

1: Oxford World's Classics (books)

Kim by Rudyard Kipling - Full Version (Annotated) (Literary Classics Collection) G Books Introductory notes and a general timeline of Kipling's era, and a few other extras, but no illustrations.

Lots of them are terrible. A very few are good. Unfortunately, the reviews for Kim are amalgamated into one big group of reviews, and so finding the best one to buy is difficult - near impossible. And so I make this review. Well -- and I do have an edition available for the Kindle myself. Since I first made my review of kindle editions of Kim back in , many new editions of Kim for the Kindle have appeared, and many of the old terrible ones have vanished from the Amazon catalogue. First, the ones that have a good quality of text and formatting. All of these have proper typographic quotes and dashes, and italic text where they should. They also have reasonable or good paragraph formatting. Occasional typos, probably only a few more than in the printed book. This edition also comes with an introductory essay, but opens to that, rather than the start of the actual text of Kim. This text is based on the revised text of the American Burwash edition, itself based on the English Sussex edition. No illustrations as far as I can tell. This is a good, plain if overpriced edition, but nothing really to recommend it. Italics, curly quotes and proper dashes, of course. No real extras - a paragraph or two about Kipling is all, really. No illustrations or annotations. But poor formatting for the chapter starts. It has superscript numbers in the text that refer to a glossary at the end, but the superscripts are not hyperlinked. There is an introduction, and a map illustration. This text is based on the original version. Lockwood Kipling Durrant Publishing I believe that this is the cleanest version of the text available, i. It follows the Sussex edition rather than the American Burwash version as the ePenguin version does. So British spelling throughout. There are ten illustrations altogether, and the cover image is a detail from one of them. The illustrations are just April been updated to a higher resolution x No essay about the text though. And the Penguin editions have more footnotes, I think. As you have probably guessed: Proper quotes, italics, dashes, but often open quotes are used for closed quotes or apostrophes, and closed quotes for open quotes. The unusual character u with macron is included as an image rather than as a character, and so does not scale with the other letters. Occasional OCR errors e. The footnotes in the introduction are not hyperlinked. A nicely linked table of contents. The text gives a blank line between each paragraph, as well as indenting the first line, and some of the extras could be formatted a little better. There are some odd errors in it: Having said that, it does have italics and typographic quotes and proper dashes. It even has the correct u with macron character. Paragraphs all have a first line indent, even the first in a chapter. But the chapter verses and verse in the text is nicely done. According to the table of contents, it has some extras at the end, but no illustrations, and no extra annotations that I could see. Proper quotes, italics, dashes. The text gives a small space between each paragraph, as well as indenting the first line. The verse formatting is quite good. Since I first wrote this review, Amazon has, thankfully, deleted many of these editions. But, alas, several more have been added. For all these, I downloaded the sample, and compared against both a printed copy and my edition. Not that it usually took very long. Large gaps between paragraphs. Older version of the text, with some typos dried for fried, for example. It does have a little bit of biographical and other info at the front. A first line indent and no space between paragraphs. No illustrations or annotations that I could see in the sample. There is an introduction. But curly quotes and em-dashes. The usual errors in the text pincers for pence, etc. Neelkanth Prakashan No italics. No Publisher Given No italics. A first line indent and some space between paragraphs. Illustrations at the start of each chapter. No extra annotations that I could see in the sample. No Publisher Given No italics in main text. A first line indent but also a full line space space between paragraphs. No annotations that I could see in the sample.
