Plot[edit] By , Japan and the United States merge to create a super-nation to combat famine , depleted resources and the increasing extinction in animals caused by the amplification of pollution. As the leaders in world science, the conjoined nations are able to create genetically engineered meat that is enhanced and grown in an unconscious state, which is then slaughtered for consumption. They decide that the quickest way to distribute the food to a worldwide scale is through China, as China interlinks with other first world countries in Europe and Oceania. China then uses their newly found power to their advantage, often overpricing the conjoined nation for its distribution route through the country. This prompts the conjoined nation to contact Russia, who have displaced democracy in favor of a royal family. The conjoined nation enters into a working agreement with Russia to assassinate the President of China, in exchange for Russian occupation of Alaska , which the conjoined nation reluctantly agrees to. As soon as the Russian King arrives, however, he dies due to cardiac arrest at 59, which calls off the treaty. The Prince of Russia hears of the news and immediately suspects the conjoined nation, declaring war by firing nuclear missiles to land inhabited by the conjoined nation. Following the creation of this chemical, billions of people begin to die, leaving scientists dumbfounded at the situation. Babel soon decreases from billions in population, to millions. It is later revealed that the genetically engineered meat previously created by the conjoined nation, reacted to form an inharmonious solution with the purified water. By , the residents work to create the Babel Space Station, which holds the 5 million remaining inhabitants, and left Earth in search of a similar planet. They use the album as a backing track to the queries they have on life, often contemplating the point of finding Paradise, and what it will hold should they arrive. During the journey, they enter into the vicinity of another ship, an out of the norm situation due to the Aquarius III being one of the only remaining ships in current space travel. Thomas soon instructs Thalia to hack the system, before she stumbles upon a damaged audio distress signal located in its interface. Upon opening the signal, it details Christopher Smith, a pilot from Aquarius I, in his final hours, warning future travelers to suspend their journey and to return to where it was they came. Following further travel, they arrive at a planet with similar conditions to what they were searching for and leave the ship. The album concludes with the trio successfully landing to what is now known as Paradise. Composition[edit] Logic was involved with a considerable amount of the production on The Incredible True Story, a move acclaimed by contemporary music critics. The duo were unable to participate to the song, deciding against the reunification of the group. On October 23, , the album and its track list was revealed on the iTunes pre-order page, showcasing an eighteen track long album, clocking in at over an hour. This showcased a slight increase in length compared to his previous album , which only boasted thirteen tracks and clocked in at under an hour. Logic soon embarked on The Incredible World Tour in promotion of the album, travelling to various cities through the United States, as well to Europe and Canada.
