LITTLE HEAVEN, by Nick Cutter is a book that had all of the things that I generally love in a horror story: gore, supernatural, dark comedy (the three "heroes"), and action. So why the star rating then?

A person who is excessively fond of reading. Cutter writes some scary sh To this day if I think about The Troop I get all squeamish. In three guns for hire band together instead of killing each other to rescue a boy from a religious cult echoes of Jonestown deep in the woods of New Mexico. What awaits them is much darker and devilish than expected. We know they survive but not unscathed and fifteen years later they are called upon again to return to the site of Little Heaven. Cutter flips the narrative from past to present, as the reader slowly begins to understand what was faced in and what they are marching back into in Although the book has specific time frames attached to it, I felt like the story was in some nebulous time frame with an old timey Western feel. The three gunfighters are all fleshed out with distinct personalities, strengths and foibles. The reader cannot help but be on their side - despite them being killers in their own rights. My favourite was the lead - Micah Shughrue. The Dark Tower series sprang to mind for me and the publisher has mentioned it in the book description. Cutter lists King as one of his favourite authors and influences. That band of misfits against all evil theme sucks me in every time. Cutter has a way with descriptions. Darkness stuffed into his mouth and eye sockets, teeming in his nostrils and perched heavy on his chest. Perhaps a bit too much for this reader. Creepy, chilling and scary as hell. Not for the faint at heart - or if bugs really get to you Read an excerpt of Little Heaven below.

Here is a good tip for all you writers out there: Here is another bit of advice: Good characterization does not equal interrupting the flow of a story to add multiple pages of background information nobody really cares about. In the s story, three mercenaries are hired by a woman to save her nephew from a whacko religious cult in the woods. They encounter a genuinely terrifying presence deep in the forest while traveling to the compound during the night. The creatures haunting Little Heaven are original, yes, but the more you think about them, the more hilarious they seem. If only an editor had thrown it all in a blender before publication and salvaged the substance spattered against the lid, maybe this review would be more positive. Not by any stretch. For one thing, the villain we have here, a psycho preacher named Amos, is basically a knock-off Jim Jones, except Amos lacks all of the charisma required to reach cult-leader status. Not once was I given a reason to believe anybody would ever trust Amos enough to follow him to Little Heaven.

3: LITTLE HEAVEN by Nick Cutter | Kirkus Reviews

From electrifying horror author Nick Cutter comes a haunting new novel, reminiscent of Cormac McCarthy's Blood Meridian and Stephen King's It, in which a trio of mismatched mercenaries is hired by a young woman for a deceptively simple task: check in on her nephew, who may have been taken against his will to a remote New Mexico backwoods settlement called Little Heaven.

Shortly after they arrive, things begin to turn ominous. Stirrings in the woods and over the treetops—the brooding shape of a monolith known as the Black Rock casts its terrible pall. Paranoia and distrust grips the settlement. The escape routes are gradually cut off as events spiral towards madness. Hell—or the closest thing to it—invasives Little Heaven. The remaining occupants are forced to take a stand and fight back, but whatever has cast its dark eye on Little Heaven is now marshalling its powers—and it wants them all. Secondly, and more importantly, I felt in some respects I was reading a Western. So much so I had to go back and check the date that is mentioned at the beginning of the text. It says nineteen eighty rather than eighteen eighty. With a couple of notable exceptions, KC and the Sunshine Band being one, this feels like a western. I suspect my brain is making this connection down to the fact that the main character are all modern day gunslingers. The trio of Micah Shughrue, Minerva and Eb are perfectly realised. There is a complex dynamic that develops between as the plot unfolds. Micah has that near mystical stoic cowboy outlook. He has been to war and seen the dark side of humanity. It has given him a unique outlook on life and insight into the nature of good and evil. Loyal to a fault, and driven by a need to see any task through to completion, he is beyond dependable. Next is Minerva, she is a troubled soul. Minny is full of rage and has unexpressed anger that is slowly ripping her apart from within. Finally, there is Eb. He is the capitalist of the group. For Eb, the job is never personal, it is all about the payday. Snarky, and always ready with a barbed retort, the acerbic Englishman was as a personal favourite. After a short preamble, that establishes the trio, the action moves to Little Heaven. You quickly start to spot a growing sense of unease appearing in the tone of narrative. There is something horribly wrong in what should be an idyllic rural settlement. When Micah, Minerva and Eb arrive they pick on the wrongness of the place almost immediately. Each of them recognise the sinister malevolence that permeates this insular community. His fire and brimstone sermons have an almost hypnotic effect on his followers. You know straight away that Amos is going to snap at some point. It is just a matter of how spectacularly and when. This ticking time bomb of a character adds a nice sense of urgency to proceedings. The narrative uses the neat trick of switching between two different time periods very effectively. A large chunk of the action takes place in the mid nineteen sixties but this bookended with chapters set in nineteen eighty. It is particularly interesting to view how characters have evolved in the intervening years. The three main protagonists are all fundamentally changed by their experiences during their first visit to Little Heaven. Fifteen years of living with their actions has left a mark. A word of warning, if you are plagued by a delicate disposition then I would suggest you might want to give Little Heaven a miss. The horrific elements are delightfully visceral and unrelentingly unpleasant. There is an evil in the backwoods and it is infecting everything, especially the local wildlife. Some force is merging together all manner of critters creating nasty new beasts. This army of wretched by-blows are driven by destruction and death. They must eat, they must consume, they must destroy. It is obvious that Cutter relishes detailing their inherent vileness. This is why the ham sandwich was such a bad idea. There is also some vividly descriptive body horror going on. Characters die in the bloodiest ways imaginable. Nick Cutter deserves an award, he has succeeded in grossing out this jaded old soul. Buried beneath all the horror, there is much more to enjoy. Its impressive when a novel manages to elicit such an emotive response. It might not appear so at first glance but Little Heaven is also a story about loyalty, sacrifice and even redemption. There are a couple of moments that are going to choke up even the most hard-hearted of readers. The ultimate resolution for one of the characters is both heartbreakingly sad yet somehow hopeful in the same breath. Like the kids say “it gave me all the feels. Especially when they write in my favourite genre. I fell into exactly the same trap here. Based on how much I enjoyed Little Heaven, I need to remedy this situation as soon as possible.
