

## 1: My Life in Cebu!: in Review: Summer at Sky Ranch Tagaytay

*Part of the Sky Ranch family since , Sky Ranch Cave Springs is located in the breathtaking foothills of the Ozark Mountains in Northeast Oklahoma. This acre non-denominational facility holds all the adventure of camping, yet all the comforts of home.*

Marcos Najera A month ago, a vehicle pulling a trailer along Highway in Northern California got a flat tire, the rim scraping the street. Sparks flew, hitting dry brush nearby and igniting what has become the sixth most destructive wildfire in California history. The Carr Fire has since killed seven people and burned nearly , acres. But not a drop of water. And we look at it and we forget. There it is, like a hole in the sky. Marcos Najera Solis is multi-talented – as an actor, he lent his voice to the Disney blockbuster *Coco*. Fast forward to Solis and cast on break. We grow our own squash, our own chiles, and tomatoes – all kinds of vegetables. They moved there about four years ago. Solis encouraged her to pursue a directing MFA. She took his advice – but after she finished, her life took a turn. So that was really this shift for me and a big moment of change in my life. And that was the same time that I commissioned this piece from Octavio. A version of this story was also on the radio. Jopson told Solis that she wanted to create a piece of theater with him about water, people, fire – and the strife those factors create for the Scott Valley, the area in rural Northern California she calls home. Solis interviewed ranchers, tribal members, environmentalists and politicians throughout Siskiyou County. Those conversations became his new play. Solis says the fictionalized story revolves around actual fights over local groundwater and streams. Every year, that river has had less and less water in it. Marcos Najera Low levels in the waterways can mean tough times for local Native American tribes who depend on healthy salmon runs to keep their hatcheries and fisheries afloat. On the flip side, the farmers and ranchers need to use the river water and groundwater reserves to irrigate crops and hydrate cattle. From legal battles to town hall squabbles, fights over water rights can pit neighbor against neighbor. And somewhere in there, we have to find ways to take care of each other and not attack each other. That fire prompted officials to issue warnings that dry conditions and higher than normal temperatures signaled more trouble ahead. You are going to bring up global warming? But it becomes harder when we are not actually working together as a community. Marcos Najera The protagonist of the show is Connor Bledsoe. The character is inspired in part by Jopson, who grew up with people always disagreeing about the environment. Jopson remembers how community members, including her mom, came to a compromise. *Hole in the Sky* will be performed Aug. Ticket information can be found [here](#).
