Sep 16, JFN rated it it was ok I picked up this book on the recommendation of an acquaintance whose taste I trust. And in reading the dust jacket flap, I was immediately drawn in by the idea of the book: The book promised to be witty and biting, an unforgiving look at family dynamic. For sure there was some great language in here. Some sharp observations about disappointment and growing up and lo I picked up this book on the recommendation of an acquaintance whose taste I trust. Some sharp observations about disappointment and growing up and loss and fucking up that leaped off the page. And I really appreciate that and am glad I read this book for that alone. It was contrived and hollow. And the characterization was flat, the characters all cardboard cutouts stuffed into traditional family pigeon holes. The charming fuck up little brother. The angry older brother. The bitchy, harried older sister. The aloof brother in law. There was a lot of wize-cracking and mutual disrespect and dismissiveness, but none of it came across as at all genuine or charming. I also wonder if the author has really experienced the death of a parent, as the characters in this book have. The grief is conspicuously absent. I just learned that this book is being adapted for film, and this comes as no surprise to me. In fact, the entire time I was reading this book I had the sense that Tropper wrote it with the goal of getting optioned, and that kind of pisses me off. This was a marginally fun read, not bad, not great, kind of interesting in some places, but all in all lightweight strange considering the subject matter and, ultimately, kind of a throw-away read. I wanted -- and expected -- more.
