MANAGEMENT ACCOUNTING IN THE DIGITAL ECONOMY Management Control and E-Logistics. Maurice Gosselin. Internet-Based Information Systems in the Not-for.

Oxford University Press, Description Book " 1 online resource xv, p. The Emergence of Accounting Information Networks -- 3. Management Accounting for the Extended Enterprise: Implications for Accounting -- 5. Expenditures on Competitor Analysis and Information Security: A Management Accounting Perspective -- 6. Operations, Purchase and Sales in Hyperreality: Not-for-Profit - For Sale: Management Control in and of an Internet Start-up Company -- Management Accounting in the New Economy: Management Control and E-Logistics -- Management Accounting and the Knowledge Production Process. Nielsen Book Data There is mounting evidence that the deployment of digital technologies by enterprises affects not just their functioning in economic terms, but also mobilizes broader social, institutional, and organizational effects. At a technical level, digitization directly influences organizational processes. Notions of its potential also define managerial pursuits and the search for enhanced organizational performance. Inevitably, digitization impacts the form, substance and provenance of internal accounting information with attendant consequences on the behaviour and actions of decision makers. Knowledge about the influence of digital technologies on management accounting thinking processes and practices is starting to emerge. A variety of issues relating to pricing strategies, cost management and control mechanisms are evident. But the implications for the field are far wider. Aspects of trust, organizational power, cultural shifts, strategization, convergence of product and information elements, and newly perceived contingencies between information dimensions and contextual factors are altering management accounting systems, structures, thinking, and practices. This book explores these and other issues along different planes of reference. The first part of the book consists of chapters that discuss accounting and management control systems and wider structural shifts connected with the advent of digital technologies. In the second section, the contributors analyse organizationally focused shifts occurring concomitantly alongside digital transformations in the economy. The final part of the book comprises chapters that consider avenues of accounting transformation that may be pursued in specific contexts both in terms of practice and as concepts that afford insights into possible management accounting futures. Broadly, the fourteen chapters of this book bring together practical commentaries, conceptual frameworks, and theoretical argumentation and explore wider narratives regarding the interface between management accounting and the digital economy. Management Accounting in the Digital Economy will be of interest to scholars, advanced students, and practitioners concerned with the management accounting and control implications of the growing ubiquity of digital technologies across organizational spaces and economic platforms. Management accounting in the digital economy. Management control and e-logistics / Maurice Gosselin --Internet-based and management control systems and wider.

3: Management Accounting in the Digital Economy - Oxford Scholarship

This book explores the impact of the digital economy on the practice of management accounting. The digital economy is defined as the digital interrelationships and dependencies between emerging communication and information technologies, data transfers along predefined channels and emerging platforms, and related contingencies within and across institutional and organisational entities.

5: MANAGEMENT ACCOUNTING IN THE DIGITAL ECONOMY

Specifically, this study examines the independent and joint effects of subordinate participation in strategic planning and action planning on management control (MC) effectiveness. While these planning processes have been subject to significant research, little is known about the interrelationships between strategic planning and action planning.
