

### 1: Tina Louise - So Much More Than Just a Pretty Face!

*More than just a pretty face definition is - being attractive but also having other good qualities, such as intelligence. How to use more than just a pretty face in a sentence. being attractive but also having other good qualities, such as intelligence.*

The words "Greek Isles" evoke visions of sun-bleached houses shoulder-to-shoulder against a hillside with a mesmerizing view of glittering blue water. But with more than Greek islands scattered across the Aegean and Ionian seas, where do you start? Once a complete island like its neighbors, it was a volcano that blew its top thousands of years ago, creating a giant caldera. Today its whitewashed villages crowd the dramatic ridges of this crater as if jostling to enjoy the views. And Santorini offers much more than the vistas made famous on postcards -- its wonders include countryside wineries, ancient archaeological sites, and unforgettable beaches. The village of Oia is the quintessence of Greek Island charm. Pronounced "EE-ah," this idyllic ensemble of whitewashed houses and blue domes delicately drapes itself over a steep slope at the top of a cliff. Viewpoints here are some of the most iconic in the Greek seas, and photographers clamor for just the right angle. Artists fall in love with Oia and move in. At the quiet end of town, the old windmill evokes a more rustic age gone by. And the cliffside cocktail bars provide a romantic stage where tourists gather for each Santorini sunset. It seems, at least in most photographs, that Santorini towns like Oia are nothing but white. The whitewash, while scenic today, was originally practical: White reflects the powerful heat of the sun. And I love the way the blue and white of the townscape seem inspired by the colors of the Greek flag. Dwellings here were originally humble caves. With little building material on the island, it just made sense to dig into the cliffs. These "cave houses," surrounded by air-filled pumice, are naturally insulated -- staying cool in summer and warm in winter. Gradually these cheapest bits of real estate were developed and, with tourism, they became expensive homes, hotels, and restaurants. Thousands of years before the idea of tourism, Santorini was home to the largest city outside Crete in the Minoan-era world, dating back to the earliest documented civilization in the Aegean third to second millennium B. But in around B. The Bronze Age city, near the modern-day town of Akrotiri, is still being excavated, with more than 30 buildings now viewable in a well-designed structure. Only 3 percent of the site has been unearthed. Visitors explore the excavation site on ramps that let you climb around and through the streets of the prehistoric city. Careful observers can pick out sidewalks, underground sewage systems, and ceramic vases left behind. As they have since ancient times, vintners here shape the live vines into protective baskets designed to enable the vines to both collect the dew and survive the wind. The fruit of the Santorini vine is both hearty and sweet, and there are a dozen or so wineries where casual visitors can sip and take in the views. When it comes to enjoying the Santorini beaches, visitors have options made interesting by the unusual volcanic geology. Two black-sand beaches flank the steep mountain at the southeastern corner of the island. White Beach, in front of a backdrop of chalky cliffs, is accessible exclusively by boat. Red Beach, given its distinctive color by iron deposits, can be reached by a demanding hike around the bluff. Chelidonia Traditional Villas, surrounded by bougainvillea, burrow into the cliff face in the heart of Oia splurge, [www](#). Kamares Apartments, with warm and attentive service, is a dreamy oasis in Fira splurge, [www](#). Roka is a humble little taverna with a colorful courtyard and a terrace with views in Oia moderate, [www](#). Nikolas oozes a family-run taverna vibe, specializing in casseroles and other Greek classics in Fira moderate, [tel](#). Buses reach the main towns, sights, and beaches but can be extremely crowded, especially in peak season. Driving around the island is easy. Email him at [rick ricksteves](#).

### 2: Santorini: More than just a pretty face

*More Than Just a Pretty Face: Unmasking Furry Fandom Recent research debunks common misconceptions of the furry community. Posted May 12,*

How do they internalize the demand to be "picture-perfect"? And what about the stereotype that they are brainless mannequins? A Boston-bred street kid known as Marky Mark shot an underwear campaign that left little to the imagination. The client was Calvin Klein, the photographer Herb Ritts, the body as chiseled as Adonis and the face bad-boyishly handsome. And so, the male model was born. Up until this era, male models were used mainly as props or accessories to the female models, who, during the days of disco, amidst a feminist revolution and the economic boom of the s, sat at the helm of the cult of beauty. Millions of consumers began to worship these women and the lifestyles they represented, and for good reason. By , a year before Marky Mark "dropped trou" for the cameras, the world recognized the most famous female models as "super," not only for their preternatural beauty and notoriety, but for the fiscal control they had over their careers and the industry. Before you dismiss this piece as a an homage to symmetrical bone structure and a well-used gym membership, let me disclose to you my reasons for investigating the world of male models. However, more than my vain proclivities, I was struck by the idea that male models experience what non-model women experience on a daily basis; namely, judgment on their looks in an overt and unforgiving manner. By now, we are all keenly aware of how female models are ravaged by life-threatening eating disorders and how this trickles down into the lives of women who are forced by the omnipresent idealization of beauty to emulate the billboards, commercials and campaigns that try to sell us more glamorous, sexy and therefore meaningful lives. But what about the men in the same industry? Are they faced with the same pressures of being a "product"? What toll do these notions take on their self-esteem? In an anecdotal fashion, I answer the above queries and delve into how these male models respond to on-the-job sexual pressures, how it feels to be objectified, how they process anxiety, how modeling has affected their ability to be intimate with others and how they relate to women. Even the most handsome men can be insecure about their looks. Things like skin, mood and outfits can make you feel bad. The trick is to have clothes that you like, have a good shower and make yourself super clean. Shampoo your hair twice, shave, brush your teeth -- put a conscious effort into making yourself look good. You can also talk to someone you know admires you. The secret to being confident is being confident. Male models are susceptible to eating disorders and body dysmorphia, just like women. Aaron Johnson , 31, currently a DJ and looking to get back into the modeling industry he was formerly with Q Management speaks out about what he now identifies as an eating disorder. The entire time I was working as a model full-time, I was extremely thin. It was that very day that I realized I was starting to get a little bit older and that my metabolism was beginning to catch up with me. I was very heavily involved in nightlife at the time, and DJ-ing four nights a week or so for more than six hours a night, and with that came a lot of drinking. Without realizing it, I had developed a beer gut. On the day of the shoot, the photographer and assistant kept telling me to suck in my stomach and actually to walk around like all the time to lose the gut but the client was unable to use any of the shots. He actually had to set up an entirely new shoot with a different model. As for other models, Lukianov hits the gym twice a day for a minimum of two hours, five times a week, doing tons of cardio. As for his diet, he eats small meals every three hours and excludes sweets, carbs and alcohol. A model who did not want to be identified admitted to using Adderall on a daily basis, especially during Fashion Week when he attends up to 10 castings per day. Male models struggle to be taken seriously. Some male models experience the same negotiation of power, which in turn affects self-esteem and a desire to change the way other people perceive them. For the most part, the biggest pressure I felt was ever being taken seriously. Anytime I would try to talk about my ideas or ambitions outside of the modeling industry or party world I was treated with a proverbial pat on the head and a patronizing smirk. Male models live under constant stress and anxiety. However, he chooses to use this anxiety to his benefit. Sometimes castings, go-sees and jobs combined with your regular day can be really stressful. Sometimes you have to be in three places at once or have only minutes to get from one end of the city to the other. Then add in the pressure to perform and

make the client happy and it all can be too much at times. Fashion week is that pressure on steroids! Personally I have found a way of using this pressure and stress as an extra motivation by adapting certain rituals like listening to music, tuning out all the other noise and just focusing on what I my ultimate goals. I also stay in the moment by challenging myself to do better and keep smiling! I think in this industry, regardless of male or female, you have to find a way to make stress and pressure work in your favor, almost embrace it. Just as women organize their daily lives around negotiating outdated and unrealistic paradigms of femininity, we must remember that gender is a relational category. Still, it is only recently that our culture has begun to critique the standards that define masculinity as harmful. When it comes to "looks," the success of male models as an industry is attributed to the items they are hired to sell. Do I feel masculine? Just ask the girl in my bed. But seriously, I look good because I have the clothes, the products, the styling, the swag. None of this is an accident. Still, even though male models are being paid to cater to a changing face and body of masculinity one that is achieved with certain products , not all of our culture is willing to share the viewpoint of the model quoted above. If I never hear the Blue Steel joke again it will be too soon. As someone with a little experience behind the camera under my belt, especially in shoots that involve showing skin or getting intimate with a scene partner, I can say that the experience is interesting. Johnson and Himmelstein agree. I think she kinda liked it. Lukianov, who is in a committed relationship, shares this anecdote: I have to draw lines. Male models may relate better to women than non-models. Who better to understand the illusion than a male model? By the way, most of them have other jobs to supplement the costs of living in New York City. The more hyper-critical our culture is about looks, the more hyper-vigilant we have to be about tuning out the noise.

### 3: Puppetry - More Than Just a Pretty Face - ALSC Blog

*Do you think celebrities are more than just a "pretty face?" Should they just "shut up and dribble?" This post reflects the views and experiences of the author, and is intended to start a conversation.*

Until recently, our understanding of facial aesthetics has been confined to the fields of philosophy and art. Now neuroscientists and psychologists are tackling the question: What are the laws of human attraction? Scottish psychologist David Perrett from the University of St. Andrews has attempted to research the alluring push-and-pull of attraction. At first Perrett was met with concerned skepticism from people in his field – some argued it should not be studied, other insisted that it could not be studied. But Perrett, if his shock of neon-red-dyed hair is any indication, is an academic rebel who never listened to naysayers. Our preference for beauty may be innate When two-day old infants – who have not yet been conditioned to prefer certain facial features – are tested, researchers find the preference for attractive images already exists. When these newborns, who still have very poor eyesight, are shown two pairs of faces of varying degrees of beauty, the babies almost always prefer the faces that adults also find more attractive. There are several explanations for this, including that average is perceived as more normal and less likely to be harboring genetic diseases and average is familiar most people like things they are used to. Flaws are not always bad Though most studies show that people are generally attracted to symmetrical facial features and body types several studies even show that those who are symmetrical tend to be fitter, happier and more productive sexually, sometimes flaws are actually beneficial to perceptions of beauty. When there is asymmetry in the right places a lopsided smile, for example, these faces are preferred over symmetrical ones. There are plausible explanations, Perrett explains – the more normal a face is, the more forgettable it is. He also adds that highly symmetrical smiles can come off as seeming plastic or false think: Asymmetrical facial features can appear to be more genuine, and therefore, more appealing. We hit our peak at 8 months When taking into account general attraction not sexual, just faces, babies who are around 8 months of age are at their cutest. Their massive forehead and diminutive chin are key characteristics that make a baby attractive – and at this point in development, the forehead is at its biggest compared to the body. Still, not all 8-month-old babies are equally cute ask any parent. Babies that rate high on the cuteness scale have a smaller chin, wider eyes and look younger than their less-cute counterparts. But why be so cute at 8 months? Self-doubting women want a girly man Women who rated themselves low in the attractiveness scale tended to ignore symmetry and masculinity and often went after men with more feminine appearance, explained Perrett. This might be a self-fulfilling prophecy, as women with low self-confidence might experience a feedback loop when they are snubbed by more masculine men who typically have more possible mates and get lucky with feminine ones. But does it work the other way around? Studies are still inconclusive, but so far there have been suggestive links between men who lack confidence and more masculine women, Perrett says. Almost everyone, men and women, rated it more attractive. Although we do know what makes a man masculine – enlarged head, chin, nose and jawline – this is not necessary attractive to all opposite-sex mates. Forget plastic surgery, eat vegetables Perrett is heading up several studies that show the link between eating lots of fruits and veggies and high ratings on the attraction scale. When humans eat veggies, the hue of the skin of most people of European descent tinges toward yellow not Snooki yellow, just a touch. According to a study released last year, if you increase the level of fruits and vegetables by four to five portions a day, there was a detectable improvement in attractiveness ratings. That one night stand is written on your face Our faces give dramatic insight into almost every aspect of our lives, diet, lifestyle – even sex habits. All guessers fared better than average in the tests. But it was women who did the best – especially when they were sussing out the sexual behaviors of other women. So, how is this done? Another theory is that masculinity might be a sign one that has a positive correlation with number of partners in males, and a negative correlation in women. Freud was onto something For a person who has a positive relationship with her parents, there is often a correlation between the appearance of the father and a chosen partner, Perrett says. This is true for both sexes. However, most interestingly, recent research has found that if a woman has a younger brother she will be less likely to pursue

mates that look like her father. Perrett theorizes that this has to do with general mechanisms that prevent incest.

### 4: More Than Just a Pretty Face | THRED

*More than Just a Pretty Face is a 31 day devotional on the book of Esther. Karen Morerod does a wonderful job of blending Bible study and practical application. Each day includes devotional thoughts on the book of Esther, as well as practical (and often humorous) application for women today.*

Noticing my bright green eyes, tan skin, charming smile and a nicely put together physique. Pretty, sexy, gorgeous have been terms used to express me. As much as I respect the compliments, I am deeper than an image. There are many individuals who miss the woman I am, the soul I sincerely have. Imagine going into an art gallery, so many lovely articulate paintings overlooked by more loud collaborative paintings. There is a beautiful message behind the delusion. If you fixate on my image, not penetrating beyond my exterior, you miss my value. The beauty is in the message of my soul. I realized early in life that being pretty is generally more of a burden than a benefit. When meeting people, they grow interested in me because I appeal to their eyes. Being pretty becomes a disturbance, blocking out the ability of others getting to appreciate me for my inner radiance. From everyday situations to important career outcomes such as employment interviews, it astonishes me how much an outside image effects people. Landing a position based on my pretty appearance, not seeing I have the intellect to back it up. I was acknowledged as the cheerleader and not the softball player because I know how to put on lipstick and twirl my hair. Pretty is described as attractive in a subtle way without being really beautiful. Pretty has a unique definition to each individual. Everyone sees differently with the eyes. I believe, pretty comes from within. An attractive physical appearance means nothing if you have an awful heart. Pretty is vague, I demand to be recognized and acknowledged as very much more than an expression with such vague context. I am a genuine beauty. Beautiful from the inner surface of my heart. I am intellectual, confident, a dream chaser, determined, loving, warm-hearted, devoted, independent. A daughter, a sister, a noble friend, a learner and forever a shoulder to everyone that desires it to lean on. My advice to every woman out there, you are more than just a pretty face. Realize that, enforce it, and live up to those words every day.

### 5: I Am More Than Just A Pretty Face. "the girl who fear oblivion"

*The ideal that a pretty young woman should feel that she has to prove that she is "more than a pretty face" is a comment on our society in general. From reading this blog, I have a strong feeling that there is so much more that you have to offer.*
