June 29, by Kasia Mikoluk Spanish is the second most popular language in the world with nearly M native speakers. Below, we take a look at some of the best ways to learn the Spanish language, and the pros and cons of each: It is a living artifact that changes with time and place. The flavor of Spanish spoken in Peru is drastically different from the kind spoken in Barcelona, Spain. Private lessons from an actual native speakers ensures that you not only understand the rules governing the language, but also the many inflections and variations present in it. Personal lessons is the most expensive way to learn Spanish, but also the most effective. Having a tutor who can correct mistakes, improve pronunciation and relate cultural contexts is crucial to complete mastery of a language. Group lessons are particularly beneficial as you can learn from your peer group who will more or less share your proficiency. The peer group can also be a great source of motivation and competition. Feedback is especially important for learning pronunciation and intricate grammar rules. You can also expect to pay a premium for highly qualified or reputed teachers. Group lessons are a cheaper, but equally effective alternative to individual lessons. Instructional Audio CDs Cost: The truth is that audio courses actually work, but not in the passive manner the marketing material might lead you to believe. Learning any language requires active involvement in a regulated process no matter how simplified that process might be. Even with audio CDs, you will eventually have to put in some serious leg work, especially with a language as linguistically diverse as Spanish. Nevertheless, there are some major advantages of using instructional audio CDs: The manner of the medium ensures that instructional courses eschew workbooks and writing exercises in favour of listening to audio lessons. This is great for beginners just picking up a language. Focus on Real-World Communication: A major disadvantage is that audio courses cannot teach you how to read or write a language. These courses are excellent for tourists and casual learners to pick up the nuances of Spanish, but people who want a more thorough education should look elsewhere. If you find your pace slacking off after a couple of weeks with these programs, consider investing some time in this mind mastery course. Different applications emphasize different learning methods such as the word association method pioneered by Rosetta Stone. Supplemented with regular interaction with an actual native speaker, these software programs can be powerful learning tools because of the following reasons: Interactivity increases engagement with the lesson and keeps students interested in the process. Some programs incorporate games, puzzles and stories to ensure faster learning. Learn at Your Own Pace: Lessons can be stopped, paused and repeated until you are comfortable – an obvious plus. The popular software courses have developed large support communities that help out fellow users. This can be an invaluable tool to not only learn the software better, but also practice language with a peer group. Prominent software programs are also available on mobile and smartphones as dedicated apps. This means you no longer have to be tied to your desktop and can learn on the go. Free A number of websites dedicated to the study of Spanish have emerged in the past few years. These sites offer the dynamic learning environment of private lessons along with the interactivity of software programs. A few popular online resources are: Duolingo is a social learning platform that emphasizes co-learning and motivates students with badges, points and awards for completing milestones. The platform is free at the moment. Livemocha takes a unique approach to learning languages. For every language that you want to learn say, Spanish , you will have to teach someone a language you know in return say, English. MindSnacks creates mobile apps for language learning. Although limited in scope, the apps are fun to use and highly interactive, making them perfect for children, beginners and tourists. Other Methods Besides the following, there are a bunch of other ways to learn Spanish as well, such as: It is easy to find Spanish language groups in your neighborhood that can help you practice and learn the language. Learn from Native Speakers: Programs such as Amerispan. This is an excellent way to not just learn Spanish, but experience Latin American culture as well. Learning Spanish is a lifelong process that requires long-term

commitment. Complete mastery requires that you not only learn Spanish in a classroom setting, but understand its cultural contexts as well. Watching Spanish movies with subtitles, making Spanish-speaking friends, and even living in a Spanish-speaking country for some time are some ways to keep up with the language.

Great book. You may want to buy the edition that has the CDs with it (Learn Spanish the Fast and Fun Way w/4 CDs). Overall the pace isn't too bad but I find they often throw a bunch of nouns in at once (like 10 in a section) and it may take me several days to memorize them before moving on to the next section.

Speaking Spanish gives you access to the world of over million native speakers from Mexico to Argentina to Spain to your own neighbors in the US. That means you can probably make use of the language without even leaving your neighborhood – especially if you live anywhere in the western U. Spanish is considered one of the easiest languages for a native English speaker to learn. The grammar and sentence structure are different from English, but simpler. Because both languages have Latin roots, they also share thousands of cognates – words that sound the same and have the same meanings. Consider this sentence in Spanish – made up almost entirely of Spanish-English cognates: Put it all together and you get: The old restaurant is near the art museum. Not only is Spanish relatively easy to pick up and start speaking, understanding it gives you a huge head-start to understanding other Romance languages like French, Italian and Portuguese. With Babbel, you can learn Spanish without going to classes, hiring a tutor or investing in expensive software. For an affordable monthly subscription, you have access to hundreds of hours of interactive courses that get you speaking right from the first lesson. We add new courses on a regular basis so the opportunities to learn and improve are always growing. And if you own an iPhone, Android, or Windows 8 phone the key to speaking Spanish is already in your pocket. Benefits Having a little Spanish in your conversational repertoire will open up the world to you on multiple levels: As the third most spoken language on the planet, knowing some Spanish can be extremely advantageous for anyone doing business in Spain or Latin America. Closer to home, many American find a grasp of Spanish useful when interacting with employees or coworkers here in the States. Traveling – Mexico has a lot more to offer than spring break, but only if you can talk to people in their own language. The same is true in the rest of Central and South America, where monolinguals can easily get stuck in the pre-packaged vacation zones. Living Abroad – When you speak Spanish well enough to travel without a phrasebook in hand, the idea of staying longer in another country can become tempting. Places like Mexico, Costa Rica and Peru offer opportunities for students looking for a semester abroad, professionals looking for some adventure in their working life and retirees drawn by warmer climates and lower prices. Brain Training – Even if you decide to only learn Spanish as a hobby, knowing multiple languages will keep your brain healthy and nimble, even in old age. This is because knowing another language creates another network of connections among your neurons. The higher your neural interconnectivity, the better your memory and problem-solving skills. Spanish and Latin-American Culture, Unfiltered – The Spanish-speaking world is responsible for gorgeous and delicious arts and culture. What is business Spanish? Is there such a thing as business Spanish? This falls under your soft skills: How well can you interact with business partners? Do you create a good impression when you meet them? Do you feel confident negotiating and striking deals? The only thing that people looking to learn business Spanish have in common is a willingness to skip some of the banalities that you often endure when first learning a language, in order to focus on what is of immediate use to them and, indeed, to their business. This is an important point. Business Spanish may well mean something very different to a salesperson than it will to data analyst. You want to learn Spanish for professionals, but what kind of professional? The questions you should really ask yourself are: What would you like to achieve and in what time frame? And what are the most relevant areas of the language that you would like to focus on and be able to use quickly? Basic Spanish for professionals English natives have the luxury of being able to impress others with their language skills easily. Utter just a few words of Spanish to your fellow professionals and those you are talking with will likely be bowled over by your cultural sensitivity and worldliness. Talking of which, what exactly were you doing during those six hours above the clouds? Aimlessly leafing through the in-flight magazine? Striving to find a comfortable sitting position whilst balancing a cup of non-descript brown liquid on the sorry excuse for a table in front of you? How can technology help you learn Spanish? Modern technology has made knowledge remarkably portable.

As portable as your phone, in fact. Babbel offers a huge range of app-based courses that are accessible through your smartphone, tablet and computer, enabling you to study exactly the areas of language which are relevant to you and your aims. Every course can be downloaded to be done offline, so you can even access them during flight mode. What if you want to be able to give a speech in Spanish? Listen carefully though, because you may even understand the odd word here and there. The English and Spanish languages share some Latin roots, and consequently they also share quite a lot of vocabulary. This is often particularly evident in a business environment, where higher registers are often used and languages have an increasing tendency to borrow words from the prevailing lingua franca – English. A great tip, however, is to study signposting language. What is signposting language? This is the kind of language you would use to structure a presentation or speech in Spanish. Students of business English will often learn phrases like moving on to the next slide, if we take a look at this graph, in addition to set phrases to talk about numerical trends. By learning such set phrases, you can structure presentations without having to learn all the underlying grammar and vocabulary individually. How often do you update your profile? How often do you scroll up and down, pondering career possibilities, considering your next move? At the very foot of your profile is the option to add languages. You can add a language and then evaluate your level, inserting anything from elementary proficiency to professional working proficiency, to native or bilingual level proficiency. Most likely, everyone lies in this section. The pursuit of proficiency in a second language is proof of your willingness to engage with the world. Adding Spanish to your CV will not only go a long way to convincing potential employers of your open-mindedness and willingness to learn, it will also give you the confidence to take on new challenges in the future, and may well also present you with some business opportunities you never would have even previously imagined.

Ways to Learn Spanish About 90 million people around the world speak Spanish as a second language, which brings the total number of Spanish speakers to million. Not surprisingly, there are many ways to study the language: In The Classroom Classroom instruction with a teacher and other students is the most traditional approach to learning a language. Many Americans have already learned some Spanish this way in high school, although often not with the best results. Many people who are motivated to become fluent find that classes offer a good balance between language instruction and chance to listen and speak. Private Tutor Learning one-on-one with a tutor allows for a completely tailored learning experience and more opportunities to practice speaking. Compared to a classroom where the teacher has to split attention among dozens of pupils, private tutoring usually yields quicker results. Audio Courses and CD-ROMs For people with money to burn on learning a language, but not enough time to commit to traditional methods, multimedia courses are a good alternative – whether you practice listening and speaking with CDs in the car, or use interactive courses on your home PC in your free time. The main drawback to these methods is high up-front cost and material that can quickly become outdated. Online Spanish Courses Online learning has made immense progress in the past several years and has become a viable alternative to more traditional forms of instruction. What do the methods mentioned above have in common? They all cost money. For thrifty folks who have a little more patience and motivation than the average learner, there are ways to learn Spanish for free: But be aware, just because someone is a native speaker does not mean they are a good teacher. This can still be a good option once you already know some Spanish and just want to practice, but you must be prepared to teach your counterpart English. Tandems are free for both parties, but a significant time commitment. But immersion is no magic bullet. Before taking the big plunge, you can simulate immersion by listening to Spanish radio, watching Spanish TV and movies and doing multimedia lessons online. Some websites offer free interactive learning material, like Duolingo and Memrise, but programs like these focus on writing and reading at the expense of listening and speaking. They also rely heavily on user-generated content, which means the quality is inconsistent and the accuracy of the information goes unverified. Learning Spanish with Babbel Learning with Babbel costs you less per month than your morning coffee, is ad-free and has been made by a team of language experts, educators and designers – so you are guaranteed a top-quality learning experience for the best value. Here at Babbel we believe that the key to effectively learning Spanish, or any language, is having fun. Commitment and discipline will always be important factors, but real engagement is what helps you to retain information and maximize your learning potential. Rosetta Stone is committed to safeguarding your privacy. Our complete Privacy Policy is available here. Learn Spanish Learning Spanish is not just an attractive endeavor for those looking to broaden their professional and personal opportunities. Speaking Spanish can also be a valuable asset. As the second most widely spoken language in the world, Spanish has more than million speakers and is the native tongue in 20 different countries. The largest population of Spanish speakers reside in Central and South America, but there is also a considerable number of Spanish speakers, more than 40 million , in the United States. Spanish is also the second most widely spoken language in the US, and there are more Spanish speakers in America than live in Spain. Picking up some basics in Spanish is relatively easy for beginners, especially those who speak a language like English, French, or Italian. Languages of the same family often share words that are cognates or have similarities because they are derived from the same mother tongue. Rosetta Stone understands that beginners need to learn Spanish in context , building naturally towards speaking Spanish phrases and gaining confidence with the pronunciation. Learn the Spanish Alphabet and Numbers One of the first steps in learning Spanish for beginners is to tackle the pronunciation of the alphabet and the words that represent numbers. For English speakers, learning the Spanish alphabet is simple because the differences are minor. Some of the letters in the Spanish alphabet will have familiar sounds, while others may be entirely different. For instance, the letter "j" in Spanish would be pronounced as jota, where the j sounds much like a hard "h" in English. One of the most effective ways to learn the building blocks of Spanish is in the context of conversations rather than static vocabulary drills. For instance, in a unit designed to teach numbers, you might practice words like dos similar to the word dose in English or tres similar to trace alongside a real-world situation such as paying a bill or ordering in a restaurant. The advantage to this immersion method is that beginners learn not only Spanish vocabulary, but also get a feel for the flow of the language and develop an ear for the accent. Learn to Pronounce Words in Spanish Focusing on pronunciation rather than vocabulary acquisition is the key to learning to speak Spanish with confidence. Often, language learners may get distracted trying to master long lists of phrases or flashcard decks full of words, but find themselves unable to understand or be understood in actual conversations. Spanish does have some pronunciation distinctions that can make it a challenge for language learners. Spanish has a trilling sound made by pushing air with your tongue against the roof of your mouth. Some language experts encourage beginners to focus on making the "tt" sound in the word butter as the closest equivalent. Honing your pronunciation means getting feedback and making corrections, practicing, and persisting until your mouth can get a feel for how to shape the sounds that make up the Spanish language. Rosetta Stone embeds a patented speech recognition engine called TruAccent into every lesson to provide feedback and recommend corrections to align your accent with that of a local speaker. Developed by scanning and integrating the speech of thousands of native Spanish speakers, TruAccent can be a powerful tool in helping you learn to understand and be understood in Spanish. Here is a link to the audio instead. Learn how to say "What is your recommendation? To broaden your Spanish from beginner to intermediate language learning, it helps to focus on some tactics that can accelerate your understanding of Spanish. Start with Spanish connectors One of the best ways to bridge the gap between acquiring basic Spanish words and being able to speak in conversational phrases is to focus on how to use connectors. Similar to the way we use "and," "but," and "because" in English, Spanish connectors can help you take words you already know and put them together into a more complex idea. He is happy because today is Saturday. Practice Spanish vocabulary with a phrasebook Of course, the key to learning any language is practice. Instead, focus on speaking commonly used phrases in the context of conversations. Rosetta Stone makes this part of your language learning journey easy with a phrasebook that you can quickly reference to find the most common conversational phrases in Spanish. However, language learning is a journey, not a destination. To get the most out of yours, focus on advancing your learning one step at a time instead of striving towards an elusive end goal. Rosetta Stone can help with

plenty of lessons and learning strategies for advanced Spanish language learners. For Spanish, that means learning a handful of verbs ending in -ir, -ar, and -er. Words like comer to eat or hablar to talk have straightforward conjugations. Unfortunately, some of the more commonly used Spanish verbs are irregular, meaning that they have nuanced rules for conjugation. Ser to be is a excellent example of one of the most widely used irregular Spanish verbs. When conjugated it can change from soy to eres, es, and somos. Irregular verbs like these can be memorized, but are also best learned through contextualized practice. Learn gender rules for Spanish All nouns in Spanish have a gender that is either masculine or feminine. And with the help of a few simple rules, you can usually figure out which gender is associated with which noun. For instance, el gato is a male cat while la perra is a female dog, but you can also have la gata female cat and el perro male dog. Mixed groups of people or living things are referred to with masculine gender. Certain endings of words for nouns can also determine the gender of the article. Definite articles are things that are specific. For instance, in Spanish el gato is "the cat" versus un gato which is "a cat". Before you decide which one is the right fit for you, it makes sense to assess your schedule and commitments. While you can learn some basic Spanish by setting aside just a few minutes each day, being confident enough to have conversations in Spanish may take longer depending on how much time you have to devote to study and practice. Here are just a few ways you might incorporate Spanish language learning into your daily routine. Learn Spanish in the Classroom Learning Spanish in a classroom is a traditional approach to language learning, but it can lack some of the ease of engagement and consistency that mobile apps or software can offer. Accelerate Your Spanish Learning with Immersion Techniques Immersing yourself in a language is one of the best ways to accelerate your understanding. Watch Spanish soap operas with the subtitles turned off or listen to Spanish music or podcasts in the car on the way to work. Partner Up to Practice Speaking Spanish The best way to get a deeper understanding of the language and get plenty of practice with having conversations is to partner up.
