How do I create a single PDF document from multiple scanned pages? I have a number of pages that I want to scan into a single PDF document. When I scan pages they each become a separate PDF document that I must then merge to create a single document. Is there a more efficient way to perform this operation? The From Image Files option can be used for this purpose: The Scan Properties dialog box will open: This is the default and fastest mode, and is compatible with the broadest range of scanners. The Show Native UI box is selected by default, which means the user interface of the device driver is used. This is the most reliable option, and the scanner will select certain parameters of the scan itself: Clear the Show Native UI box to customize these options: These refer to the format of scanned documents. These refer to the type of scanner being used. There are three options: Click the dropdown arrow for an explanation of these options. The Choose Input Files dialog box will open. Click Add From Scanner: The Scan Properties dialog box will open. This usually offers a greater amount of customizable settings - including the option to store scan parameters for subsequent use. This provides fewer options but can be more reliable in some cases. It also means the scanner selects certain parameters of the scan itself: The New Document from Images dialog box will open. The scan will be performed and the scanned document will be displayed in the New Document from Images dialog box: Repeats steps 2 and 3 until all desired scanned documents are displayed in the New Document From Images dialog box: Was this article helpful?

Greg Law Feb 28, 2: This explanation is intended to be complete. Unfortunately, in this matter there are a number of things which must be set up. Once done, it will be very easy to choose this output in the future. This was developed today after looking for an easier way of inserting UL Assemblies into an Autocad construction plan set. Given the size of the construction plan sheets and the large number of sheets in a set of plans, it is important to keep file sizes manageable while keeping text crisp. Therefore, it is important to avoid rasterizing the text. They can be modified as needed for other uses. If you wish to test different scenarios, please do so without the expectation that others will do it for you. The primary feature is to combine multiple pages of pdfs while retaining the true text for searching, keeping the file size at a minimum and the print quality at a maximum. Multiple Pages per sheet: Note that this required me to customize th Adobe print settings. Plan files I receive from architects and engineers indicate that their standard settings result in these files pdfs being rasterized resulting in huge files that are fuzzy looking and print poorly. This single document makes both the creation of the plan document and management of the referenced files easier. Note that the original multi-page document must not be a raster image, not true text document. There may be many other ways to do this. This works for me and has taken a lot longer to write up then to set up worked in my initial pass. The first thing you are going to need is a Adobe PDF Settings "joboptions" file with settings that minimize damage to the text and vector contents in a pdf. My settings are based on my prior experience in creating lightweight, non-rasterized pdfs from and for Autocad. The following are settings specific to creating the needed custom Adobe PDF settings file. Collectively by File Binding: Check meaning the fonts in the current document Subset embedded fonts Assuming that others have thes fonts on their devices is probably a mistake. Keep in mind my usage is to create monochrome files for construction plans. You may want to manage your colors Adobe Color Settings file: None Color Management Policies:: The original pdf already had its jpeg images compressed. Doing more most likely will result in very poor quality. Mine was saved in the default location: OnlyOne automatically might work, but is what I tried Color: Create new sizes as needed.
