

## 1: Federal College of Fisheries and Marine Technology: Depts. & Programmes

*Marine Technology IV (Marine And Maritime) M.a.s.t. is a co-ed four-year high school, grades the marine academy is fully accredited by the middle states association of schools and colleges and heavy industry - narrate.*

Fisheries Technology -Ordinary National Diploma: The National Diploma Programme incorporates three to four months of supervised industrial attachment at the end of the first year or the first two semester of the programme. This is restricted to National Diploma Programme. The curricula are rich with courses which will enable a graduate to do the following: Carryout all aquaculture practices. Employ modern techniques in stocking, feeding, preparation of feed, harvesting an all other associated management practices in fishing enterprises. Construct and operate simple fish processing and preservation equipment. Operate and maintain different types of simple fishing gears and crafts Nets, traps, lines, outboard engines etc. Assist in Fisheries extension and cooperatives. Service fishing boats and engines. Provide leadership in marine expedition. THE GOAL The goal of the ND Fisheries Programme is to produce Technicians who will be able to apply modern technology to cultivate and rear fish and other aquatic animals at commercial level, participate in marine fishing and processing, preserve and market fish in large scale for human and other purposes. The goal of the Higher National Diploma HND programme is to produce Fisheries Technologist who will be able to play leadership role in the application of modern techniques and skills in commercial scale fish farming and marine fisheries and in the processing, preservation and marketing offish and other aquatic animals. These are the original goals but with the passage of time a lot of inputs have been made into the curricula that the products of the department can now venture into many different areas of endeavour such as fisheries extension services and management of living aquatic resources. The general studies courses are taught by lecturers from General Studies Department while elective courses are handled by lecturers from the Department of Marine Technology and Nautical Science. For the achievement of the practical component of the programmes, the department has at its disposal well equipped and well manned laboratories which include Physics, Chemistry and Biology Laboratories, Applied Laboratory, Net Loft, Drawing Room, Concrete Fish Ponds and a fish farm at Igbolomi, Akodo, Lagos, Nigeria. There are also the Navigational facilities ini the Nautical Science Department and Marine Engineering Workshop in Marine Technology Department for Navigational courses and workshop practices, respectively. For easy access to information on Fisheries, the College Library is enriched with books, journals and magazines on Fisheries Technology. Some are engaged by banks as credit officers. Others find jobs as managers of commercial fish farms and ponds. The products of the National Diploma Programme of the department are highly sought after for direct entry universities admission. Available records suggest that the Fisheries Technology programmes of the College are very competitive and compare favourably with what obtains in other parts of the world. Geography, Mathematics, Economics, Physics, and Statistics. The course-work and project will take a minimum of two sessions and maximum of three. The maximum duration of the course should not be more than FIVE sessions. The process of registration shall take two weeks from the day of official resumption. Fines shall be paid for late registration. Materials for registration shall be obtained from the course coordinators. A minimum of a pass in English is also required. The programme is very intensive and requires that prior to graduation; students obtain credit in at least 24 courses. Holidays, pay, welfare and benefits vary from company to company but are generally very good. AT SHORE Many seafarers spend their whole career at sea while others decide to work ashore either in Shipping Companies or in a host of other firms in the marine industry. For most disciplines, courses such as mathematics and the sciences Physics, Chemistry, Biology, Technical Drawing and Geography are taught as foundational courses. These courses are handled by the General Studies Department of this College. The courses have been structured in units in line with the provisions of the National policy on education which makes it mandatory for all institutions to introduce the credit unit system that allows for the transfer of courses completed in one institution to another similar higher institution. The National Board for Technical Education NBTE is vested with the responsibility of laying down the standard of skills to be attained in polytechnics and monotchnics according to the Education National Minimum Standards and Establishment of Institutions

Decree 16 of It also made it mandatory that all programmes of such psot secondary technical institutions should be accredited by the board. These courses form the bedrock of the three regular programmes in the college: These programmes are interdisciplinary in their curriculum content and do require the courses itemized above as foundation courses to enable students have a proper grasp of their professional courses, and curricula and also prepare them for future tasks in their chosen career.

## 2: Marine Technology Education Consortium (MTEC) - Marine Technology Programs

*Marine technology is experiencing rapid change, particularly in the areas of ship design, building and operation. New technologies not only have to be developed but also rapidly incorporated and put into use in order for all organisations involved to remain competitive.*

Mentoring MTS is the leading international community of ocean engineers, technologists, policy makers, and educators. We promote awareness, understanding, advancement and application of marine technology. Let us show you how an MTS membership can support your work and connect you with other leaders in the field. The exhibit hall and technical presentations hall will be co-located allowing for maximum interaction and networking discussions with exhibitors and presenters. In addition, the conference center is located within close proximity of the piers, not far from the exhibit hall, where exhibitors will have the opportunity to showcase their vessels and products for on-water demonstrations. Matt Glencross, a freshman engineering major at St. Scholarship applications for must be submitted by April 15, However, after careful analysis, the MTS Board has determined that voter eligibility as defined by the Bylaws was not followed due to ongoing updates to the member database. Since this discovery, MTS Staff has been diligently working with our database management firm to consolidate and clean up the member records from past versions. We have taken the next step to validate our membership count with financial information and are now confident that the database is accurate and up-to-date. Each of the candidates has been notified and is aware of the circumstances. For this reason, the MTS Board will conduct a new election. A ballot box will be on site at the MTS Annual Meeting per the Bylaws on Tuesday to collect paper ballots; otherwise, electronic ballots will be sent out to all eligible members through eBallot on 6 November with voting open through 5 December. As a reminder, the President-Elect position is a 6-year term 2 years as President-Elect, 2 years as President and 2 years as Past President and the Vice President position is a 3-year term with both positions beginning their terms on January 1, Please keep in mind, only members in good standing can cast a ballot. If your membership has lapsed please renew online by Oct 26; if you experience any issues contact membership mtsociety. CDR Woityra is a seasoned expert in arctic marine issues so this breakfast is sure to be informative and entertaining. Register now for Underwater Intervention ! Underwater Intervention UI is the premier event for the entire underwater operations industry. Be a part of the must-attend event of the year to ensure your position in this competitive and ever-evolving industry. Call for Abstracts for Underwater Intervention The leadership committee for Underwater Intervention UI has issued a call for abstracts for those interested in presenting at the preeminent event for the underwater operations industry. For more details please visit [underwaterintervention](#).

## 3: Marine Technology

*Marine Technology Reporter is the world's largest audited subsea industry publication serving the offshore energy, subsea defense and scientific communities. Subscribe Marine Technology ENews is the subsea industry's largest circulation and most authoritative ENews Service, delivered to your Email three times per week.*

## 4: Kingsborough Community College - Course Sequence

*The November meeting will feature a presentation by Commander William C Woityra, USCG on "Arctic Marine Trends & Latest Technology". CDR Woityra is a seasoned expert in arctic marine issues so this breakfast is sure to be informative and entertaining.*
