Length can be on both edges. Add widest wane together. Add total length of wane from both edges. This chart summarizes the wood. The reverse side of the cuttings shall be sound. That each required cutting shall have one clear sapwood face. Unless otherwise specified, Hard Maple will be unselected for color. Standard White Maple Note: Orders should specify Hard Maple or Soft Maple. White Maple is divided into No. Pieces 4" and 5" wide shall be clear. See Page 12, Par. Cuttings in these grades to be straight grained sapwood, clear both faces. The board will be considered straight grained when the grain does not diverge more than 1 in. Swirly grain, cross grain, curly grain, birds-eye, mineral streaks and spots and season checks shall not be admitted on either face of the required cuttings. A National Hardwood Lumber Association inspector will use his best judgment in considering straight grain, swirly grain, cross grain, curly grain, birds-eye, mineral streaks and spots and season checks, but the Association will not assume liability for these features. Cuttings to be sound as defined in "Sound Cutting. In Basswood, black or brown spots or streaks are admitted in the cuttings in No. Dormant twig buds to be considered as burls. Same as Basswood grades except: A National Hardwood Lumber Association inspector will use his best judgment in considering birdseye, streaks and spots, excessive curly and cross grain, but the Association will not assume liability for these features. Gum streaks and spots are admitted without limit. Cuttings to be sound as defined in "Sound Cutting" NO. See Page 12, Paragraph 42 Quartered Sycamore Quarter Sawn Sycamore shall be graded according to the rules for Quarter Sawn Oak except that mineral streaks and spots and streaks and spots of similar nature are admitted without limit. Poplar American Tulipwood Note: It is not limited in the Common grades. See Page 11, Par. Standard, except slight stain is admitted. Stain will be light gray when the piece is surfaced two sides to standard surfaced thickness. Standard, except stain is admitted. Standard, except cuttings to be sound as defined in N "Sound Cutting. Any part of the sapwood allowed may be included in the cuttings. Graded on Standard Defect basis listed on page See Standard Defects on page The reverse side of the board shall be sound as defined in Sound Cutting or the reverse side of the board grading not below No. The reverse side of the cuttings shall be sound as defined in Sound Cutting or the reverse side of the board grading not below No. Sapwood is admitted without limit on the reverse side. All the requirements for No. Standard to include No. When located away from the edges and ends where they cannot be admitted as the equivalent to wane defects, the following shall be considered as standard defects: Three spot worm holes or their equivalent equals one defect. Defects larger than one standard defect, excepting wane and split, shall be considered on the following average diameter measurement: In the wane defect, wane may extend through the full thickness of the piece showing on both faces. Other defects not defined as standard defects, that do not damage the piece more than the standard defects allowed, are equivalent defects and must be so considered by the inspector. Cuttings to be sound as defined in N "Sound Cutting. Sap Gum is lumber produced from the Sweet Gum tree containing sapwood in excess of the quantity admitted in the grades of Red Gum lumber. For the grading rules regarding the various Gum separations, see below. When ribbon stripe figure is specified each piece shall be selected for the stripe effect caused by the wavy grain brought out in quarter sawing. Plain Red Gum Red Gum is lumber produced from the Sweet Gum tree, containing sufficient heartwood to be admitted into the grades defined under the caption of Red Gum. Stain is admitted in the sapwood in all grades. FAS will admit 1" of sapwood in the aggregate on one face and one-Fifth of the surface in the aggregate on the reverse side. Unlimited sapwood is admitted on the reverse side. Each cutting shall have one clear heartwood face. Each cutting shall have one clear N heartwood face. Pieces below the grade of No. Plain Sawn Red Gum, Figured Wood Each piece shall be especially selected for markings and color tones of spots and streaks producing a variegated effect on the surface. Otherwise the rules for Plain Red Gum shall apply. Quartered Red Gum No figure is required. The reverse side of any piece will admit sapwood aggregating one-fifth of its surface. Each cutting shall have one clear 33 heartwood face. When ribbon stripe figure is specified each piece should be selected for the stripe effect caused by the wavy

grain brought out in quarter sawing. Quartered Red Gum, Figured Wood Each piece shall be especially selected for markings and color tones of spots and streaks producing a variegated effect on the surface. Otherwise the rules for Quartered Red Gum shall apply. Standard except stain is admitted. Standard, except that worm holes and stain shall be admitted without limit. Each required cutting will admit without limits sound knots, spot worm holes, pin worm holes, bird peck, streaks, stain, and burls. Knots admitted may contain checks or splits not exceeding in depth one-half the thickness of the piece. When this method is agreed upon, the surface measure and grade shall be determined inside the markings on the piece. Rustic Oak The grading rules for Colonial Poplar shall apply in all respects, except that one additional cutting is allowed. General Instructions and Standard Grades Pages shall govern the measurement and inspection of all commercial hardwoods indigenous to the Northwest hardwood belt, with the exceptions as set forth under the respective species. These rules shall apply to green, dry, rough or surfaced lumber. The better face of boards in all thicknesses shall yield not less than the minimum percentage of cuttings required for the grade, unless otherwise specified; the reverse side of the cuttings in all thicknesses shall be sound as defined in "SOUND CUTTING," or better, unless otherwise specified. No exception shall be made to these rules unless agreed to by the seller and the buyer and specifically stated in the purchase order. The reverse side of the cuttings in both the Superiors and Cabinet grade face is not required to be sound. No piece shall be admitted which contains pith, boxed or showing, exceeding in the aggregate in inches in length twice the surface measure in feet. No piece shall be admitted which contains splits exceeding in the aggregate in inches in length twice the surface measure of the piece in feet. On the reverse or Cabinet side, wane or its equivalent shall not exceed one fourth the width by three-fourths the length in the aggregate, or pieces may alternately have wane one-third the width by one-half the length in the aggregate. Width of the wane may be divided and show on both edges. The grade shall be determined from the worst face of the board. Wane shall not exceed one-fourth the width or one half the length of the piece. Width of wane may be divided and shown on both edges. Unsound knots that go through the piece are not admitted. Maximum Premium Knot Size face: Length of wane allowed both edges. Other defects are admitted if they do not impair the strength of the cuttings. General Instructions and Standard Grades pages 44-19 shall govern the measurement and inspection of all commercial hardwoods indigenous to the Northwest hardwood belt, with the exceptions as set forth under the respective species. The better face of boards in all thicknesses shall yield not less than the minimum percentage of cuttings required for the grade, the reverse side of the cuttings in all thicknesses shall be sound as defined in "Sound Cutting," or better, unless otherwise specified. There is no limit to the number of cuttings. No piece shall be admitted which contains pith exceeding in the aggregate in inches in length twice the surface measure in feet. No piece shall be admitted which contains splits exceeding in the aggregate in inches in length twice the surface measure of the piece in feet, nor when diverging more than one inch to the foot in length, except when one foot or shorter and covered by Paragraph 59 of Standard Grades. The reverse side of the cuttings in Selects and Better and No. Widths 3" and wider. Lumber poorer in cutting percentage, or less in width or length than admitted in No. Wane shall not exceed one-fourth the width and one-half the length of the piece. Sound knots that do not exceed in their greatest dimension one-half the width of the cutting and other defects that do not impair the strength of the cutting more than the above mentioned defects are admitted. Rules apply to both faces of the piece. National Hardwood Lumber Association Inspectors will apply these rules when called upon to inspect cypress lumber unless otherwise specified. These rules for Cypress are complete under this caption and are not to be confused with any standard grades or other species shown elsewhere in this book. Requests to Association inspectors for inspection of Cypress at loading point should be accompanied by a copy of the order on which shipment is to be made.
