

1: How Does the Geography of a Region Affect Its Economy? | Bizfluent

Economic Development Overview The City of New Smyrna Beach will strive to enhance the City's quality of life through the creation and preservation of healthy businesses and good jobs.

For years, beachgoers have enjoyed a leisurely drive on the wide, hard-packed sands. Please be a responsible beach driver by driving only in designated areas and observing the speed limit. The driving areas are designated by signs and wooden posts. Please watch for pedestrians, sunbathers and wildlife. Parking is allowed east, or seaward, of the posts. The beach is open to vehicles from 8: The four ramps are: For further information regarding beach passes, please visit www. Remove as much as possible of the sticker and record the serial number on the front of the sticker. The beach is always open and free to pedestrians and bicyclists depending on tides and access ramps being opened. The Natural zones generally correspond to the areas where off-beach development is less intense. The dune habitats within this area largely are intact. These areas also have the highest concentration of turtle nests on Volusia beaches. Public driving and parking is not allowed in the Natural beach areas. The Transitional zones are those areas which have a mixture of natural dunes and some beach seawalls. The concentration of people in these areas generally is less intense most of the year. Sea turtle nesting in these areas is moderate. Public driving and parking is allowed in the Transitional zone 30 feet seaward of the dunes or seawall. The Urban zones are those areas where off-beach development includes hotels, high-rise condominiums and seawalls. The concentration of people is the most intense most of the year. Sea turtle nesting in these areas is minimal. Public driving and parking is allowed in the Urban beach areas 15 feet seaward of the dunes or seawall. Beach parking On the beach, parking is allowed east seaward of the conservation zone. Please park either facing the ocean or the dunes. Please refer to the map for locations of off-beach parking areas. Off-beach parking is offered at these parks and parking lots: Atlantic Avenue Daytona Beach: The sparkling, white sands of Daytona Beach and New Smyrna Beach offer a variety of environmentally friendly recreational experiences. The beaches also are home to hundreds of fascinating plant and animal species. Some animals, such as the loggerhead sea turtle and the piping plover, are threatened with extinction. As a result, they are protected by state and federal laws. To preserve this beautiful natural resource for future generations of beachgoers, all of us must work together to care for and protect this fragile beach ecosystem. From May 1 through Oct. These magnificent animals emerge from the surf at night to lay their eggs in nests dug into the dry sand, then return to the sea. Two months later, about a hundred baby turtles or hatchlings emerge from each of these nests and crawl to the ocean. This amazing cycle of Mother Nature is thousands of years old. Volusia County has taken several steps to protect these gentle creatures. Beach driving and parking is regulated. Vehicles are not allowed west landward of the dune conservation zone where sea turtle nests are most common. Night driving and lighting from beachfront properties is restricted because the mother turtles and tiny hatchlings are confused by bright lights.

2: Michael Kolody candidate zone 1

The City of New Smyrna Beach will strive to enhance the City's quality of life through the creation and preservation of healthy businesses and good jobs.

My professional experience and comments have mostly been ignored. It is for this reason I am now a candidate for New Smyrna Beach Commissioner in Zone 1. Donations I request your support. I am an individual who does not belong to any interested groups within the city. I am retired and have to date been self-funding my campaign. My opponents have raised far in excess of what I have in my campaign coffers. I need your help to be successful in my candidacy. Your name and address must accompany the donation. The charm of our seacoast city and our quality of Life must be protected. Policy Statements I have ideas to stop the downward spiral caused by uncontrolled growth and wish to share them with you. Following sections detail my pledge to the community, campaign platform, issues, background, and plan of action. The policy statements that follow summarize what I will accomplish when elected. No issue is greater than another. Statements are issued when the item is in public debate. Direct contact is kolody gmail. City Manager to maintain a list of tasks assigned by the commission at meetings or offered in response to a public request or general discussion at meetings. A so called "Promise or Action" list. If elected I will fight for these changes. The marina, restaurants, hotel and related improvements grew in scope, taxing the land to the point the only way to meet the financial obligations was to seed control to new partners who were hotel developers. If the Commissioners agreed to further delays, we as citizens would have been left with a 5 story hotel and a diminished marina. A new plan must be prepared to move forward. If elected I would support a mixed use project. An expansion of the boat parking area to relieve stress on the neighborhood. The calculation has been made blind to the physical attributes of the land despite the fact there is a provision in the code which states lands covered by waters should not be included in the calculation. Further reductions would be in order if wetlands were considered under water reducing the allowed number of homes to homes. The result would be a properly planned development by not allowing the development to simply cram the allowed number of homes into upland areas. The fees were established on October 01, and have not been updated by Resolution of the City Commission on an annual or biannual basis. The fees are paid by the developer. The Consumer Price Index has risen. We all know the county had proposed a new sales tax which is a very bad deal and they and the City will study raising the impact fees to death before implementing a change. I propose a resolution be passed raising the impact fees for transportation now to reflect cost of living increase. Study future modifications to the method impact fees are collected next and update the Capital Improvement Plan to include improving our local road network and relieving our neighborhoods of the increasing pressure of overdevelopment. My Pledge I believe in the professional approach to governing in New Smyrna Beach. We need leadership change. Our Commission only approaches change after being assailed by the residents in public for months about their needs. We need a responsive governing body able see the voters needs quickly and act decisively in an open and transparent manner. I have over 45 years experience as an elected member of a governing body, an employee of municipal, county and state governments and as a licensed professional working with private developers appearing before government agencies. I know both sides of the equation and how they function. The charm and small town spirit are what we wanted. Riverside Park-Our connection between land and water. We have been through recessions and boom times but have never been faced with the over-development and degradation of quality of life we now face. Uniting behind a Common Goal I believe the American flag to be our true symbol of democracy, especially when shown en masse. I have very specific views on how to correct the misdirection our City Commission has taken but will work closely with other commissioners to promote a new direction. We must rein in the overdevelopment, yet promote responsible commercial growth west of Interstate 95 and along the US 1 and railroad corridors. This brown pelican certainly is doing ok by his or her self. The photo shows how overdevelopment and lack of enforcement can lead to environmental havoc. Haphazard development has caused traffic problems, Infrastructure degradation has contributed to a gradual loss of quality of life. Some rural areas wish to remain that way but have

development breathing down their necks. Some beachside neighborhoods are being inundated with increasing traffic as drivers try to find a way around crowded roads in commercial areas. The Business Environment Canal Street and Flagler Avenue business districts are flourishing with the steady flow of residents and visitors with the expanding economy. We must work with their business groups to buffer them in the event of an economic downturn. Unless we solve the traffic, access and overdevelopment issues, they will suffer along with city residents who patronize them. There are large un ,and under developed areas zoned for larger scale commercial use which we must push harder for development. These uses, away from our residential areas will help stabilize the tax rate without creating a large influx of traffic. New Smyrna has enacted both. Prior to proceeding with development the applicant must meet the requirements of both. I believe the planning staff often is too liberal in determining compliance to the standards. This board is now well rounded and makes decisions based on planning staff review, the applicants presentation and public comment. In the past the board was mainly comprised of proponents of uncontrolled development who recommended approval of virtually all applications to the City Commission. That board was biased in favor of over development. The composition of the board has changed with an unbiased view towards having development adhere to our current regulations. PUD approval results in a binding agreement with the city preserving the concept plan. Except for minor revisions the plan cannot be changed even if economic, social or environmental concerns lead residents to champion for major revisions. Even then the City cannot unilaterally cancel the PUD.. In my opinion they are nothing more than a license to overdevelop our city. We visited New Smyrna Beach first in staying at the Islander resort and buying a timeshare unit We purchased our home at Via Capri in as a second home, then became permanent residents in All work related activities were conducted within the State of New Jersey. There are, or were not any clients, projects or business activities within Florida.
