Long term potentiation, post tetanic potentiation, depressions. Ans " long term potentiation Inability to carry out any activity without discomfort- NYHA grade 4 Patients with cardiac disease resulting in inability to carry on any physical activity without discomfort. Symptoms of heart failure or the anginal syndrome may be present even at rest. If any physical activity is undertaken, discomfort increases. Rheumatic fever is not associated with Pulmonary stenosis repeat Girl with Syndandem chorea to prove recent infection IOC? MC site of osteoporosis in hemiplegic patient after one year? Head injury with CSF rhinorrhea " conservative managemnt for days? Toc for tension pneumothorax " needle in second intercostal space

### 2: Best online resource for NEET PG, USMLE and medical exams | Qworld

*DAMS Handwritten notes are useful in the preparation of Medical PG entrance examination. It is must require study material for preparation of PGMEET. It is must require study material for preparation of PGMEET.*

The journey of sealing a PG Medical Seat in Government colleges is difficult but it is not impossible. Read on as we reveal some tried and tested secrets to success to help you ace the exam with flying colors. What the examiners are evaluating and looking for in the perspective candidate. The answer to this is profound and explicit at the same time. The test is actually examining how well you understood the subject that you learnt for the past 6 years and how you applied it during your internship. The candidate needs to approach each question in exam the same way; he would treat a patient by careful diagnosis. Once you understand the mind of the evaluators, you will easily be able to study accordingly. Though mugging up the medical jargon is one part, understanding is what will make you stand out among the crowd. Start Early Many students generally ask as to what is the best time to start the preparation. They fail to recognize that they have already done half the preparation while pursuing MBBS. If you are serious during your MBBS and maintaining good notes, your work is half-done. Though, the first two years in MBBS College pass like a wing, third year is high time you got to get serious. Latest by third year, you should start with your PG Medical Entrance preparation side by side. Go Step-By-Step Follow these 3 simple steps to be ahead of the competition: Learn and cover the syllabus in first reading. Strengthen your concept and understanding. Start revision at least 4 months before the exam. Refrain from learning new concepts at this stage Buckle up for the examination a month before. Intensive time management and online test series should be your only priority by now. But once you have taken this leap of faith, ensure that you do justice to your decision. It is imperative that you test your knowledge of the subject from time to time. To do that, make it a point to enroll for weekly test series. On Sunday, the candidate is evaluated with a set of MCQs. This not only makes you test ready but also gives you a reality check of where you stand. It has a multipronged effect and is the golden rule for cracking any entrance exam. The more you attempt, the more you master the game. Say No to All Nighters Refrain from studying during nights as this may make you lethargic. The best time to study is during the morning. Also, avoid studying continuously for long hours. Take breaks after every two hours to refresh and unwind. Group Study Group study has proved to be really helpful for some aspirants. The idea here is to surround oneself with like-minded bunch of people pursuing the same goal. This will also act as a doubt clearing session aiding constructive discussion. Stay Motivated Do not get demoralized in the middle of your preparation. It is very easy to get bored or get bogged down by pressure, half-way through your preparation, but you need to cross this hurdle and shun all negativity to keep going. Do all it takes to give your hundred percent.

### 3: My PG Notes – Notes for Indian PG exams

*Download some free MCQ collections, books notes and other materials for PG Medical Entrance examinations like AIPGMEE, AIIMS, NEETPG, COMEDK, JIPMER Etc. All important subjects books and notes are inc.*

There is a very good reason why it is important. Medical PG entrance exam preparation involves learning and revising more than 15 subjects. This is more to remember than most other competitive exams. Copy a neat small summary with headings. Do not copy a mass of information. Keywords or hot words are a very concise summary that helps improve your memory. Make it a habit to find keywords for all important points. Do not use skeleton prose: This is the usual way of taking notes with headings, subheadings and bullets. This method is everywhere like text books and guides. Make sure that you have hot word column on the left, points on the right and a box for summary at the bottom. Personalise the summary with your own words. Download a PDF copy of note keeping document and print it as many times for your file. This will help better than books because you can keep adding sheets under a particular topic. Click here to download: When you use your own words it encourages active thinking, better understanding and high retention. Try and make questions: Try and make hot words and questions from a topic. Later, create a summary. Then try to answer the questions by hiding the right column. This is the most effective revision method known. Use abbreviations and symbols: Using abbreviations helps to keep the notes brief. Click here to download a PDF with some other useful abbreviations: Abbreviations for Medical PG entrance exam preparation notes Organising notes: Use separate files for each subject. Use File dividers to separate topics. Number and label to help refiling. This is a key goal of note taking. Hence you have to have time for your revision. There is no compromise on this. It is easier to score high with this approach.
