Cook Oct 18, Thomas H. A veteran thriller and mystery writer of over 20 books, Cook shared his favorite mystery novels. I went to the Alabama public schools at a time when my English teachers, all but one of whom was a woman, taught nothing but the classics. They revered the great British and American writers. As a result, my reading taste has always been guided by the sense that a novel should be a complete work of art, that action, alone, is not enough, and that it is moral dilemma that ups the ante in crime fiction just as it does in all other literary forms. For these reasons, the 10 books listed below are all novels that skew toward the literary. Their plots are character-driven and their action is organic. They have distinct narrative voices and the sense of place is, as they say, palpable. That said, they are extraordinarily different in time, place, style, voice and probably in every other way one novel can be technically different from another. In the end, of course, the relationship between a novel and a reader is one in which one subjectivity confronts another. My choices are admittedly subjective, with plenty of room for disagreement, but in my view they remain if not the 10 best mysteries ever written, certainly my favorites. It is large and sweeping, with skillfully drawn characters, lovely passages and absolutely haunting scenes, a fully formed 19th century novel with all the trimmings. The story is complicated, but it was originally written in serial form, so the story moves forward in carefully measured steps. Much of what became standard in crime fiction was first done here, so it is not only an engaging read, but a fundamentally instructive one. *A Crime in the Neighborhood* by Suzanne Berne - I have recommended this book many times to all kinds of readers. For me, it is a novel that uses suspense in the best possible way, not by having a character confront one contrived obstacle after another in a mindless stream of action, but by creating an atmosphere of deep moral peril in which the culminating tragedy seems as inevitable as it is, well—tragic. It is also one of those books in which the title become completely apt, and very moving, after one has completed the book. The good news is that the book lives up to the title. This is psychological suspense for adults, with real people confronting real, and very dark problems. *Dimitrios*, in life and death, is a figure of surpassing fascination, his life a tale of struggle and fierce intrigue that I have never forgotten. The secondary characters are wonderfully drawn. From the moment Charles Latimer meets Colonel Haki and hears of the mysterious Dimitrios, the reader is returned to the lost Balkan world that flourished between the two world wars, a boiling cauldron of expediency and deceit that Ambler renders in exquisite detail. It is a story of two brothers, one a cop, the other a priest, and by following their relationship along the trail of a gruesome crime, it ultimately becomes one of the most movingly redemptive novels I have ever read. *The Eye of the Beholder* by Marc Behm - I read this novel years and years ago, and have never been able to get it out of my mind. It is a story of obsession, with a private detective called only *The Eye* who follows a nameless female serial killer for more than a decade. *The Eye* is the classically damaged PI, not just solitary, but deeply lonely, and the woman he pursues is a heartless--yet in some sense comprehensible--hater of men. The macabre dance of death that becomes their lives is one of the strangest and most intriguing relationships in mystery fiction. *A Simple Plan* by Scott Smith - In this wholly realistic novel, two brothers and a friend come upon a crashed plane in whose shattered ruins they find an enormous sum of money. Before that moment, none of these men has ever needed to concoct a simple plan to keep and conceal a fortune that quite obviously does not belong them. In the midst of doing just that, they become criminals, as well as victims of crime. The story builds steadily as the wages of sin become more and more costly. Here is a classic cautionary tale about the penalty dishonesty may exact upon ordinary, and largely innocent, human beings. *Sneaky People* by Thomas Berger - This is arguably one of the funniest crime novels ever written. It is set in the s, and its main character is Buddy Sandifer, a used car dealer who wants one very simple thing: The reason is no less simple. He yearns to live the rest of his days with Laverne, a woman who on occasion dimly realizes that sleeping with men for money adds up to prostitution. Part novel of intrigue, part mystery, part love story, *The Quiet American* remains as powerful today as when it was first written. Wolfe, may not have committed the crime at all.

The crime of murder is inherently terrifying, which makes these stories part horror fiction and part puzzle. You can feel the danger of murder looming in the background while also having the satisfaction of solving the crime in the foreground of the story. The reader knows that in the end, whether or not he or she is caught, the murderer will at least be identified. Murder mysteries, even the bad ones, are fun. But finding those that actually stick with you long after reading them, the way any good novel does, can be a bit more complicated. Here are a few of my favorite murder mystery books that I recommend to friends and, in some cases, have read more than once yes, even though I already know who did it. As the title suggests, Advani interrogates six suspects, all very different people with different motives. What the reader gets with this novel is an in-depth exploration of all of the suspects as well as an exploration of contemporary India itself. One is the murder of a black lawyer from Chicago and the other is the murder of a local white woman. What follows is an investigation that stirs up race relations in the small town and forces us as readers to take a disturbing look at the reality of racism in our contemporary world. The protagonist Darren Matthews is a character who has complicated feelings surrounding the case for many reasons, which makes him realistic and fascinating. Rowling writes under a pen name. Of course, we quickly discover that her death was in fact not a suicide but a murder. Strike is also connected to fame through his estranged rock star father, which makes his involvement in this high profile case more complicated. While Strike is a fun character to read about, I find his assistant Robin Ellacott the most compelling. The Dark Lake by Sarah Bailey Small town detective Gemma Woodstock is shaken by the death of former high school classmate Rosalind Ryan, who was found strangled and floating in the lake. One of Us is Lying by Karen M. Five students walk into detention, but only four walk out alive. This is a quick and fun read. If you frequently listen to audiobooks or read e-books, I would highly recommend considering a hard copy of this particular book, as Pessl includes pictures and documents to create a more immersive experience for the reader. Additionally, the writing style is dark and disturbing while also beautiful, which is my personal favorite combination. What are your favorite murder mystery books? Annotated is kinda like those, but for books. Go here to find out more , or click the image below:
