However, after delivering this one-liner we have no illusions that patients will start moving and stay active straight away. Many practical barriers deter them and behavioural change, such as adopting a physically active lifestyle, is only achieved when various stages of change have been successfully completed [ 1 ]. What really helps is referring patients quickly to an outpatient or clinical cardiac rehabilitation CR program. This does not always happen properly, but with the help of allied professionals such as the nursing specialist, the situation in the Netherlands is better now than 10 years ago. The intake includes an exercise test ergometry. Often, the backbone of the CR trajectory is exercise, the component applied by the physiotherapist, which gives this allied professional a crucial role in CR. But in addition to physical therapy and movement agogics , other allied professionals in social work, psychology, dietetics, nursing, case management logistics and evaluation as well as the cardiologist all contribute. What we like about the guidelines in their present shape is that they include: Recommendations for physiotherapy prior to heart surgery: Examples here are lifting, carrying, bending over, putting down, pushing, balancing, climbing stairs and turning safely [ 6 ]; in other words, physical agility and flexibility. The guidelines explicitly state: With regard to the mobilisation phase, in our opinion, the guidelines correctly point out the opportunities for Clinical Cardiac Rehabilitation offered by a few centres in the Netherlands [ 7 ], An option for fatigue-led training, where the familiar Borg scale Rating of Perceived Exertion, RPE can give direction. For endurance exercise outside the home we regularly advise patients to follow the intensity of the Talk Test: This gives patients something to hold on to in the post-CR phase if, for example, they no longer exercise according to heart rate. Again, in our opinion, the post-CR phase is almost more important than actual CR. This touches on the issue of non-adherence or non-compliance. In the relaxation part of the CR program, the patient learns how to cope mentally and emotionally with body signals such as rapid breathing and heart beat, shortness of breath and possibly chest discomfort. In our opinion, however, daily aerobic activity gentle endurance exercises remains the cornerstone of the exercise program, And, finally, attention for impact assessment, including an exit test and aftercare, for example, by telephone from the case manager and, not forgetting to mention, the CR report to the GP and the referrer. The authors are rightly cautious in their recommendations for high-intensity interval HIT training. The guidelines state that HIT training: Research is limited in this area, which is why we think HIT should be supervised very carefully. However, physiotherapists with knowledge and experience of this method should be able to practise it as long as their patients are also motivated to try this type of exercise. What is rather unusual is how the guidelines use the Physiotherapy Evidence Database PEDro scale for rating the quality of randomised studies [ 11 ]. Because these new guidelines have arisen from the discipline of physiotherapy, one of our indispensable allied professions, there is a good chance of wide-scale implementation which will contribute significantly to good care for cardiac patients.

Geoengineering does nothing to address the root causes of climate change. It is part of an effort to profit from the climate crisis. We should vigorously work to expose the risks involved with these projects and make sure that they are not implemented. Geoengineering takes us down a path that is false, unproductive, and dangerous. Hands off Mother Earth! We need a complete transformation of our energy systems, food systems, economic systems. But rich countries, transnational corporations and other powerful vested interests are desperate to divert our attention from system change, and from radical emissions reductions needed at source. Friends of the Earth International rejects large-scale geoengineering as an unproven technology which could lead to land or resource grabbing and dispossession of local communities. As human beings, we are entirely dependent upon our respectful relationship with the natural world. Everything the dominant world does has far reaching consequences that we cannot predict. We are now faced with many of those consequences from the exploitation of the natural world that threaten the future existence of all life on Mother Earth. To assert that human knowledge has advanced so fully that we can predict with absolute certainty that no harm will be a consequence of our actions is categorically false. Our Indigenous traditional teachings, lifestyles, spirituality, cultures and leadership of our people has sustained us for millennia and will do so for countless future generations but only if the world adheres to the Natural Laws of Creation and the Precautionary Principle. Geoengineering projects fall perfectly within the interests of the governmental, financial, and industrial consortia that has caused the ecological devastation, genocide and territorial dispossession of our Original Nations. This time it is the sky itself that is being commodified and marketed. If we pursue them and they fail, geoengineers and climate-polluting governments will then hold up solar radiation management as the only remedy for run-away climate change – a set of highly risky proposals with military origins that can be weaponized. We can see that the US government, the largest historical emitter, is exactly on this track with their mix of climate denialism and aggressive promotion of geoengineering. Some in the geoengineering clique now claim that the impacts of climate change will be worse even than from geoengineering. But every technofix in the geoengineering arsenal will clearly only make matters worse. Also, there is little reason to think that carbon emissions – from fossil fuels or bioenergy – can be securely stored below ground over the long term. We need tried and true solutions including protecting natural ecosystems and supporting community-based conservation initiatives. It cannot be the basis of addressing the climate problem through more reckless manipulation as geoengineering. In ecological agriculture, which returns organic matter to the soil, we have a non-violent, tested and proven solution to cooling the planet, while growing more and better food. The world must be weaned from fossil fuels, cut emissions at source and not permit any manipulation of the climate that has the potential to pile more harm on Africa and other territories.

This includes the various genres and sub-genres of fantasy, science fiction, epic fantasy, high fantasy, hard sci-fi, soft sci-fi, new weird, magical realism, cyberpunk, urban fantasy, slipstream, horror, alternative history, SF noir, etc. Monday, August 04, Review: The Mirror Empire by Kameron Hurley Fantasy is the genre where anything is possible and that is one of the biggest reasons why so many of us read it. Most mimic in one way or another what has come before. Most take inspiration from historic cultures of our own world particularly Western societies and build that inspiration into a set of rules to adhere to. Often those rules are not based on any factual part of history, but perceived aspects of history that never actually existed. Why do fantasy peoples form the frozen north have to be Vikings? Why do those frozen lands have to be north? Why are temperate climates European analogs? Why is a tropical environment populated by African or Mayan analogs? Why in a fantasy world do people ride horses into battle? Why not bearsâ€¦with forked tongues? For all the freedom that the genre offers, the vast majority of it shackles itself in rules. The societies are different, the people bear little resemblance in race, ethnicity, and cultural construction to the past or present of the real world. Hurley builds a world that is a true fantasy â€” a brilliant fantasy that actually embraces the possibilities it presents rather than limits itself by so-called rules of the past. To continue with the rhetorical questions I mentioned above, why do the gender politics of our current society have to be present? This books calls all that out for the bullshit it is. Hurley creates a variety of nations and societies that are often matriarchic. She rams this rail spike of point home â€” repeatedly. Gender roles are reversed and sometimes completely deconstructed. Does it feel wrong? Does it make you uncomfortable? Should you take a long hard look in the mirror? It comes complete with the gratuitous rape of man by women â€” the same sort that is so often unnecessarily present in other fantasy books and is thankfully being called out more often for the bullshit it is. Of course, is it bullshit in this book when used in the same? With The Mirror Empire, Hurley celebrates the open canvas that is fantasy. There are no rules except the ones imposed on it by us and this book tosses those away. A textbook on what can be done if you free yourself of the imposed limits. The Mirror Empire is bold, courageous, unapologetic, and at times, angry. I really hope that readers, booksellers, and fans refuse to let that happen. This is epic fantasy, just epic fantasy that has removed traditional boundaries. For all the bold, brilliant creativity that goes into the world, as a story, the story of The Mirror Empire suffers. This is a dense book with a slow start. I felt very little about the characters â€” essentially no investment. That makes it a challenge to want to read the book â€” a challenge to enjoy anything about the book. The names are confusing which I suspect is more of a product of the absolute mess that is the first act of this book and not the names themselves. Places are confusing and the geography confounds note: Simply put, the story failed to provide the motivation for me to keep reading to see what would happen next. Sure, I see that, there is a lot of challenge in this book. But that should not be confused with the mess that is its story. So, The Mirror Empire is a mixed bag. Two images â€” one the idealized intent, the other the reflected reality. Did I like it? Did I enjoy it? Will I read the second book in the series? The first book never quite sold me, but I so want this to succeed in large part due to all that I began this review with. Make of that what you will.

Wedgwood, with Bishop C. Leadbeater assisting on the Collects, Psalms, canticles, and readings. In creating the new Rite, Wedgwood and Leadbeater focused more on the glorification of God, rather than the depravity of man. In explaining how the Liberal Rite was developed, Bishop Wedgwood states: References to fear of God, to His wrath and to everlasting damnation were taken out, also the constant insistence on the sinfulness and worthlessness of man and the frequent appeals for mercy. The services were made as clear and free from repetition in their structural sequence as possible. And every opportunity was given to the congregation to join in the worship with all the resources of mind and will and emotion and self-dedication they were able to command. The sentiments put into the mouth of the worshiper are such as those who are filled with the spirit of devotion and service can honestly and sincerely utter. It stresses the idea of co-operation with the Divine Father rather than that of supplication, and being outward-turned in the service of God and His world soon enables a man to realize something of the boundless resources of his own being. They are his by right and not simply by grace. LCC Liturgy Books 1st through 5th editions. A total of five editions of the Rite exist today. Leadbeater - 3rd edition published. Pigott - 3rd edition published in Spanish Partial. Ballesteros - 3rd edition reprint by the LCCI. Neth - 3rd edition reprint by the LCCI. Finn - 3rd edition published in Spanish Complete. Bekken - 3rd edition reprinted by the St. Sykes - 5th edition published by the LCC old synod. Also to be changed will be an invocation to Our Lady at the Healing Service, and the Shorter Form of the Eucharist will be taken from the edition. It was missing the Gospels, Epistles and some other services. As of , the Liberal Catholic Church Theosophia Synod allows the celebrant the use of either the reprint of the 3rd Edition, or the 5th Edition. It made minor changes in the prayer of consecration and one collect. The Shorter Form remained unchanged. This can be seen when one compares an original edition to the current re-print. The LCCI printed a booklet entitled: This so-called "Eastern Rite" has not received much attention by the various Churches in the Liberal Catholic Movement, and there remain questions on its authenticity and authorship. The Young Rite uses numerous liturgies, including a Traditional Form of the Holy Eucharist, the Circle Form of the Holy Eucharist, and the Universal Eucharist, all of which are available for study on their church website. Prayers, readings, and devotions for Liberal Catholics. This text contained the Holy Office, the Proper Collects and various other readings and devotions. It was not an official publication of the LCCI. Alban Press, Cerro Gordo Ave. San Diego, CA Ceremonies of the Liberal Catholic Rite. The Science of the Sacraments. The Collected Works of James I. Book of Prayers, The Pillars of the Temple.
