Southern Jewels Plant camellias to add pop to the cold season As the weather gets cold and dreary, we tend to put away the gardening boots in favor of an easy chair and a good book or plant catalog. Or there should be: What Are Nurse Logs? Being a gardener in shade, I have long been fascinated by logs. I have admired them in nature since childhood. There is something about the sight of one that draws me to it for a closer look; wanting to know about its past life as well as investigate how it keeps on giving even as it takes on a new life. There is nothing that makes you feel cozier than the aromas of garlic, rosemary, potatoes, and whatever else you love to eat. I discovered the beauty of sheet pan dinners a few years ago and have been using them as my go-to for busy days and even for entertaining ever since. Inspired, I painted my own dead tree, and used it to hang wind chimes, lamps, and houseplants summering outdoors. The bright purple was a great accent color in the garden. Various Vinegars Make your own herbal vinegars to add zip to your recipes Here it is winter and I am yearning for the taste of my favorite fresh herbs. I prepared for this moment by making a variety of herbal vinegars in the early fall. It is a great easy way to add a gourmet zip to so many recipes – from salads to meats. Additionally, herbal vinegars can be used for cosmetic uses, medical purposes, plus household uses. Who would have thought you could have herbal vinegars on hand to beat the heat, as well as to battle illnesses and insects. Following Directions Understanding the labels on your pesticides and herbicide In a world of litigation and lawsuits it is no surprise that any pesticide being sold for profit must contain legal labeling. Consumers flock to the stores on Saturdays purchasing an arsenal of weed killers, insecticides, and fungicides, many times not fully understanding what they have bought or how to correctly apply it. How did they get in? You may notice yellowing or dropping leaves, or a sticky substance on the leaves or floor before you ever see a pest. Those are some of the symptoms that may clue you in that your plants have a problem. Some of us moan that Zinnia are too common, while others judge Agapanthus as old-fashioned and boring. Super-Sized Sculptures Throughout the years, I have explored and taken pictures of lots and lots of gardens. I am always amazed and intrigued by the personal touches gardeners add, and lately my eyes have been drawn to selectively placed, oversized sculptures. These super-sized sculptures seem to have a calming effect and perhaps this is why I am so drawn to them in my perpetually chaotic life. These larger-than-life sculptures strategically situated in the garden, without distraction from nearby plants, structures or any other elements, have captured my interest and a good bit of my spare time Focal-Point Plants Have you ever wondered why some gardens suck you in, transporting you to another dimension, your curiosity pulling you around every corner, while others have about as much interest as your sock drawer, leaving no lasting impression? What element is missing? A focal point is that element that is used to draw your eye into the garden. Your gaze will stop at this element. Then your eye will travel to adjacent plants and details that you may not have noticed otherwise. Having a series of focal points, each just visible from a distance, will help guide you through the garden, from one garden room to the next. What makes a plant a focal point? It could be form, color or texture, something that catches your eye that is unique from anything else surrounding it. It is large enough to stand on its own, but you must be mindful of scale. Cactus Collecting This is the year to get hooked by cacti Cacti singular cactus catch the eye of many hobbyists. They are easy and rewarding to grow, fun to display, and readily available. People are often hesitant to grow them because they fear the reputation of these desert denizens. Here are a few tips that will hopefully de-mystify the collecting of cacti.
