Welcome to our Martha Stewart Living category. We sell Back Issues, Used Magazines, Past Issues and Old Mags at competitive prices, most orders ship next business day.

Visiting Phillips Mushroom Farms I love mushrooms. Whenever I go hiking at Skylands, my home in Maine, or in the woodlands of my Bedford, New York farm, I always enjoy discovering and identifying the different wild mushrooms I see along the way. A mushroom is the fleshy spore-bearing fruiting body of a fungus. Not long ago, during one of my trips to QVC, I had some time to visit Phillips Mushroom Farms in Kennett Square, Pennsylvania - a multi-generation family owned business that has been cultivating mushrooms since 1860. The process of growing mushrooms is very interesting and very different from growing other crops. Here are some of my photos - enjoy. The Phillips Family, now in its third generation, is the largest marketer of specialty mushrooms in the United States. The company distributes more than million pounds of mushrooms each year. Phillips Mushroom Farms has a state of the art facility that includes seven-acres under roof with nearly a million square-feet of specially designed growing space. I was fortunate to get an exclusive behind the scenes tour - these growing houses are enormous. The company produces million pounds of mushrooms annually. The facility focuses on providing a superior growing climate for the mushrooms. In each of their giant houses, the temperature, humidity and oxygen content are monitored by a computer hours a day. These are Maitake mushrooms, *Grifola frondosa*. It is characterized by its layers of caps that are curved like spoons. I was able to harvest some Maitake mushrooms to take home for my recent business dinner. Here are Pom Pom mushrooms, *Hericium erinaceus*, growing out of the substrate, or growing medium. It has a mild, sweet taste and pleasant texture that have been compared to lobster or very tender veal. Among its other medicinal benefits, pom pom is best known for its traditional use in treating ailments of the stomach and digestive tract, as well as nervous system disorders. These are Velvet Pioppini mushrooms, *Agrocybe aegerita* cv. Velvet Pioppini - a type of shimeji mushroom, which are distinct for their clustered growth habit. Velvet Pioppini mushrooms are also known as Black Poplar mushrooms and Willow mushrooms. Royal Trumpet mushrooms, *Pleurotus eryngii*, have light brown trumpet-shaped caps resting on tender white stems. This delicately flavored exotic mushroom is also known as the King oyster. Oyster mushrooms include a variety of different *Pleurotus* species and are available in an amazing array of colors and sizes. These oyster mushrooms are dark gray. They have a texture much like their seafood namesake, with a mild pleasant taste. These are also oyster mushrooms in a lighter gray. The oyster mushroom was first cultivated in Germany as a subsistence measure during World War I and is now grown commercially around the world for food. It is related to the similarly cultivated King oyster mushroom. Here is another gray oyster mushroom. The oyster mushroom is one of the more commonly sought wild mushrooms, though it can be cultivated on straw and other media as seen here. It has the bittersweet aroma of benzaldehyde, similar to bitter almonds. And here is an even lighter colored gray oyster mushroom. The colors range from white to gray or tan to dark grayish-brown. The flesh is white, firm, and varies in thickness. And this is a pink oyster mushroom, *Pleurotus djamor*. Pink oyster mushrooms grow in layered clusters like their gray and yellow relatives. Their color is intensely pink when raw and changes to an orange brown color when cooked. Here is a yellow, or golden, oyster mushroom. Portabella and Crimini mushrooms are the more flavorful cousins of the white button mushroom. The Portabellas are allowed to ripen further and open up. As a result, they have a rich, robust mushroom taste and a texture that has been compared to filet mignon. Criminis, *Agaricus bisporus*, are tan to brown in color with a firm, buttery texture. Here they are in a pre-conditioned pasteurized substrate. Here you can see white *Agaricus* mushroom pins in the substrate. They can be harvested after days. Hardwoods such as oak, beech and maple make a great substrate for many types of mushrooms, especially when combined with a bran supplement. Saw dust is often used as part of the substrate material for Pom Pom, Royal Trumpet, and Maitake mushrooms. Hulls can be mixed with hardwood saw dust at different ratios to produce extremely effective and high yielding substrates. This is often done for growing oyster mushrooms. Some of the different grain mixes include wheat bran, rice bran, maize powder, and combinations of the same. Millet is another popular grain used for substrate. Using straw as a

substrate works well for many types of mushroom species and can be much less expensive than other materials. Near the actual growing facility are these painted mushrooms on the driveway leading from the growing exhibit to the store. This is how visitors are guided from one building to the other. The shop is housed in the original family farm home that the Phillips acquired in This well on the back porch of the store is original to the property. It is no longer used, but on this day, we did see water in there. Outside the shop are some of the whimsical ceramic mushrooms that is available at the store. Many of the outdoor mushroom garden ornaments are handcrafted and glazed in the United States by ceramic artisans. Visitors can browse the many books about mushrooms â€” how to grown them, cook with them and use them for their many medicinal properties. And Phillips Gourmet, a wholly-owned subsidiary of Phillips Mushroom Farms, sells this Blended Burger, which is percent beef and percent mushroom, with fewer calories and less saturated fat. For more information about Phillips Mushroom Farms, click on the highlighted link above. How do you like to cook with mushrooms? Share your thoughts with me in the comments section. I would love to hear from you!

At 15, Stewart was featured in a television commercial for Unilever. To help pay her college tuition, she did fashion modeling for Chanel. In 1973, Stewart started a catering business in her basement with a friend from her modeling days, Norma Collier. The venture quickly became successful but soured when Collier alleged that Stewart was difficult to work with, and was also taking catering jobs on the side. Stewart soon bought her portion of the business. Stewart was also hired as the manager of a gourmet food store, the Market Basket, but after a disagreement with the owners at the mini-mall she was forced out and opened her own store. The result was her first book, *Entertaining* December 13, 1974, [41] ghostwritten by Elizabeth Hawes. During this time, she also authored dozens of newspaper columns, magazine articles and other pieces on homemaking, and made numerous television appearances on programs such as *The Oprah Winfrey Show* and *Larry King Live*. Andrew and Martha Stewart separated in 1975 and divorced in 1976. The first issue was released in late 1976 with an initial rate base of \$1.5 million, Circulation would peak in at more than 2 million copies per issue. That same month, Stewart announced in *Martha Stewart Living* the launch of a companion website and a catalogue business, called *Martha by Mail*. The company also had a direct-to-consumer floral business. Stock trading case and conviction[edit] Main article: ImClone stock trading case According to the U. Stewart continued chopping cabbage and responded: She went on trial in January 2002 Waksal, was selling all his shares in advance of an adverse Food and Drug Administration ruling. It came before the Supreme Court of Delaware in 2003 and was ultimately dismissed. She also agreed to a five-year ban from serving as a director, CEO, CFO, or any other officer role responsible for preparing, auditing, or disclosing financial results of any public company. She had been planning to speak at the Royal Academy on fashion and leisure industry matters. The spokesperson said that he was concerned that the assignment to Alderson could be perceived as being vindictive. The People special, Scandals! Instead, with the drive that would make her a billionaire, Stewart took her lemon of a sentence and made lemonade. In addition, during the supervised release, she was required to receive permission from federal officials if she was going to leave the jurisdiction of the United States District Court for the Southern District of New York. However, the most heavily promoted aspect of her comeback was in television. Both shows premiered in September 2003, and both were produced by Mark Burnett. Her prime time *Apprentice* spin-off received poor ratings, [67] which some[who? Martha Stewart was not renewed for a second season. A line of paper-based crafts for EK Success is also in development. The line includes bedding, bath, cookware, and dinnerware. In addition to television and merchandising, MSLO launched a hour satellite radio channel with Sirius in November 2003, on which Stewart currently hosts a weekly call-in show. Stewart also made a special appearance on the comedy-drama series *Ugly Betty*, in the November 16, 2006, episode "Four Thanksgivings and a Funeral", in which she gave her friend Wilhelmina Slater played by Vanessa Williams tips on how to prepare a turkey. The 15, cases to be sold included: Martha Stewart also signed a contract with Costco to offer frozen and fresh food, under the Kirkland Signature label. The deal came about, in part, due to the closing of more than K-Mart stores in the U. In a move from broadcast television to cable, on January 26, 2004, Hallmark Channel and Martha Stewart Living Omnimedia announced a multi-year strategic partnership. It aired on Hallmark for two seasons, before cancellation in early 2006, with the final episode airing on May 11, 2006. She played a private school headmistress in the episode entitled "Learning Curve" airdate April 2004 Each weekly, minute episode covers cooking techniques and basics. Their only child, a daughter named Alexis, was born in 1977. The couple separated in 1978 and divorced in 1979. She stated she was unable to avoid associating Hopkins with the character of Hannibal Lecter. She featured footage of him as a space tourist aboard Soyuz on her television show in 2005. They broke up around February 2006 Stewart stated, "I used to wear real fur, but, like many others, I had a change of heart when I learned what actually happens to the animals". Two television films have been made out of her life story: *The Story of Martha Stewart* and *Martha*: She was portrayed by Cybill Shepherd in both

films.
