National Archives Microfilm Resources for Research: A Comprehensive Catalog 8 1/2" x 11", pages National Archives and Records Administration, # Softcover \$5.

He began the system of compiling abstract cards and index cards of military service records as an aid in evaluating Civil War pension applications. These records can also be used to study military and social history. Because of their research value, NARA has microfilmed many of these records, primarily those created before 1861. This catalog is organized by type of record; similar types of records are arranged chronologically. Brief descriptions of the records are followed by roll-by-roll listings of the contents. The catalog does not reproduce the records, however. The first section explains compiled military service records of volunteer soldiers who fought for the United States in various wars and conflicts from the Revolutionary War through the Philippine Insurrection to 1900. Sometimes they also show age, place of enlistment, and place of birth. The second section of the catalog describes records relating to service in the regular U. S. Army. The War Department began to maintain personnel files for Regular Army officers in 1862 and for enlisted men in 1864. Records relating to service before those dates are scattered among many different series of War Department records—registers of enlistments, post and regimental returns, and correspondence. Similarly, records for naval officers and enlisted men were not compiled until after 1864 for enlisted men. Between 1864 and 1868, the Federal Government granted bounty land warrants entitling veterans to free land in specific areas of the public domain as an inducement to enter military service. Applications for these bounty land warrants and pension files may contain a great deal of personal information about a veteran and his family. The final section of the catalog describes miscellaneous records that relate to military service: Military Academy cadets and U. S. Naval Academy midshipmen; and selected records relating to black servicemen. Records relating to the following groups of military personnel are at the National Personnel Records Center in St. Louis: Army officers and enlisted personnel completely separated after 1914; Personnel jackets of officers separated between 30 June 1914 and 30 June 1915 and were destroyed by fire in 1917, as were jackets of enlisted men separated between 30 October 1914 and 30 October 1915; Air Force officers and enlisted men completely separated after 1917; Earlier jackets of the Army Air Corps and the U. S. Air Force were destroyed by fire in 1917; Navy officers completely separated after 1917 and enlisted men completely separated after 1917; Coast Guard officers completely separated after 1917 and enlisted personnel completely separated after 1917. This form is available from the St. Louis. For additional information you may wish to refer to other NARA publications: Other related catalogs of microfilm publications of interest are: These catalogs of microfilm publications do not reproduce the records, but briefly describe the records and tell what records are available on microfilm. The records listed in this catalog are from the following record groups:
