On average, they find its reliability satisfactory. Its users give it a medium ranking in terms of efficiency. Sponsored Links Manual abstract: The top closure of the "Perfect Froth" attachment see figure 18, part A. If this tiny hole gets clogged, "Perfect Froth" will not work properly. Therefore, never immerse the top closure in milk or froth. All parts should be rinsed in warm water. If the small suction opening in part A is clogged up, it can be opened with a fine needle. Cleaning the Drip Tray s The overflow grid can be cleaned by removing the grid see figure Cleaning Before cleaning, turn "off" the machine, unplug it, and allow it to cool down. The machine can be wiped clean by using a damp cloth. Clean the brewing head with a damp cloth and remove ground coffee. If there is water left in the boiler chamber, let the machine cool down, remove all loose parts and empty through the top opening by turning upside down. Cleaning the Steam Nozzle Clean the steam nozzle each time after you have immersed it in the milk, otherwise the inside of the nozzle becomes clogged and the milk deposits on the outside harden and become difficult to remove. Remove all milk particles using a sewing needle and rinse under the faucet. Replace nozzle tip making sure to screw it on tightly. Wipe off the outside of the nozzle with a wet cloth. Hold the wet cloth very close to the tip of the nozzle and open the steam valve. Let the steam escape into the wet cloth for one or two seconds, then close the valve Ease of use The users were asked the following question: The reviews rough results are presented in the following graph:

3: Krups Espresso Machine and Coffee Grinder : EBTH

I've also had this problem with the Krups 'Il Primo' - reduced steam for frothing of milk but plenty of espresso. Diagnosis: over many uses, a residue of dried milk plugs the interior of the steamer tip.

Sponsored Links If this document matches the user guide, instructions manual or user manual, feature sets, schematics you are looking for, download it now. The glass carafe has markings for 2 and 4 cups: NOTE It is very important to fill only the amount of water you need into the boiler. Place carafe lid on carafe so that the lid opening points towards the pouring spout of the carafe see figure 9. The water will then be forced through the ground coffee into the glass carafe or cups. It will take approximately 30 to 60 seconds after turning the machine on for the steam to come out of the steam nozzle. Proceed with steps 4. When all steam is released, close the steam release knob and turn off the machine. The frequency depends on the hardness of your water and how often you use the espresso machine. Before descaling, the brewing sieve on the brewing head must first be screwed off. Remove all lime and coffee residues from the brewing sieve and the brewing head. For ecological and health reasons, we recommend the exclusive use of biological materials such as citric acid, which can be obtained from KRUPS Consumer Service Department or drugstores. Dissolve 2 tablespoonfuls of citric acid in 10 fluid ounces of lukewarm water and pour it into the boiler container. Put one receptacle under the brewing head and another under the steam nozzle. Allow the descaling solution to run out of the espresso outlet and the steam nozzle. After each brewing cycle, switch off the appliance and allow the appliance to cool down. CAUTION Should significant amounts of coffee drip onto the warming plate after the removal of the carafe, it is usually an indication that the seal in the filter holder is missing or defective, in this case call the KRUPS Consumer Service Department at and they can assist you. It is also possible that too much ground coffee has been placed in the filter paper. This causes the water that jets into the filter cone to overflow between the filter and the sides of the filter cone. Lastmanuals, for instance, does not offer a translation service.
