

## 1: Cheese Shop Hurley, WI - Z's Cheese Haus

*With the Founder's Day celebrations quickly approaching, the Aldens begin plans to redecorate their boxcar as a float for the parade, until their boxcar suddenly and mysteriously vanishes.*

Burlington, Vermont — Burlington is the most populous city in the U. It is located 45 miles south of the Canada—United States border and 94 miles south of Montreal and its population was 42, according to a U. Burlington is the least populous city in the U. Vermonts largest hospital, the UVM Medical Center, is located within the city limits, in , Burlington became the first city in the U. Two theories have been put forward regarding the origin of Burlingtons name, the first is that it was named after Richard Boyle, 3rd Earl of Burlington, and the second is that the name honors the politically prominent and wealthy Burling family of New York. While no Burling family members are listed as grantees of the town, one of the New Hampshire grants, the land that was developed as Burlington was awarded by New Hampshire colonial governor Benning Wentworth on June 7, to Samuel Willis and 63 others. In the summer of , settlers began clearing land and built two or three log huts, but the outbreak of the American Revolutionary War delayed permanent settlement until after its conclusion, in , Stephen Lawrence arrived with his family. The town was organized in , the War of was unpopular in Vermont and New England, which had numerous trading ties with Canada. Neither Vermont nor other New England states provided militia units or financial support, Vermont voters supported the Federalist Party, which opposed the war. At one point during the war, the U. Some soldiers were quartered in the building at the University of Vermont. In a skirmish on August 2., British forces from Canada shelled Burlington and this is described as either a bold stroke by the British with an ineffectual response from the Americans, or a weak sally by the British, which was rightfully ignored by the Americans. The cannonade lasted about 10 minutes and caused no casualties, the American troops involved were commanded by Naval Lieutenant Thomas Macdonough, later hero of the Battle of Lake Champlain. Its Victorian era prosperity left behind fine architecture, including buildings by Ammi B. This became polluted over the years and was a focus for cleanup in under the U. It became a brand, with retail outlets in numerous cities 2. A small coastal town with a year-round population of just under 3, Often called P-town or Ptown, the town is known for its beaches, harbor, artists, tourist industry, at the time of European encounter, the area was long settled by the historic Nauset tribe, who had a settlement known as Meeshawn. They spoke Massachusett, a Southern New England Algonquian language dialect that they shared in common with their closely related neighbors, on May 15., having made landfall from the west and believing it to be an island, Bartholomew Gosnold initially named this area Shoal Hope. Later that day, after catching a great store of codfish, notably, that name referred specifically to the area of modern-day Provincetown, it wasnt until much later that that name was reused to designate the entire region now known as Cape Cod. After two days of failed attempts to sail south against the winter seas, they returned to the safety of the harbor, known today as Provincetown Harbor. It was here that the Mayflower Compact was drawn up and signed and they agreed to settle and build a self-governing community, and came ashore in the West End. In , the Governor of the Plymouth Colony purchased this land from the Chief of the Nausets, the collected fees were used to defray the costs of schools and other projects throughout the colony. In , the grounds were opened up to allow the inclusion of fishermen from the Massachusetts Bay Colony. The first record of a government with jurisdiction over the Province Lands was in , with an Act that declared it the Precinct of Cape Cod. On June 14., after harboring ships for more than a century, the name chosen by its inhabitants was Herringtown, which was rejected by the Massachusetts General Court in favor of Provincetown. The act of incorporation provided that inhabitants of Provincetown could be land holders and they received a quit claim to their property, but the Province retained the title. The land was to be used as it had been from the beginning of the colony — a place for the making of fish, all resources, including the trees, could be used for that purpose. In the Great and General Court changed the Towns charter, giving the townspeople deeds to the properties they held, the population of Provincetown remained small through most of the 18th century. The town was affected by the American Revolution the same way most of Cape Cod was, the effective British blockade shut down most fish production and shipping and the town dwindled. It was, by

happenstance, the location of the wreck of a British warship, following the American Revolution, Provincetown grew rapidly as a fishing and whaling center 3. As of the census, the population was , the countys population estimate for was , Its shire town is Vermonts most populous municipality, the city of Burlington, the county has over a quarter of the states population and more than twice the population of to Vermonts second most populous county of Rutland. The county also has more than twice the density of Vermonts second most dense county of Washington. The county is named for Vermonts first governor and one of the framers of its Constitution as a Republic and state, the county has most of Vermonts fastest growing municipalities. It is one of the three counties that comprise the Burlington metropolitan area, along with the counties of Franklin and Grand Isle to the north and northwest, respectively. The University of Vermont, Vermonts largest university, is located in the county, as well as its affiliated hospital, Vermonts largest private employer and largest airport are in the localities of Essex Junction and South Burlington, respectively. According to the U. Census Bureau, the county has an area of square miles. It is the third-smallest county in Vermont by area, originally, Chittenden County contained parts of other counties. The town of Underhill in Chittenden County is home to the highest summit within the state, Mount Mansfield, Census Estimates In , there were , people, and 67, households. Hispanic or Latino of any race made up 2. In the county, age distribution was as follows, For every females there were In , census department estimates that Chittenden had the youngest average age in the state, Most of this area is part of the Adirondack Park, there are recreational opportunities in the park and along the relatively undeveloped coastline of Lake Champlain. The cities of Plattsburgh, New York and Burlington, Vermont are on the western and eastern shores, respectively. The Quebec portion is in the county municipalities of Le Haut-Richelieu. Lake Champlain is one of large lakes scattered in an arc through Labrador, in Canada, the northern United States. Although it is smaller than each of the Great Lakes, Lake Champlain is a body of fresh water. Approximately 1, km2 in area, the lake is roughly km long and 23 km across at its widest point, the lake varies seasonally from about 95 to ft above mean sea level. Lake Champlain drains nearly half of Vermont, and approximately , people get their water from the lake. It is connected to the Hudson River by the Champlain Canal, parts of the lake freeze each winter, and in some winters the entire lake surface freezes, referred to as closing. It occurs in prominent outcropping at Goodsell Ridge, Isle La Motte, the oldest reefs are around The Head of the south end of the island, slightly younger reefs are found at the Fisk Quarry, and the youngest are in fields to the north 5. It is owned by the city of Burlington, Vermont, the airport is located in South Burlington, three nautical miles east of the central business district of Burlington. As per Federal Aviation Administration records, the airport had , passenger boardings in calendar year and this airport is included in the FAAs National Plan of Integrated Airport Systems for “, which categorized it as a primary commercial service airport. On May 22,, at the airport, Amelia Earhart was presented with the keys to the city of Burlington. With the onset of the Second World War, the United States government created a Defense Zone extending inland miles from the coastline, where private aircraft were restricted from operating. Due to increased demand, the Burlington Municipal Airport was noted as being the busiest airport in the world on both August 14, and February 11,, with and landings respectively, in , Mohawk Airlines introduced the first jet service to the airport. From to , the experienced a increase in growth. BTV enplaned over , people in , a 7. Due to the small size of the market, airlines mostly fly regional airliners on their Burlington routes. The airport has used natural resources such as marble and granite, in , the airport had fifteen gates serving seven airlines. On February 3,, it was announced that AirTran Airways would not be returning to Burlington, AirTran planned on resuming service in the spring of , but due to various reasons not specified they did not. The mall was conceived in and was built in to a design by Carr, Lynch Associates of Cambridge. It encompasses about 86 storefronts and is managed by the Church Street Marketplace Commission, major retailers include five national chain stores as well as local retailers of clothing, home-wares, books, and other goods. The American Planning Association named the Church Street Marketplace one of Americas Great Public Spaces for , the marketplace is also home to dozens of restaurants, bars, and coffee shops. The concept of the Church Street Marketplace originated as early as as part of a series of urban renewal discussions, during the summer of , a one-day, experimental street fair was held on four blocks of Church Street, and approximately 15, persons attended. The success of the fair was

taken as a demonstration of the feasibility of a mall. By late , Patrick Robins, president of the Downtown Burlington Development Association, with their guidance, a second, week-long street fair was held along Church Street in the summer of . Traffic was rerouted from four blocks of Church Street to the streets, extra transit was added for the week. Merchants were allowed use of the area for display of retail goods. It was estimated that 50, persons attended during the week, an enclosed shopping mall, Burlington Square, opened on the Church Street Marketplace in . The mall is anchored by a Macys department store, in , another flagship, an LL Bean store, opened. A design for Church Street was unveiled in March , which encompassed a two-level scheme, with a level below the street level. The lower level would add 80, square-feet of retail space to the City's total with no new construction, in March , the City sponsored round table discussions and both local citizens and merchants responded negatively to the idea of a two-level mall. The Steering Committee decided to drop the scheme, and a new plan was devised. The one-level plan was approved by city voters later that year, C. The system is named for President Dwight D. Eisenhower, who championed its formation, construction was authorized by the Federal Aid Highway Act of , and the original portion was completed 35 years later, although some urban routes were cancelled and never built. The network has since been extended and, as of , as of , about one-quarter of all vehicle miles driven in the country use the Interstate system. The Bureau of Public Roads asked the Army to provide a list of roads that it considered necessary for national defense. A boom in construction followed throughout the decade of the s. As automobile traffic increased, planners saw a need for such a national system to supplement the existing, largely non-freeway. By the late s, planning had expanded to a system of new superhighways, in , President Franklin D. Roosevelt gave Thomas MacDonald, chief at the Bureau of Public Roads, a hand-drawn map of the United States marked with eight superhighway corridors for study. He recognized that the system would also provide key ground transport routes for military supplies. Missouri claims that the first three contracts under the new program were signed in Missouri on August 2,, the first contract signed was for upgrading a section of US Route 66 to what is now designated Interstate . On August 13,, Missouri awarded the first contract based on new Interstate Highway funding, Kansas claims that it was the first to start paving after the act was signed. Preliminary construction had taken place before the act was signed, the state marked its portion of I as the first project in the United States completed under the provisions of the new Federal-Aid Highway Act of . The Commonwealth of Pennsylvania refers to the turnpike as the Granddaddy of the Pikes, October 12,, The final section of the Canada to Mexico freeway Interstate 5 is dedicated near Stockton, California 8. As with all odd-numbered primary interstates, I is signed as a north-south highway, however, it follows a primarily northwest-to-southeast path. The route forms a part of the main connection between the cities of Montreal and Boston. In Quebec the route continues as Quebec Route , the eventual completion of Autoroute 35 from Montreal will lead to a non-stop limited access highway route between the two cities, following I south from its terminus. I is one of three main Interstate highways whose entire route is located entirely within New England, along with Interstate 91, Interstate 89 connects smaller cities and rural areas within New Hampshire and Vermont, and maintains two lanes of traffic in each direction throughout the route. Unlike its neighboring Interstates, it does not intersect any even-numbered Interstates along its route, in the Champlain Valley county of Chittenden, the Champlain Parkway begins from Exit 13 in South Burlington and is a proposed link to downtown Burlington, Vermont. Interstate in the county is the auxiliary route that has a direct exit from I Interstate 89 runs for about . The two major population centers along I's length in New Hampshire are Concord, at its southern terminus, mileage signs along I in each direction consistently list one of the two cities.

*Z's Cheese Haus in Hurley, WI offers cheese, sausages, candies, and more. We also offer gift boxes, baskets, and party trays. Call us now at*

At first glance, it looks virtually identical to its European and Japanese counterparts. Look closer, however, and the subtleties become more apparent. The Mazda6 gets a reworked fascia with a bisected grille and fog lamps mounted at the outer edges of the air dams, while a new bumper, tweaked trunk and reworked exhaust rounds out the rear. Under the lengthened chassis is the same double wishbone front and multi-link rear suspension found in the European and Japanese models, with ABS-assisted ventilated front and solid rear brake discs. At the entry-level end of the spectrum, a bhp 2. Opt for the 3. By the time you read this, the Mazda6 will be on sale in either Sport, Touring or Grand Touring trim, with no plans to introduce a five-door or wagon variant in the US. Expect the Mazdaspeed6 to arrive some time in But Toyota has seen the error of its ways. Naturally, a full roll cage, five-point harness and fuel cell ensure that Gushi can concentrate on pleasing the judges without having to worry about the unthinkable. The Formula D season kicked off in Long Beach on April 12; you can follow Gushi and the rest of the competition at formulad. Nissan has spent a considerable amount of time tweaking the US- and European-market GT-R to extract every last bit of performance from its everyday supercar. A GT-R test mule has been seen at the Nrburgring outfitted with a new front splitter, redesigned wing and upgraded wheels, confirming speculation that Nissan is developing a V-Spec version. Combined with changes to the twin-turbocharged, 3. The McPherson front suspension and multi-link rear arrangement is complemented with a set of custom coilovers that lower the A3 by 36mm. Stock discs handle braking duties out back, but Audi spared no expense in the front, equipping the Clubsport Quattro with inch carbon-ceramic discs gripped by six-piston calipers. Motivating this 3,pound concept is a 2. Inside, Audi has blended a bit of race-car purposefulness with show-car chic in the form of molded buckets, a flat-bottom steering wheel, aluminum trim and toggle switches, plus a red starter button. More impressive is the Audi Drive Select system that can change throttle response, power steering assist, traction control settings, magnetic ride dampening and even the exhaust note on the fly. Unfortunately, it also has a habit of never making these factory-tuned rides available in America. Both versions are powered by a bhp, turbocharged, 2. The front fenders have been widened by 0. Bilstein struts suspend the upgraded rolling stock, as six-piston Brembo brakes in front and two-pot calipers in the rear keep the party in check. No special-edition model would be complete without a bit of bling, so Subaru has added all the required badging to the inside and outside, along with new gauges, a Momo steering wheel and an aluminum shift knob. And the first few details have confirmed our suspicions. Subaru will release the Impreza WRX STI Spec C around the same time, but rather than focus its efforts on engine output, it plans to lose around pounds through the use of a lightweight roof, aluminum trunk lid, smaller fuel tank, thinner glass and a compact battery. So in order to compete with the big boys of the luxury set, Infiniti intends to roll out models to match them point for point. Nissan announced that it would finally bring an Infiniti G37 convertible to market most likely fitted with a retractable hard top along with a compact competitor to the BMW 1 Series. Lexus later confirmed that it would be running a prototype version of the LF-A in the 24 Hours of Nrburgring race this year. While mph is nothing to sneeze at, Top Secret is planning another outing to the banked circuit later this year to reach mph. But if you live in Europe, that time behind the virtual wheel could pay off. Nissan and Sony are teaming up to offer one lucky Gran Turismo addict the chance to test their mettle in the real world through the GT Academy. Over an eight-month period, players will duke it out online through the European Playstation Network for a single spot in the GT Academy. After which, the winner will spend four months training and accumulating the necessary FIA licensing to prepare for some real wheel time during the hour Dubai endurance race next January. The virtual racing virtuoso will be piloting a race-prepped Z during the event. But if you live on the other side of the pond and think you have what it takes, log on to the Playstation Network and make the gamers of the world proud. Partnering with renowned engine builder, Cosworth Engineering, we will be making our non-turbo monster V6 within the Castrol Syntec Top Shop Challenge. This means obeying specific rules and

that our stroked 3. After some measurements and examination, Cosworth developed a plan of attack and formulated a recipe. Starting with a bare VQ35DE block, Cosworth would be basing this project around its already available forged piston set, twin-plenum intake manifold and CNC-ported cylinder heads. With a few of these hard parts pulled off the shelf, Cosworth assembled a prototype and has spent the last few weeks on one of its two engine dynos, testing various camshaft profiles for naturally aspirated use. With the stock-displacement, 3. In the meantime, log on to [www](http://www). The winning engine from the competition will be given away to a lucky reader who voted for the winning team, so go and place your vote now.

We have all been there at one point in our lives. We really think all this stuff in our heads has made us different. We also fight to fit in while doing it. For some it is easy and for those when it is not. Think of how intense and complex all of those normal feelings and experiences would be and multiple it by a billion if you were a child prodigy. Oh, and then make it that you were in foster care till your adoptive family found at 5. You were so advanced, you entered college at 12; became a doctor and interned all by Your whole life experience is on the brink and you are about to accomplish everything you think you want by becoming a resident at The Johns Hopkins only to have it ripped away from in one fell swoop. Because you have been labeled emotionally immature; not yet ready to be a doctor. She is stunned and shocked. She knows she is the best in her field of surgery and diagnostics, yet she also knows she is awkward in regular people situations. Although angered and frustrated, she decides to go to a small college 2 hours away from her Chicago home and take a few classes. It will be her first school type experience since kindergarten. She was so brilliant at such an early age, other kids bullied her causing her mom to home school in order to spare Izzy. The plan had merit but did not take into account Marshall. The RA of her dorm. He has grown into this gorgeous specimen of guy; lanky, lean with piercing blue eyes. He is meeting all the people he will oversee on her floor and a connection is made. At first Izzy is freaking out because he knows Who and What she is but in the long run they strike a deal of sorts he will open her eyes to life differently and she will tutor him in his premed needs. This story was just perfect for me there was no false note anywhere. These lessons can be extremely painful but they are necessary to our development as people. Marshall was swoon worthy he had a sly sense of humor was wise beyond his years. He was Everything Izzy needed and more. He also had the best, quirky, openly loving family, ever. The passages with Izzy, Marshall and his family were hysterical and heartwarming. Both Marshall and Izzy had secrets and specifics which caused them both pain. But together they healed them together they were strong and sweet. Together they were wonderful. There were many other issues addressed in this book besides the coming of age or maturity and I felt they were handled well. Each step had a firm foundation so you never felt the whole kitchen sink was thrown in just to get a reaction. All of the pieces fit perfectly. All of secondary characters seemed real. Meeting your roommates; having others on campus interact and maybe crush on you these are perfect parts of life experiences for Izzy to have. They all rang true. Julie Cross has written a terrific book one which will stay with me for quite a while. Although the premise is quite unique I have no idea of the percentage of child prodigies there are in the world the unifying theme of not feeling normal or fitting in is universal. She has given us a beautiful book to read; to remember our experiences during those critical years and accept we are all wonderful as we are. For more reviews, Free E-books and Giveaways.

*Mousehouse, Cheese, Wisconsin. Grand Cru Surchoix - World Champion! With the status of Surchoix (meaning "top choice" in French) you can't go wrong!*

Two more banks are currently in development of the camt. For more information on the banks that are public and what they say, see News from the Banks. Nine vendors offer a variety of products to help corporates to process and analyze BSBs. One additional vendor, AxleTree, plans to release its product in Jan Two vendors provide billing software to banks; Info and Zafin. Read about their offerings in News from the Vendors. Many banks responded to a survey about their implementing the ISO camt. For additional information contact Selina Bolton at selina. For more information read below. Feature Banking Survey – Implementation of camt. A survey was sent to 30 banks that are active with the BSB or have an ongoing interest. Below are the aggregate results of the survey. The ISO camt. All future enhancements will only be to the camt. All bank systems run on their own set of proprietary service codes; these are transmitted with the BSB. The GSC allows banks to also report the services using an industry standard codes; that allows corporates to compare services between banks and to aggregate services across all banks. Banks Of the 30 banks who received the survey: Throwing out the high and low numbers, 8 banks averaged 32 corporate customers each. In summary, banks have picked up speed migrating to the camt. Clarify message schema capability and where required enhance message schema to meet the requirements of Cash Management products e. Establish a global, universal service code set, to be recommended as a standard for all corporations, banks and vendors. Extend the set of mandatory fields to support the requirements of eInvoicing to meet Global authority requirements. Improve the implementation and validation guidelines to assist banks with adoption and standardization, focusing on core capabilities that should be implemented. Expand the global, universal service code set to include additional bank services e. Guarantees, Loans, Derivatives etc. Today, we are a leader in support of the ISO messages whether it relates to payments, account reporting, or the new CAMT message for billing. We have recently rolled out a New Billing Platform to our clients in the United Kingdom which offers a scalable E – Billing proposition. We can now deliver the camt. We are working on enhancing both these formats with the AFP Global Codes and will also be adding new countries to this platform in the future. Constantly evolving with markets requirements, BNP Paribas is currently working on improving its billing platforms and providing enhanced billing reporting offer increased frequency, new delivery channels. In addition, Citi is continuing to expand its overall country footprint with a number of new countries scheduled to come online soon. A pilot operation phase is scheduled for Q4 , the roll out is planned for Q1 Our Asian branches will follow subsequently. Kay Emmrich, Product Manager, at kay. We transmit the files STP through all our digital channels – e. In early we adopted the Global Service Codes framework for fee reporting. Currently we make fee reporting based on the Global Service Codes available to our clients in our online Corporate Reporting tool. We are simultaneously looking into including the information in the CAMT. We provide information for 8 countries incl.: Northern Ireland – the information is delivered in one file incl. Kasper Selch at ksel danskebank. In Q2 we embarked on a multi-year program of improvements to our billing service. The program includes migrating regional and local billing to a single, universal revenue management and billing service platform. As of the first quarter of , we will support an additional three countries, which includes one from Latin America. Over the past year, we have seen an increasing demand for the report from our global customers. Morgan has been instrumental in the development of the BSB standard since its inception. With the current attention of the CGI-MP group Common Global Implementation-Market Practice we expect to see increased demand for this standard as well as standardization of its use in global banking markets. Morgan across our global network. Through a convenient online tool with bulk export functionality and new delivery capability via SWIFTNet, FileAct and host-to-host transmission, our corporate clients can now easily receive and store statements in an electronic format and have instant access to their current and historical billing data. We expect to add ISO camt. As multinational corporations continue to extend their global reach, we are pleased to be able to offer the BSB to help organizations enhance visibility across their global banking

structures and to help fulfill their go green initiatives through this paperless solution for bank billing. For additional information contact your J. Morgan Relationship Manager or Leslie Buchanan at leslie. At the moment we offer version 3. The new output will replace the existing 3. We have no plans as of now to convert our product catalogue in to Global Service Codes since we have yet to feel a demand for this feature from our clients. We keep on supporting this initiative and remain fully involved in BSB. We are working to bring billing according to the BSB standard and widen our offer in the frame of our Global Transaction Banking strategic plan. Available in different formats, including Twist and ISO camt. To date, the Bank provides TWIST statements to clients in 23 markets through a centralised, single instance Global Billing platform and plans to expand the coverage to more than 30 markets by end. The statements are delivered in a straight through fashion through host2host linkage, ERP adaptors and online delivery via Straight2Bank Web. Our roll out to all other countries of UniCredit Group is ongoing. In we plan to provide camt. AIG has had some success with major banking partners in terms of reporting. Even banks that supply BSB file have challenges in terms of quality of data and coverage to all countries. We encourage all banks to continue to make progress to be BSB capable in the near future.

*Locally loved youth music educator with the energy to excite young minds and the easy teaching style to invite active participation from kids six months to six years old.*

Pony is coming home from college for the summer, Darry has a new girlfriend, Steve and Soda had opened up a shop, and Two-Bit had finally graduated. One thing for sure is this will be a summer that no one can forget. Hinton, but I have been a fan since I read page one. The POV of this story is no one in particular, but I tried phrasing certain parts how I think it would sound if Dally or Johnny was narrating it. I appreciate reviews and more chapters to come. Darry turned the the page of the newspaper again. Darry rolled his eyes. It had been a year since they had last seen Pony. The kid had done real good and got a track scholarship down in Texas. Originally he was gonna come come last summer, but a dead engine in the truck Steve and Soda had fixed up for him said otherwise. Not much had changed back in Tulsa. Although, Steve and Soda finally opened their own mechanic shop. Darry had met a girl. Her name was Chestnut, a name almost as unique as Darry. They called her, Chessy, for short. Darry had met her doing some construction work on her house. She was divorced from her distant and alcoholic husband, and had two kids. One was Emma, who was three. The other was Lacy, who was five. Two-Bit had finally graduated. One year after Pony. I guess after Pony graduated he started to feel a bit out of place. He still lived with his mom, but he got a job back at the high school no less. He was now sweeping the halls he used to walk at night. In addition, he was also a part-time manager at the Bowling Plaza. Two-Bit stated taking a swig at his beer. Border-line alcoholic to you. Before Pony could knock the door opened. Well, that at least we can see. Soda just shrugged and smiled. Damn your doing college wrong. Darry smiled sitting back down. Pony put down his suitcase and walked over. Soda and Two-Bit joined in pulling up the surrounding chairs. But, he just drove home all the way from Texas. The college crowds cheering his name had gotten a little into his head. He wished he could have visited, and promised himself that this next year he would find a way. Darry said, "I gotta take this". He went into the other room to take the call. Pony raised his eyebrow like he had learned from Two-Bit. Speaking of, you got any little vixens back in Texas? Some things never changed. He had went on a few different dates in college, but nothing ever lasted too long. We will find you a girl. Pony still red in the face changed the attention to Darry. Got some nice kids too. We get along real well. Pony and Steve were never on good terms, even after he stopped hanging out with Soda so much in high school, they never really bonded much. And with that the summer began. The whole gang was back together and in store for a summer they would never get. Your review has been posted.
