We at Autogeek would like you all to know that many of us are from the old school of detailing. Our fathers taught us to care for our family cars with a wash bucket, Dawn soap and any old rag or sponge that happened to be around. We did use a chamois to dry with, however! They are the professional athletes of detailing. Science has certainly contributed to car care through the invention of microfiber detailing tools. Autogeek offers a large selection of top-quality microfiber tools for every single detailing job under the sun. Should you need help deciding which one s you need, call us and one of our knowledgeable microfiber experts will take care of you. This new technology is revolutionizing the detailing world. Microfiber is a man-made material that combines two fibers, polyester and polyamide. The polyester gives the material strength and durability, the polyamide allows the fabric to be tremendously absorbent and quick drying. These New upgraded microfiber towels have over , strands of fiber per square inch. One strand of this Ultra Microfiber is 10 times finer than silk and times smaller than a human hair. It is softer, finer and more absorbent than any other Microfiber or conventional cloth available today. And,it absorbs seven times its weight in moisture. Caring for any of these microfiber towels is easy. Wash the cloth in the washing machine with a microfiber detergent like the Pinnacle Micro Rejuvenator or the Micro-Restorer. Line dry or dry in the clothes dryer on low heat. The bulk prices were very favorable I had a couple questions and Jason was very prompt at answering me. Everything was shipped and arrived in the expected timeframe. I will certainly be referring my other friends that are car care nuts to Autogeek.
