

1: Missouri Assessment Program (MAP) Practice Tests and Sample Questions | Lumos Learning

Test Prep-Online will soon offer the 5th Grade MAP Practice Pack, so that your fifth grader can prepare for the test using NWEA replicated practice tests for 5th Grade, detailed explanations for each section, and plenty of sample questions.

This is the Practice Reading Section. Here is a list with pictures to help you locate the story and article in the Reading Section and Answer Section. Click here [The Mystery of the Maya](#) Read each passage, then refer back to it as needed when answering the questions in the Answer Section. In class, she had to squint to see the blackboard clearly. She had to do the same thing when she read street signs, or when she watched a movie. As the fuzziness got worse, she became more and more worried. It was important for her to see the notes and homework assignments the teacher put on the board. In class, she asked for a desk that was closer to the blackboard. One day, her teacher said, "Carmen, are you all right? Are you having trouble seeing the board? At home, she had to sit closer and closer to the television in order to see the picture. Her mother noticed her squinting as she watched her favorite shows, and she began to get suspicious. Three days later, Carmen had new glasses and instructions from her doctor to wear them all the time. Carmen frowned in the car the whole way home. Her mother smiled and shook her head. The next day, Carmen kept the glasses in her pocket as she walked into the schoolyard. She avoided her friends and stood alone, feeling miserable. Suddenly, she heard her friend Theresa shout. Carmen ran over to the other girls. They all looked for the ring in the grassy area of the playground. Carmen realized that she could search better if she could see better. She took the glasses out of her pocket and put them on. The objects and people around her came into sharp focus. She caught her breath. Everything looked so different! She looked down at the ground and a glimmer of silver caught her eye. It was the ring. As they walked back toward the school building, two more girls from her class complimented her glasses. Now proceed to the Answer Section below.

The Mayan Indians lived in Mexico for thousands of years before the Spanish arrived in the s. The Maya were an intelligent, culturally rich people whose achievements were many. They had farms, beautiful palaces, and cities with many buildings. The Mayan people knew a lot about nature and the world around them. This knowledge helped them to live a better life than most people of that time, because they could use it to make their lives more comfortable and rewarding. Knowledge about tools and farming, for instance, made their work easier and more productive. In ancient Mexico there were many small clearings in the forest. In each clearing was a village with fields of corn, beans, and other crops around it. To clear the land for farms, the Maya cut down trees with stone axes. They planted seeds by digging holes in the ground with pointed sticks. A farmer was able to grow crops that produced food for several people. But not every Maya had to be a farmer. Some were cloth makers, builders, or priests. The Maya believed in many gods, including rain gods, sun gods, and corn gods. The people built large temples to honor the Mayan gods. Skillful workers built cities around these temples. It was difficult for them to construct these cities, because they had no horses to carry the heavy stone they used to build with. Workers had to carry all of the building materials themselves. Today, many of these ancient Mayan cities and temples are still standing. Although the cities that the Maya built were beautiful, and the people worked hard to build them, very few of the people lived in them. Usually, only the priests lived in the cities. The other people lived in small villages in the forests. Their houses were much simpler than the elaborate structures in the cities. They lived in small huts with no windows. The walls were made of poles covered with dried mud, and the roof was made of grass or leaves. Most Maya lived a simple life close to nature. Measuring time was important to the Maya, so they developed a system for measuring it accurately. Farmers needed to know when to plant and harvest their crops. Mayan priests made a system to keep track of time. They wrote numbers as dots A dot was one and a bar was five. The Mayan priests studied the Sun, Moon, stars, and planets. They made a calendar from what they learned. The year was divided into 18 months of 20 days each with five days left over. The Mayan calendar was far more accurate than the European calendars of the time. Around the year , the Maya left their villages and beautiful cities, never to return. No one knows why this happened. They may have died from an infectious disease. They may have left because the soil could no longer grow crops. Archaeologists

MAP ING TEST PRACTICE 5TH GRADE pdf

are still trying to find the lost secrets of the Maya. They are still one of our greatest mysteries. The questions in this section are based on the story or article in your practice Reading Section above. You may go back to the Reading Section to help you answer the questions. Now answer Numbers 1 through 8. Based on the end of the story, what do you think Carmen will do next? She will keep her glasses in her pocket where no one can see them. She will wear her glasses all the time. She will wear her glasses only when she is with her family. What are some of the things that Carmen had to do in the beginning of the story in order to try to see better? Use examples from the story to support your answer. Read this sentence from the story. What is an antonym for the word suspicious?
