Thank you so much! UofU Patient March 07, Dr. Pannucci saved my leg!! He is beyond excellent in his specialty and I cannot find enough words to explain my gratitude! UofU Patient February 07, Dr. Pannucci and Joanna Manum were both so great. They explained what they were doing and why. Pannucci and his fellow, Alvin. Pannucci has treated me with his incredible talent has a surgeon, and more importantly as a person. I sing his accolades wherever I go and to whoever will listen. Where my recovery currently is, is due to Dr. Pannucci and his talents as my surgeon. UofU Patient November 15, Dr. Pannucci was extremely knowledgeable about my situation even tho I had never seen him before. He explained every aspect very thoroughly. Christopher Pannucci has provided me. I was admitted to the U hospital and taken to emergency surgery 2 days later. I had no idea who Dr. Pannucci, my surgeon, was but after meeting him and talking with him I knew I was in more than capable hands. Pannucci was precise in telling me the medical issue along with what he did during the surgery, and what the plan was for future surgeries to take care of the problem. I had some personal issues at home that only I could deal with and Dr. Pannucci listened to me and understood my needs. He was beyond in his understanding and worked with me so as I could take care of my personal needs as well as taking care of my health needs. I have only worked with one other surgeon that has taken the time to listen to me and to take into consideration what I was saying as they planned their medical care of my physical needs. At my office visit with Dr. Pannucci was exactly the same compassionate surgeon that I dealt with in the hospital. During my office visit after his examination of my open wound he outlined his plan for me very clearly what he expected from me for him to be successful in getting me healthy again. Pannucci needs to be held as an example to all other medical teams he deals with as an exemplary surgeon in his surgical skills, but more importantly how to deal with patients. His residents that work with him need to realize and understand how fortu UofU Patient October 07, I felt the doctor was trying to "sell" me on a procedure that is far more extensive than I want, and I was mortified by the photo book. The pictures of the reconstructions he has done looked so disfiguring to me. I was not impressed with the work I saw in the pictures, and would prefer no reconstruction at all if those photos represent the best the doctor has to offer. UofU Patient Pinnuchi makes me feel safe and secure and well taken care of.
