

## 1: Health Information for Travelers to South Africa - Traveler view | Travelers' Health | CDC

*Marilyn continues in the ministry in which she became involved in - that of sharing the gospel and a substantial meal with around children in Leseding, the township near her of about 70, with approximately 70 per cent unemployment.*

Ice made with tap or well water  
Drinks made with tap or well water such as reconstituted juice  
Unpasteurized milk  
Take Medicine Talk with your doctor about taking prescription or over-the-counter drugs with you on your trip in case you get sick.  
Hide Prevent bug bites Bugs like mosquitoes, ticks, and fleas can spread a number of diseases in South Africa. Many of these diseases cannot be prevented with a vaccine or medicine. You can reduce your risk by taking steps to prevent bug bites. What can I do to prevent bug bites? Cover exposed skin by wearing long-sleeved shirts, long pants, and hats. Use an appropriate insect repellent see below. Use permethrin-treated clothing and gear such as boots, pants, socks, and tents. Do not use permethrin directly on skin. Stay and sleep in air-conditioned or screened rooms. Use a bed net if the area where you are sleeping is exposed to the outdoors. What type of insect repellent should I use? Products with one of the following active ingredients can also help prevent mosquito bites. Higher percentages of active ingredient provide longer protection. What should I do if I am bitten by bugs? Avoid scratching bug bites, and apply hydrocortisone cream or calamine lotion to reduce the itching. Check your entire body for ticks after outdoor activity. Be sure to remove ticks properly. What can I do to avoid bed bugs? Although bed bugs do not carry disease, they are an annoyance. See our information page about avoiding bug bites for some easy tips to avoid them. For more information on bed bugs, see Bed Bugs. For more detailed information on avoiding bug bites, see Avoid Bug Bites.  
Hide Stay safe outdoors If your travel plans in South Africa include outdoor activities, take these steps to stay safe and healthy during your trip. Stay alert to changing weather conditions and adjust your plans if conditions become unsafe. Prepare for activities by wearing the right clothes and packing protective items, such as bug spray, sunscreen, and a basic first aid kit. Consider learning basic first aid and CPR before travel. Bring a travel health kit with items appropriate for your activities. Heat-related illness, such as heat stroke, can be deadly. Eat and drink regularly, wear loose and lightweight clothing, and limit physical activity during high temperatures. If you are outside for many hours in heat, eat salty snacks and drink water to stay hydrated and replace salt lost through sweating. Protect yourself from UV radiation: Be especially careful during summer months and at high elevation. Because sunlight reflects off snow, sand, and water, sun exposure may be increased during activities like skiing, swimming, and sailing. Very cold temperatures can be dangerous. Dress in layers and cover heads, hands, and feet properly if you are visiting a cold location. Stay safe around water Swim only in designated swimming areas. Obey lifeguards and warning flags on beaches. Practice safe boating—follow all boating safety laws, do not drink alcohol if driving a boat, and always wear a life jacket. Do not dive into shallow water. Do not swim in freshwater in developing areas or where sanitation is poor. Avoid swallowing water when swimming. Untreated water can carry germs that make you sick. To prevent infections, wear shoes on beaches where there may be animal waste. Schistosomiasis, a parasitic infection that can be spread in fresh water, is found in South Africa. Avoid swimming in fresh, unchlorinated water, such as lakes, ponds, or rivers.  
Hide Keep away from animals Most animals avoid people, but they may attack if they feel threatened, are protecting their young or territory, or if they are injured or ill. Animal bites and scratches can lead to serious diseases such as rabies. Follow these tips to protect yourself: Do not touch or feed any animals you do not know. Do not allow animals to lick open wounds, and do not get animal saliva in your eyes or mouth. Avoid rodents and their urine and feces. Traveling pets should be supervised closely and not allowed to come in contact with local animals. If you wake in a room with a bat, seek medical care immediately. Bat bites may be hard to see. All animals can pose a threat, but be extra careful around dogs, bats, monkeys, sea animals such as jellyfish, and snakes. If you are bitten or scratched by an animal, immediately: Wash the wound with soap and clean water. Go to a doctor right away. Tell your doctor about your injury when you get back to the United States. Consider buying medical evacuation insurance. Rabies is a deadly disease that must be treated quickly, and treatment may not be available in some countries. Reduce your exposure to germs Follow these tips to avoid getting sick or

spreading illness to others while traveling: Wash your hands often, especially before eating. If you need to touch your face, make sure your hands are clean. Cover your mouth and nose with a tissue or your sleeve not your hands when coughing or sneezing. Try to avoid contact with people who are sick. If you are sick, stay home or in your hotel room, unless you need medical care.

### 2: South Africa | Teen Missions International

*The Permanent Mission of South Africa to the United Nations has opened a book of condolences for Environmental Affairs Minister Edna Molewa, who passed away in a Pretoria hospital on Saturday, 22 September following a short illness.*

Each year the staff run the annual Boot Camp. One of their biggest outreaches is ministering to Children through a Motorcycle Sunday School Mission. One of the most significant historical events was the inauguration of the Apartheid policy racial separation in . Though the policy was abolished in , the tension is still present. There are 11 official languages in South Africa, including English. There is also a small percentage of Muslims and Hindus. There is also widespread poverty: Has Teen Missions changed your plans for the future? May 1, Has participation with Teen Missions changed your plans for the future in any way? I am ready to stop. My lungs were infected and Here is their account of the trip On Friday, many of the kids came out to greet us. The students organized some games in order to get to know them better. In the evening, we did an open-air program. We began with singing " Tebogo and Mrs. We are very much well-adjusted to our new routines and lifestyle. I enjoy that we stay constantly busy around here. That being said, Emily and I were a bit curious on how Thanksgiving would go. We envisioned the two of us sitting I never get tired of our ministries here. Evangelism and outreach have become easier now that I know how to approach people and what verses to share with them. Preparing for and sharing in chapel has left me with outlines and notes that I can continue to put to use in bible studies and evangelism. They have 82 team members and leaders on four different teams. The teams have worked very hard doing their projects and being a blessing to the people they meet. The four teams have reported people giving their hearts to Christ, and have helped in many projects. They have completed the stage for a church pulpit, dug a pit for the toilet for the church, painted, done door-to-door We envisioned the two of us sitting at our table eating chicken, potatoes, and whatever else we Took both Joy and Jolie to the doctor on Friday and now they are both on antibiotics. This is the 3rd round for Joy and she is still coughing. They did add some steroids for her this time to reduce the swelling she has in her sinuses and lungs. Girls had a better week at school and Friday started Spring Break. She now has a sinus infection and a second, and stronger, round of antibiotics. They had a big feast after church also. They are enjoying relaxing for the school break. Peter came to encourage the students and gave us some encouragement also. Fairly good week for the Shrocks. Not as many problems with illnesses this week and the girls were able to spend the weekend at a friends for a birthday party. We also had an enjoyable time visiting with Doug and Barb before they flew on to Zim. Had a good week helping out here at the base in developing curriculum for Samaritan Ladies and different outreaches.

### 3: Websites of SA Missions

*The exotic beauty and rich history of South Africa will draw you in as you serve with a local pastor and church on your South Africa mission trip, but it will be the relationships that you and your mission group will build with the community members that will mean the most during your mission trip.*

Travel and Transportation Road Conditions and Safety: Road conditions are generally good in South Africa, but the road traffic death rate is nearly three times higher in South Africa than in the United States. The high incidence of road traffic mortality is due to a combination of poor driving, limited enforcement of traffic laws, road rage, aggressive driving, distracted driving, and driving under the influence of alcohol. Use extreme caution driving at night. Mission employees are prohibited from driving after dark outside of major metropolitan areas, except for highway travel between Pretoria and Johannesburg. Traffic lights are frequently out of order. Traffic in South Africa moves on the left, and the steering wheel is on the right-hand side of the car. Under South African law, all occupants of motor vehicles equipped with seatbelts are required to wear them while the vehicle is in operation. Texting or talking on a cell phone without a hands-free unit while driving is illegal. Treat all intersections with malfunctioning traffic lights as a four-way stop. The use of individual metered taxis dispatched from established taxi companies, hotel taxis, and tour buses is recommended. Mission employees are not allowed to use minibus taxis or hail taxis on the street or use a taxi stand. Minibus taxi drivers are often unlicensed and drive erratically. TNCs should not be used to travel outside major metropolitan areas or previously disadvantaged areas. Pick up and drop off should not be done near a traditional taxi stand. The long-distance rail service, Shosholoza Meyl; the rapid rail Gautrain in Gauteng Province; and luxury rail services, such as Shosholoza Meyl Premier Classe, Blue Train, and Rovos Rail are generally safe and reliable, though mechanical problems and criminal incidents do sometimes occur. Mission employees are not allowed to use the Metrorail commuter rail service because of safety and crime concerns. There have been recent reports of fires being set on Metrorail train cars. Mariners planning travel to South Africa should also check for U. September 12, Travel Advisory Levels.
