It is also a gateway into the Ojibwe collections at the Minnesota Historical Society. Along with detailed Ojibwe language entries and voices, you will find beautiful cultural items, photographs, and excerpts from relevant historical documents. Whenever possible, we provide examples of documents in the Ojibwe language. Ojibwe is not a single standardized language, but a chain of linked local varieties, grouped into nearly a dozen dialects. Each dialect and within dialects, each local variety differs in details of pronunciation, vocabulary and grammar from the others, with differences between non-adjacent dialects often being great enough to impede understanding between their speakers. Speakers of Ojibwe consider their language to be precise, descriptive, and visual, and feel that it is among the greatest treasures of their cultural heritage. Ojibwe is an endangered language. Indigenous languages throughout the world are in decline, and have been since Europeans first colonized the Americas. Beginning in , the United States established off-reservation federal boarding schools to re-educate Indian children and youth in the English language and American life-ways. Boarding schools, urban life, popular culture, and even participation in public school education all demanded that we speak English. The Ojibwe language has historically been repressed by policymakers and educators in the US and Canada, though there are many, complex reasons why fewer people today speak Ojibwe. Scholars and linguists tell us that language diversity is as important to the world and our systems of knowledge as biological diversity. Ojibwe people understand that fluent speakers of the language have a wisdom that represents an accumulated knowledge of many generations. The Ojibwe language can explain why we must respect the earth and take responsibility for caring for the land, water, and its resources. It is the antidote to global climate change, environmental destruction, and unhealthy lifestyles. The Ojibwe language is where we turn for philosophy, history, science, medicines, stories, and spirituality. It is our university and the key to our cultural survival. Revitalizing Our Language "Revitalizing our language is foremost in my mind," says Eugene Stillday of Ponemah, Minnesota, who remembers a time when everyone spoke Ojibwe in his community. Speakers of the Ojibwe language have great insight into the historical reasons for the decline of indigenous languages, because their generation experienced it first-hand. For the most part, they have sad memories of their experiences with school and teachers. Resiliently optimistic, they remember the past but look to the future. They each share a passionate commitment to the Ojibwe language and culture, to education, and the importance of passing on the language to a new generation. Eugene Stillday "When I first started school, it was forbidden for us to speak Ojibwe. When we seen the teacher close by we just naturally flowed into English. So uh when the teacher was near by we would be speaking English, the minute she walked away we would go right back into Ojibwe without breaking a sentence or anything like that, just in and out we flowed in and out into English or Ojibwe. Your language, your native language is the basis of any culture. If my community ever goes back to Ojibwe as a first language, I am afraid I will not be around to see it. I wish we could just be back the way we used to be a long time ago when everybody was speaking Ojibwe. I share my language for others because I wish I had taught it to my children. My language stays fresh and alive because I have a relative I grew up with that I teach with. I keep my language alive by speaking it everyday, especially with relatives I grew up with. We must teach the little ones. Click through to the full dictionary entry to hear audio recordings, see images, read documents and watch videos.

## 4: Lots Of Big Words

*me and my big mouth* An expression of regret after realizing that one has said something inappropriate, hurtful, or meant to be kept a secret. I accidentally let it slip that there would be a surprise party for her birthdayâ€”me and my big mouth!

For a while, due to a series of health and family misfortunes, my writing felt like it was forever chugging up-hill. This is a serious problem for a writer. What does one do in such a time? You somehow keep putting words on the page. Even in Welsh, if that helps. You dabble in short stories. Hoping, life will one day return to an even keel. Non-fiction, recipes, your Welsh dictionary. On holidays, you indulge in a great big romping holiday read. The kind that cuts you off from your family for hours at a time. A book in which you get lost - or maybe found. Aside from their clear gothic influence, her books also have another element in common. It was a tale of readers, writers, editors and war-affected families, who were influenced, by the work of one a dead man and his signature tale: *The True History of the Mud Man*. I gobbled the story down, revelling in its lessons and insights, and came up wanting to know more. Did she use notebooks? Had she walked the fine line between sanity and insanity? Would she be willing to tell me? I pitched the idea to the *Historical Novels Review*. Yes, they said, go for it. We will put it in our November edition. Kate Morton was a delight to interview. Her replies so comprehensive. I wanted to publish every word. But due to a tight word limit, I had to edit her response. The *Review* said yes, of course, providing the article came out after the November publication date. Today, I had an email telling me one of the questions has made it on to the blog yes, follow the link *My writing life has taken a turn these past months*. I no longer feel like the little red engine - I think I can, I think I can. Some days it even feels quite easy. So what does a writer do then? You know life is a series of ups and downs. The mountains will rise up again. Some days, you will wonder whether you can keep going. But in the meantime, you say a little prayer of thanks when words flow onto the page, or when an article is published, and, when you find your name on the web page of an international, best-selling author, you whoop and throw your hands in the air - and enjoy the ride.
