whole citizen now. Avalon[edit] In November , Avalon city officials on Santa Catalina Island asked the city attorney to investigate the all-male Tuna Club after City Council Member Irene Strobel said she had " twice accepted invitations to visit the club in her role as a council member, but she refused to enter by the side or back doors that women are supposed to use. Instead, she went through the front door. A March 14 letter from the club said it "does not and will not discriminate. Cook , chief executive officer of the oil giant Arco , sent a memo announcing that the firm would no longer reimburse executives for memberships in "discriminatory private clubs. Levey said in April that the club had taken steps to recruit non-Jewish members and had "about two dozen" at that time. Alexander , year-old surgeon and former Army colonel. The club also approved Ivan J. A "number of Jews" were said to have been admitted in recent years as well. The all-male club had voted against the idea twice before " in and Robinson, president of the California State Club Association, wrote in a newsletter that "Clubs are under broad attack nationwide. The proponents of anti-club measures consist principally of a relatively small group of strident professional women in metropolitan centers, the anti-Establishment news media, vote-seeking politicians, a few minority leaders, do-gooders, the radical left, and social engineers who would restructure our social system according to their own ideas. Unless the right to select desired members and to exclude unwanted members is unrestricted, the objective of compatibility and congeniality of members cannot be accomplished. The right thus to select and exclude necessarily includes the right to discriminate on any basis whatsoever. An organization to which everyone has the right to belong ceases to be a club in the traditional sense. Dispute over the new " if less well-known " members of such facilities as dining rooms, golf courses and health clubs has also marked the integration of other clubs in Los Angeles and elsewhere. It dropped the suit when the club agreed "to admit women to the restaurant at all hours and make the rules less restrictive to women golfers. Club president Donald E. Butler said the decision was made by "a group of rational individuals trying to do the right thing. In a separate

category of non-resident members, the vote was to But Betty Bryant Morris, associate counsel at Union Bank , found treatment of her membership application "raised suspicions among some that the club has no real intention" of taking a woman as a member. The city attorney in January of that year was preparing a suit against the club to end that practice. Shiner said in June that the Jonathan would thenceforth serve women in the bar and grill, "no questions asked. Gloria Allred was their attorney. Women, including political office holders, "must enter via a side door and stay in the downstairs banquet rooms. Is it better to run alone than join a running club? So why on Earth would you want to spoil all that by joining a running club and having other people rabbiting on in your ear during a steady five-miler? Deciding to join a club is one of the best things that any runner, whatever their level, can do. Club membership can often instigate big improvements in performance and, more importantly, provide enduring memories, experiences and companionship. Not everyone runs to race and clubs are fine with that, but if running to compete is your thing, then clubs provide a range of events from road races to cross country, to get the competitive juices flowing. The vocal and moral support from team-mates can often be the difference between a good and a great run, as can the opportunity to run with and compete against runners of similar or even slightly better ability. Motivation can also be an issue for some and a peek out of the curtains on a cold, wet January night can sometimes result in pyjamas rather than Lycra being pulled out of the wardrobe. Yet knowing that others will be with you to share the experience of pounding the pavements in a howling gale can often be the difference between staying in and getting out the door. Really, nobody cares and there will always be someone else of the same standard. One of the great things about running is the freedom to do it wherever and whenever you like. Surely having to turn up to a specified place at a specified time is asking too much? Joining a club can only enhance the experience of being a runner, whether through competition, group running, support or advice. There really are no downsides. Running can be a great way to escape from the hurly-burly, elbow-in-the-ribs, white noise existence that many of us seem to have. Part of the appeal of running is the ability to lace up a half-decent pair of trainers, find somewhere to secrete your house key and simply disappear out of the door without having to find a ball, bat, racquet, team kit, javelin or whatever other accessory you might require in other sports. Go out for a run on a Sunday morning and head into the city to see it as it appears for only those few hours a week, when even our biggest metropolises seem to be taking a breather on the morning after the night before. Or do few miles somewhere surrounded by green space, try to spot some wildlife and lose yourself a bit. Forget about who might be tweeting what, the flashing red light on your BlackBerry and the day-to-day grind, put some music on if you like, and go outside to run how you want. Michael Cavanagh Have you joined a running club? Has it helped you, or did you find all the chatter and the group running too much to bear? Let us know in the comments below.

Now, Brazil appears to be following a global lurch to the right. It is tempting to conclude that Brazilians have changed their ideological stripes and are embracing authoritarianism. For many, the elections pulled the veil off a resilient tradition of Latin American strong-man rule. This is the wrong narrative. Lula implemented progressive social policies while pushing economic growth. His political heir in , Dilma Rousseff, was poised to carry on the legacy. In the past few years, Brazil has endured one shock after another. The package of social progress and economic growth came undone. Rousseff tumbled in disgrace and was eventually impeached. The police arrested Lula under corruption charges; he is now serving a year sentence. The economy went into a tailspin. In this first round of voting, Bolsonaro fell short of an absolute minority, with 46 percent of the votes, while the PT candidate, Fernando Haddad, got 29 percent. As in the United States, there is plenty of hand-wringing over bitter ideological polarization, and the death of a reformist model. But is this what happened? While it is true that a Bolsonaro government will lurch to the far-right, most voters were repudiating the political class across the ideological board. All established parties took a pounding. Only eight of the 38 senators up for re-election kept their seats. Voters also repudiated old right-wing politicians. The party of the outgoing conservative President Michel Temer lost seven senate seats. It got decimated in the lower house, where many minor parties won seats. None commands a majority in Congress. Since , Brazil has been mired in an agonizing economic crisis. The unemployment rate has hovered around 12 per cent. In some cities, among them Rio de Janeiro, drug wars have engulfed shantytowns and the army has been sent in like an occupying force. This heightened the sense of uncertainty. The current economic crisis is the offspring of a political crisis. Its signs surfaced five years ago, when protests against the PT government of Dilma Rousseff gripped Brazilian cities. The spark was a jump in bus fares in June, But what started as focused outrage at lousy service, endemic traffic, and rising costs spiraled into mass demonstrations that shook the government to its knees. This brought out new protesters. Left-wing activists, trade unions, and small political parties joined the fray calling for more progressive policies. This only magnified the scale of the demonstrations. Some grew to more than one million protestors. Eventually, the streets became a stage for a struggle between rival groups of protestors. What united the disparate groups was not ideology. The slogans and style of protest displayed a mosaic of dissatisfactions, political beliefs, and demands. Since the protests, there has been an effort at cleansing the political system. Ironically, this has had perverse effects. Although corruption trials have put many elected officials behind bars, the trials did not restore faith in public administration. Rather, they made many citizens feel like the whole democratic system was on the take. The right wing pounced on the opportunity posed by this mass disenchantment. Conservatives fulminated about the state inefficiency and corruption scandals that touched all major political parties. They lionized new leaders as "incorruptible," "efficient," and "moral. They are judges, military officers like Bolsonaro a former captain, whose own legislative record is best known for its invisibility and, yes, businessmen. What started in the streets in reached the polls last weekend. The current combination of an economic crisis and a vanishing confidence in government is toxic to democracy. These are conditions that blowhards who promise to restore order with iron fists and swamp-draining rhetoric thrive upon. Though Bolsonaro waxes nostalgic for the days of military rule, the upheaval of the past five years was not driven by a popular desire to restore autocracy. The majority wantedâ€”and wantâ€”better and democratic government. A last week polls confirmed that 69 percent of voters see democracy as the best regime for the country. There is no question that the global rise of chest-thumping politics has now found another champion in Brazil. But this does not necessarily mean the end of democracy and a rise of authoritarianism. At least, not yet.
